### Justice Imperiled

Stanford University Press  
Examining how the 'here and now' of space, territory, the body, are being redefined by new technologies and how this undoes simplistic versions of the globalization thesis, Paul Virilio demonstrates how technology has made inertia the defining condition of modernity. An instantaneous present has replaced space and the sovereignty of territory; everything happens without the need to go anywhere. This book will be a key reference for students and scholars of the latest thinking in social theory.

KEYNOTE: The extraordinary jewelry presented in this book is inspired by the beauty of the earth's natural treasures. The ingredients are diamonds, garnets, gold, silver, copper, jade, and sapphires, and they are shaped in the forms of eggplant, red pepper, Savoy cabbage, green peas, and squash. This unique and stunning book pairs the newest line of jewelry from the acclaimed Hemmerle company with simple and elegant recipes by British chef Tamasin Day-Lewis. The name Hemmerle has been synonymous with fine jewelry for more than a century. Each piece of jewelry is exquisitely

photographed alongside a sumptuous vegetable-centered dish, for which an easy-tofollow recipe is provided. Filled with the brilliant reds, greens, yellows, and purples that make vegetables and gems so appealing, this cookbook-cum-catalog is a feast for the eyes as well as the palate.  
AUTHOR: The Munich based jewelry company Hemmerle is one of the most esteemed and important designers of jewelry in the world today. Tamsin Day-Lewis is a renowned chef and food writer. She is the author of several cookbooks: her recipes and articles have appeared in Vanity Fair, Vogue, Food Illustrated and the Daily Telegraph.

Throughout his career, David Grossman has been a voice for peace and reconciliation in the Israeli-Palestinian divide. In this groundbreaking collection of essays on literature and politics, he addresses the conscience of present-day Israel, a country that has lost faith in its leaders and its ideals. Writing in the Dark ends with the speech in which Grossman famously attacked Israel's disastrous Lebanon war that tragically took the life of his twenty-one-year-old son, Uri. Moving, brave and clear-sighted, these essays on literature, political ethics and the morality of the imagination are a *cri de coeur* from a calm voice of reason at a time of doubt and despair.

In *The Sea in the Greek Imagination*, Marie-Claire Beaulieu unifies the multifarious representations of the sea and sea-crossing in Greek myth and imagery by

positing the sea as a cosmological boundary between the worlds of the living, the dead, and the gods, or between reality and imagination.

This textbook introduces the industrial production and processing of natural resources. It is divided into six major topics (fats and oils, carbohydrates, lignin, terpenoids, other

natural products, biorefinery), which are divided into a total of 20 chapters. Each chapter is self-contained and therefore a compact learning unit, which can be worked on by students in self-study or presented by lecturers. Clear illustrations, flow diagrams, apparatus drawings and photos facilitate the understanding of the subject matter. All chapters end with a succinct summary, the "Take Home Messages". Each chapter is supplemented by ten short test questions, which can be solved quickly after working through the chapter; the answers are at the end of the book. All chapters contain bibliographical references that focus on essential textbooks and reference works. As a prior knowledge, only basic knowledge of chemistry is required.

Wenn Autofirmen Studien und Prototypen zeigen, erlauben sie damit einen Blick hinter den Vorhang, eine Vision von dem, was kommt oder kommen könnte. Neben dem, was bei offiziellen Terminen

und auf Messen gezeigt wird, gibt es aber eine überwältigende Menge von Entwürfen und Modellen, die der Öffentlichkeit aus verschiedensten Gründen verborgen bleiben. In diesem Buch wird das unmögliche möglich: ein Blick auf noch nie gesehene Porsche - Porsche Unseen. Stefan Bogner durfte exklusiv im Allerheiligsten des Porsche Designs fotografieren und beschert uns absolute Aha-Momente. Die Porsche-DNA ist in jedem der gezeigten Modelle erkennbar, die Ausführung aber so neu und zum Teil so unerwartet, dass man meint, in einem Paralleluniversum gelandet zu sein. Ein 1-Liter-Auto von Porsche? Ein coupéhafter 4-Sitzer mit 911-Zügen? Einsitzige Roadster mit dem Geist der 50er-Jahre? Das alles hat Stefan Bogner im Modell oder sogar fahrfertig vor der Linse gehabt. Die erhellenden Hintergründe hat Jan Baedeker im persönlichen Gespräch mit Designchef Michael Mauer notiert. Folgen Sie uns auf eine unvergleichliche Entdeckungsreise durch die Welt des Porsche Designs! Zweisprachig:

