Imaginary Maps presents three stories from noted Bengali writer Mahasweta Devi in conjunction with readings of these tales by famed cultural and literary critic, Gayatri Chakravorty Spivak. Weaving history, myth and current political realities, these stories explore troubling motifs in contemporary Indian life through the figures and narratives of indigenous tribes in India. At once delicate and violent, Devi's stories map the experiences of the "tribals" and tribal life under decolonization. In "The Hunt," "Douloti the Bountiful" and the deftly wrought allegory of tribal agony "Pterodactyl, Pirtha, and Puran Sahay," Ms. Devi links the

specific fate of tribals in India to that of marginalized peoples everywhere. Gayatri Spivak's readings of these stories connect the necessary "power lines" within them, not only between local and international structures of power (patriarchy, nationalisms, late capitalism), but also to the university.

At Waterloo, some 70,000 men under Napoleon and an equal number under Wellington faced one another in a titanic and bloody struggle. In the end, as John Keegan notes, contemporaries felt that Napoleon's defeat had "reversed the tide of European history." Even 190 years later, the name Waterloo resounds. Italian historian Alessandro Barbero's majestic new account stands apart from previous British and French histories by giving voice to all the nationalities that took part. Invoking the memories of British, French, and Prussian soldiers, Barbero meticulously re-creates the conflict as it unfolded, from General Reille's early afternoon assault on the chateau of Hougoumont, to the desperate last charge of Napoleon's Imperial Guard as evening settled in. From privates to generals, Barbero recounts individual miracles and tragedies, moments of courage and foolhardiness, skillfully blending them into the larger narrative of the battle's extraordinary ebb and flow. One is left with indelible images: cavalry charges against soldiers formed in squares; the hand-to-hand combat around farmhouses; endless cannon balls and smoke. And, finally, a powerful appreciation of the inevitability and futility of war. To be published on the 190th anniversary of Waterloo, The Battle is a masterpiece of military history.

Translated here into English for the first time is a monumental

work of literary history and criticism comparable in scope and achievement to Eric Auerbach's *Mimesis*. Italian critic Francesco Orlando explores Western literature's obsession with outmoded and nonfunctional objects (ruins, obsolete machinery, broken things, trash, etc.). Combining the insights of psychoanalysis and literary-political history, Orlando traces this obsession to a turning point in history, at the end of eighteenth-century industrialization, when the functional becomes the dominant value of Western culture. Roaming through every genre and much of the history of Western literature, the author identifies distinct categories into which obsolete images can be classified and provides myriad examples. The function of literature, he concludes, is to remind us of what we have lost and what we are losing as we rush toward the future.

Merini, like Dante, represents the story of the Exodus of the Israelites from Egypt, in its literal and allegorical senses. The forty poems of *The Holy Land* recall Moses at Mount Sinai, the Israelites' forty years in the desert, and Jesus' fast in the wilderness. For Merini, it seems, the Holy Land is not the Promised Land of Canaan, but the forty years spent getting there, coming to terms with the terrifying atrocities of hell, the mystical ecstasies of paradise, and the "intense pain...of plunging back into the banality of daily living." Merini's wandering may be understood as the poet's search for the obscure laws which govern her visions, metamorphoses, and creations.

The work of Seattle-based architect Tom Kundig has been called both raw and refined, as well as super-crafted and warm. Kundig's projects, especially his houses, uniquely combine these two seemingly disparate sets of characteristics to produce some of the most inventive structures found in the architecture world today. Kundig's internationally acclaimed work is inspired by both the industrial structures with which he grew up in the Pacific Northwest and the vibrant craft cultures that are fostered there. His buildings uniquely meld industrial sensibilities and materials such as Cor-ten steel and concrete with an intuitive understanding of scale. As Kundig states, "The idea is inseparable from the fabrication, inseparable from the materials used." Tom Kundig: Houses presents five projects in depth, from their early conceptual sketches to their final lovingly wrought, intimate details. Kundig's houses reflect a sustained and active collaborative process between designer, craftsmen, and owners, resulting in houses that bring to life the architect's intentions, the materials used, and lines of unforgettable beauty.

Effective storytelling stems from many elements, the most crucial of which are unseen or blended in so unobtrusively that they are difficult to spot and analyze. Still, they are necessary to the wholeness and coherence of a story—to create a work that lingers and resonates in the reader's imagination. In *Between the Lines*, author and writing instructor Jessica Page Morrell shows you how

to craft a unified and layered novel or short story by mastering subtle storytelling techniques, such as: Using emotional bombshells, surprises, and interruptions to intensify cliffhangers
Enlarging your story world through the use of layered subplots
Building suspense one scene at a time to maximize the emotional payoff
Anchoring your premise to your protagonist's character arc
Transitioning into and out of flashbacks without interrupting the mood of your story
Detailed instruction combined with examples from well-known authors turn seemingly complex topics like subtext, revelations, misdirection, and balance into comprehensible techniques that will elevate your writing to the next level.

