The events of January 6, 2021 gave new currency to the idea of brainwashing. Some claimed that Trump's followers had been brainwashed, while others insisted that a 'deep state' had brainwashed most Americans into accepting a rigged election. Scholars who explain that brainwashing theories have long been rejected by most academics and courts of law find it difficult to be heard.

Brainwashing nevertheless remains a convenient explanation of how seemingly normal citizens convert to unusual religious or political ideologies. This Element traces its origins to the idea that conversion to deviant beliefs is due to black magic. A more scientific hypnosis later replaced magic and the Cold War introduced the supposedly infallible technique of brainwashing. From the 1960s, new religious movements, more commonly called cults, were accused of using brainwashing. Most scholars of religion reject the theory as pseudoscience, but the controversy continues to this day.

Operation Mind Control - The CIA - The Making and Unmaking of a KILLER! This is the most terrifying true story ever to emerge from the united states. Walter Bowart has uncovered a huge government ""cryptocracy"" dedicated to controlling and manipulating human minds. Through hypnosis and drugs, ordinary citizens became CIA zombies, human computers, spies, trained assassins, with no control over their consciousness or consciousness of their actions. Only unexplained memory gaps, or a separate personality which emerged on a trigger cue, showed the victim that something else was amiss. Bowart's devastating account includes top secret documents cold-bloodedly outlining the cryptocracy's program, and startling new evidence to link Lee Harvey Oswald, James Earl Ray, and Sirhan Sirhan with Operation Mind Control. In the Manchurian Candidate that was fiction - OPERATION MIND CONTROL IS CHILLING FACT!

This might be one of the best fiction books about a father's ability to brainwash his son into a successful life. What seems like a tale about believing in yourself when starting life in a small village in a third-world country quickly turns into a humorous and inspirational journey about overcoming adversity and dealing with first-world problems. Join author Ramdyaal Bhola as he tells a fictional story based on his life. It's not one of those rags-to-riches stories. Still, you'll enjoy a worldwide journey as he leaves his village in Guyana, South America, and heads from London to Australia, where he became a successful medical practitioner. You'll even get a little insight into the Aboriginal culture and see how being brainwashed at just the right time can lead to believing in yourself, overcoming adversity, and helping others as a medical practitioner.

"Black people are not dark-skinned white people," says advertising visionary Tom Burrell. In fact, they are a lot more. They are survivors of the Middle Passage and centuries of humiliation and deprivation, who have excelled against the odds, constantly making a way out of "no way!" At this point in history, the idea of black inferiority should have had a "Going-Out-of-Business Sale." After all, Barack Obama has reached the Promised Land. Yet, as *Brainwashed: Erasing the Myth of Black Inferiority* testifies, too much of black America is still wandering in the wilderness. In this powerful examination of "the greatest propaganda campaign of all time"—the masterful marketing of black inferiority Burrell poses 10 provocative questions that will make black people look in the mirror and ask why, nearly 150 years after the Emancipation Proclamation, so many blacks still think like slaves. *Brainwashed* is not a reprimand; it is a call to deprogram ourselves of self-defeating attitudes and actions. Racism is not the issue; how we respond to racism is the issue. We must undo negative brainwashing and claim a new state of race-based self-esteem and self-actualization. Provocative and powerful, *Brainwashed* dares to expose the wounds so that we, at last, can heal.

"Behind the front lines of every war in the world, prisoners are forced to sit for interrogation: manipulated, coerced, and sometimes tortured--often without ever being touched. *Brainwash* is a history of the methods intended to destroy and reconstruct the minds of captives, to extract information, convert dissidents, and lead peaceful men to kill and be killed. With access to formerly classified documentation and interviews from the CIA, U.S. Army, MI5, MI6, and British Intelligence

Corps, Dominic Streatfeild traces the evolution of mind control from its origins in the Cold War to the height of today's war on terror. Vivid and disturbing, *Brainwash* is essential insight into the modern practice of interrogation and torture."--Back cover.