Unknown valuables When car companies present studies and prototypes, they allow a glimpse behind the scenes, a vision of what will come or might come. Apart from what is shown on official events and at fairs, there is an overwhelming number of drafts and models, that remain hidden from the public for various reasons. This book achieves the impossible: a look at Porsche cars the public never laid eyes on - Porsche Unseen. Stefan Bogner was exclusively allowed to take pictures in the Porsche Design sanctum, aha-experiences guaranteed. The Porsche DNA is recognisable in any of the models shown, but the design is so new and unexpected that it suggests the existence of a parallel universe. A 1-litre Porsche? A coupé-like four seater with 911-looks? Single-seated roadsters with 50's flair? Stefan Bogner took photos of all of them - either as models or ready to drive. Jan Baedeker talked with Michael Mauer, Head of Design, and took down the enlightening background information. Join our extraordinary expedition of discovery through the world of Porsche Design!

Oil and Sovereignty

edition Lichtland

Despite the recent  
interests of economic and  
art historians in the  
workings of the market,  
we still know remarkably  
little about the everyday  
context for the exchange  
of objects and the  
meaning of demand in the  
lives of individuals in the  
Renaissance. Nor do we  
have much sense of the  
relationship between the  
creation and purchase of

works of art and the production, buying and selling of other types of objects in Italy in the period. The Material Renaissance addresses these issues of economic and social life. It develops the analysis of demand, supply and exchange first proposed by Richard Goldthwaite in his ground-breaking *Wealth and the Demand for Art in Renaissance Italy*, and expands our understanding of the particularities of exchange in this consumer-led period. Considering food, clothing and every-day furnishings, as well as books, goldsmiths' work, altarpieces and other luxury goods, the book draws on contemporary archival material to explore pricing, to investigate production from the point of view of demand, and to look at networks of exchange that relied not only on money but also on credit, payment in kind and gift giving. The Material Renaissance establishes the dynamic social character of exchange. It demonstrates that the cost of goods, including the price of the most basic items, was largely contingent upon on the relationship between

buyer and seller, shows that communities actively sought new goods and novel means of production long before Colbert encouraged such industrial enterprise in France and reveals the wide ownership of objects, even among the economically disadvantaged.

This book examines how information systems research and education can play a major role in contributing to solutions to the Societal Grand Challenges formulated in "The Millennium Project" ([millennium-project.org](http://millennium-project.org)). Individual chapters focus on specific challenges, review existing approaches and contributions towards solutions in information systems research and outline a research agenda for these challenges. The topics considered in this volume range from climate change, population growth, global ICT availability, breakthroughs in science and technology and energy demand to ethical decision-making, policymaking, gender status and transnational crime prevention. It is the first book to present ideas on how the Information

Systems discipline can contribute to the solution on this wide spectrum of grand societal challenges.

**The Sea in the Greek Imagination** American Philosophical Society Pt. 1 (pp. 1-30) contains the editors' introduction. The collection consists of 263 files containing the memoirs of ca. 230 people who lived in Germany or Austria during the 1930s. Most of the entries were written during the period August 1939-April 1940 in response to an essay contest sponsored by three Harvard professors (one of them was Gordon Allport). The memoirists were Jews, part-Jews, and Christians. The introduction examines various themes in the memoirs, such as identity conflict, persecution and flight, professional occupation, women as memoirists. Pt. 2 (pp. 31-124) contains the catalogue; each entry gives basic biographical information on the memoirist and a synopsis of the content of the memoir.