A 'travel guide' to the periodic table, explaining the history, geography and the rules of behaviour in this imagined land. The Periodic Kingdom is a journey of imagination in which Peter Atkins treats the periodic table of elements - the 109 chemical elements in the world, from which everything is made - as a country, a periodic kingdom, each region of which corresponds to an element. Arranged much like a travel guide, the book introduces the reader to the general features of the table, the history of the elements, and the underlying arrangement of the table in terms of the structure and properties of atoms. Atkins sees elements as finely balanced living personalities, with quirks of character and certain, not always outward, dispositions, and the kingdom is thus a land of intellectual satisfaction and infinite delight.

In the mold of his acclaimed *History of Beauty*, renowned cultural critic Umberto Eco's *On Ugliness* is an exploration of the monstrous and the repellant in visual culture and the arts. What is the voyeuristic impulse behind our attraction to the gruesome and the horrible? Where does the magnetic appeal of the sordid and the scandalous come from? Is ugliness also in the eye of the beholder? Eco's encyclopedic knowledge and captivating storytelling skills combine in this ingenious study of the Ugly, revealing that what we often shield ourselves from and shun in everyday life is what we're most attracted to subliminally. Topics range from Milton's Satan to Goethe's Mephistopheles; from witchcraft and medieval torture tactics to martyrs, hermits, and penitents; from lunar births and disemboweled corpses to mythic monsters and sideshow freaks; and from Decadentism and picturesque ugliness to the tacky, kitsch, and camp, and the aesthetics of excess and vice. With abundant examples of painting and sculpture ranging from ancient Greek amphorae to Bosch, Brueghel, and Goya among others, and with quotations from the most celebrated writers and philosophers of each age, this provocative discussion explores in-depth the concepts of evil, depravity, and darkness in art and literature.

Copywriting in a New Media and Marketing Era Crown

A New York Times Bestseller In this spellbinding exploration of the varieties of love, the author of the worldwide bestseller *Call Me by Your Name* revisits its complex and beguiling characters decades after their first meeting. No novel in recent memory has spoken more movingly to contemporary readers about the nature of love than André Aciman's haunting *Call Me by Your Name*. First published in 2007, it was hailed as "a love letter, an invocation . . . an exceptionally beautiful book" (Stacey D'Erasmus, *The New York Times Book Review*). Nearly three quarters of a million copies have been sold, and the book became a much-loved, Academy Award-winning film starring Timothée Chalamet as the young Elio and Armie Hammer as Oliver, the graduate student with whom he falls in love. In *Find Me*, Aciman shows us Elio's father, Samuel, on a trip from Florence to Rome to visit Elio, who has become a gifted classical pianist. A chance encounter on the train with a beautiful young woman upends Sami's plans and changes his life forever. Elio soon moves to Paris, where he, too, has a consequential affair, while Oliver, now a New England college professor with a family, suddenly finds himself contemplating a return trip across the Atlantic. Aciman is a master of sensibility, of the intimate details and the emotional nuances that are the substance of passion. *Find Me* brings us back inside the magic circle of one of our greatest contemporary romances to ask if, in fact, true love ever dies.

How have we thought "the body"? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the "mystical body of Christ"—all these (and others) are incorporated in the word *Corpus*, the title and topic of Jean-Luc Nancy's masterwork. *Corpus* is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the "corpus" from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the "mind-body problem" formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is "The Intruder," Nancy's philosophical meditation on his heart transplant. The book also serves as the opening move in Nancy's larger project called "The deconstruction of Christianity."

A groundbreaking translation of the epic work of one of the great minds of the nineteenth century Giacomo Leopardi was the greatest Italian poet of the nineteenth century and was recognized by readers from Nietzsche to Beckett as one of the towering literary figures in Italian history. To many, he is the finest Italian poet after Dante. (Jonathan Galassi's translation of Leopardi's *Canti* was published by FSG in 2010.) He was also a prodigious scholar of classical literature and philosophy, and a voracious reader in numerous ancient and modern languages. For most of his writing career, he kept an immense notebook, known as the *Zibaldone*, or "hodge-podge," as Harold Bloom has called it, in which Leopardi put down his original, wide-ranging, radically modern responses to his reading. His comments about religion, philosophy, language, history, anthropology, astronomy, literature, poetry, and love are unprecedented in their brilliance and suggestiveness, and the *Zibaldone*, which was only published at the turn of the twentieth century, has been recognized as one of the foundational books of modern culture. Its 4,500-plus pages have never been fully translated into English until now, when a team under the auspices of Michael Caesar and Franco D'Intino of the Leopardi Centre in Birmingham, England, have spent years producing a lively, accurate version. This essential book will change our understanding of nineteenth-century culture. This is an extraordinary, epochal publication.