Brainwashing; The Story of Men Who Defied It Macmillan

Excerpt from *Brainwashing the Story of Men Who Defied It* The new word brainwashing entered our minds and diction aries in a phenomenally short time. This sinister political expression had never been seen in print anywhere until a few years ago. About the only times it was ever heard in conversation was inside a tight, intimate circle of trusted relatives or reliable friends in Red China during the short honeymoon period of communism. The few exceptions were when a Red indoctrinator would lose his temper and shout out, You need a brainwashing. The reason the word was picked up so quickly was that it was not just a clever synonym for something already known, but described a strategy that had yet no name. A vacuum in language existed: no word tied together the various tactics that make up the process by which the communists expected to create their new Soviet man. The word came out of the sufferings of the Chinese people. Put under a terrifying combination of subtle and crude mental and physical pressures and tortures, they detected a pattern and called it brainwashing. The Reds wanted people to believe that it could be amply described by some familiar expression such as education, public relations, persuasion or by some misleading term like mind reform and re-education. None of these could define it because it was much, much more than any one of them alone. The Chinese knew they hadn't just been educated or persuaded; something much more dire than that had been perpetrated on them, similar in many peculiar ways to a medical treatment. Meerloo began to study the methods by which systematic mental pressure brings people to abject submission, and by which totalitarians imprint their subjective "truth" on their victims' minds. In "The Rape of the Mind" he goes far beyond the direct military implications of mental torture to describing how our own culture unobtrusively shows symptoms of pressurizing people's minds. He presents a systematic analysis of the methods of brainwashing and mental torture and coercion, and shows how totalitarian strategy, with its use of mass psychology, leads to systematized "rape of the mind." He describes the new age of cold war with its mental terror, verbocracy, and semantic fog, the use of fear as a tool of mass submission and the problem of treason and loyalty, so loaded with dangerous confusion. The "Rape of the Mind" is written for the interested layman, not only for experts and scientists. Contents: Part One: The Techniques of Individual Submission. 1. You Too Would Confess. 2. Pavlov's Students as Circus Tamers. 3. Medication into Submission. 4. Why Do They Yield? The Psychodynamics of False Confession. Part Two: The Techniques of Mass Submission. 5. The Cold War against the Mind. 6. Totalitaria and its Dictatorship. 7. The Intrusion by Totalitarian

Thinking. 8. Trial by Trial. 9. Fear as a Tool of Terror. Part Three: Unobtrusive Coercion. 10. The Child is Father to the Man. 11. Mental Contagion and Mass Delusion. 12. The dream of control over human behaviour is an old dream, shared by many cultures. This fascinating account of the histories of human engineering describes how technologies of managing individuals and groups were developed from the nineteenth century to the present day, ranging from brainwashing and mind control to Dale Carnegie's art of dealing with people. Derksen reveals that common to all of them is the perpetual tension between the desire to control people's behaviour and the resistance this provokes. Thus to influence other people successfully, technology had to be combined with tact: with a personal touch, with a subtle hint, or with outright deception, manipulations are made palatable or invisible. Combining psychological history and theory with insights from science and technology studies and rhetorical scholarship, Derksen offers a fresh perspective on human engineering that will appeal to those interested in the history of psychology and the history of technology.

First published in 1956, this book by U.S. journalist and intelligence agent Edward Hunter comprises dramatic first-hand accounts from Korean War veterans who survived P.O.W. camps and Communist attempts to brainwash them. "The new word brainwashing entered our minds and dictionaries in a phenomenally short time. [...] The reason the word was picked up so quickly was that it was not just a clever synonym for something already known, but described a strategy that had yet no name. [...] The word came out of the sufferings of the Chinese people. Put under a terrifying combination of subtle and crude mental and physical pressures and tortures, they detected a pattern and called it brainwashing. [...] What they had undergone was more like witchcraft, with its incantations, trances, poisons, and potions, with a strange flair of science about it all, like a devil dancer in a tuxedo, carrying his magic brew in a test tube." A true and terrible story of the men who endured and defied the most diabolical red torture—the war book you will never forget. "A fascinating document."—Chicago Tribune

This book explains how people can be radically manipulated by extreme groups and leaders to

engage in incomprehensible and often dangerous acts through psychologically isolating situations of extreme social influence. These methods are used in totalitarian states, terrorist groups and cults, as well as in controlling personal relationships. Illustrated with compelling stories from a range of cults and totalitarian systems, Stein's book defines and analyses the common identifiable traits that underlie these groups, emphasizing the importance of maintaining open yet supportive personal networks. Using original attachment theory-based research this book highlights the dangers of closed, isolating relationships and the closed belief systems that justify them, and demonstrates the psychological impact of these environments, ending with evidence-based recommendations to support an educational approach to awareness and prevention. Featuring a foreword by John Horgan, the new edition has been fully updated to include recent work on political extremism and radicalization and totalitarian systems, as well as the recent highly publicized NXIVM case. *Terror, Love and Brainwashing*, second edition is essential reading for professionals, policy makers, legal professionals, educators and cult survivors and their families themselves.
