Jesus or Muhammad: A Question of
Assurance Two people have radically

influenced the world: Jesus and Muhammad. One name invokes some people to love their enemies. The other name invokes some people to hate those who insult that name. However, movements in the West with varying agendas, infatuated with words like "co-exist," "tolerance," and "inclusivism,"

shove all the key differences between faiths under a rug without any discussion over them. Yet History and Experience tell us that it is good to freely talk about differences in order to understand each other's faith. Steven Masood examines how followers of Jesus and followers of Muhammad use different dictionaries for the definition of peace, love, grace, and mercy. He delves into the Bible and the Qur'an, investigating how both present the creation and the patriarchs. While the Bible stops with Jesus and his disciples, the Qur'an brings Muhammad on the scene. Masood deals sensitively with questions like: Is the Qur'an the continuation of the Bible? Did Jesus promise the coming of Muhammad? Is Jesus or Muhammad the "final messenger" with the authority of

assurance from God? What guidance was promised to Adam, to restore him and his progeny to God? If Jews, Christians, and Muslims believe in the same God, why the different messages? Steven Masood, PhD, has spent over 30 years studying and working in Christian-Muslim relations. At present, he holds workshops and seminars with a Biblical and Qur'anic perspective on Islam. He has written several books, including *The Bible and the Qur'an: A Question of Integrity*. Currently he serves in full-time Christian ministry. More info: www.JesusToMuslims.org

Recognize and refute the Far East false religions What do these religions teach and why? How can a Christian be an

effective witness for Jesus Christ when presented with ideas that are so different from a biblical perspective? How can these religions be refuted and biblical authority be the standard? This eye-opening second volume deals with many Eastern religions like Hinduism, Taoism, New Age, Sikhism, Confucianism, Shinto, and Buddhism, as well as other pagan-based systems like Witchcraft, Voodoo, and Greek mythology (and many more)! This volume dives into these styles of religions and looks at their origins and their basic tenets as well as why they fall so short. Understanding the basic tenets of these religions helps the Bible believer see the flaws in these philosophies and discern how to be an effective witness for Jesus Christ while

standing on the authority of the Bible. *Exploring the Cosmos Within Me* Cirrus Test Prep

In times of questioning and despair, people often quote the Bible to provide answers. Surprisingly, though, the Bible does not have one answer but many "answers" that often contradict one another. Consider these competing explanations for suffering put forth by various biblical writers: The prophets: suffering is a punishment for sin The book of Job, which offers two different answers: suffering is a test, and you will be rewarded later for passing it; and suffering is beyond comprehension, since we are just human beings and God, after all, is God Ecclesiastes: suffering is the nature of things, so just accept it All apocalyptic texts in both the Hebrew

Bible and the New Testament: God will eventually make right all that is wrong with the world. For renowned Bible scholar Bart Ehrman, the question of why there is so much suffering in the world is more than a haunting thought. Ehrman's inability to reconcile the claims of faith with the facts of real life led the former pastor of the Princeton Baptist Church to reject Christianity. In *God's Problem*, Ehrman discusses his personal anguish upon discovering the Bible's contradictory explanations for suffering and invites all people of faith—or no faith—to confront their deepest questions about how God engages the world and each of us.

 O Little snail- Inch by inch Climb Mt. Fuji!
 -Issa Issa and his little snail speak richly

to us all. First, they remind us of something we already know: Life is a journey, a journey with a definite goal. Spiritually speaking, we all have a Mt. Fuji to climb: to find out the truth about God and the meaning of life. Our job is to get to the top. Next, they teach us that the journey is difficult. Indeed, at first glance it may even seem impossible. This is especially true in our day, when philosophers routinely discourage spiritually minded snails by denying the very existence of religious truth; truth that really is "out there," waiting to be seen and scaled; truth that will lead us to breath-taking vistas at the top of the world. Yet in spite of such obstacles, Issa and his friend are not daunted. To the contrary, they are full of faith, clearly believing that the journey is not only

possible, but absolutely necessary. They understand that we snails can exist without making it, but that we cannot really live without making it. And so we hear a Voice. It comes to us through the poet, from far above the poet. With love and urgency, it commands us to climb Mt. Fuji, to seek and find the true answers to life's ultimate questions. Moreover, in doing so, it assures us that we really can. All that is required is inch-by-inch determination-and a little help from the One above. Have you heard the Voice? Have you been thinking about starting-or continuing-your own journey? And have you felt you might like a companion-an older snail with a heart for seekers-who could help you a little along the way? If so, please meet me at the beginning of this book. Together, we will

obey the Voice. Together, we will head out in search of life's meaning. Together we will climb Mt. Fuji!

A religion is a system of stories, and there is no better way to engage with the world's religions than through the stories that animate their beliefs and practices. Through the exploration of these ancient stories and contemporary practices, Stephen Prothero, a New York

TimesDbestselling author and gifted storyteller, helps students better grasp the role of religion in our fractured world and to develop greater religious literacy. Videos and an award-winning adaptive learning tool, InQuizitive, further engage students and help them master core objectives and develop their own religious literacy.

Christianity, Cults & Religions Fortress Press

Globalization and high-speed communication put twenty-first century people in contact with adherents to a wide variety of world religions, but usually, valuable knowledge of these other traditions is limited at best. On the one hand, religious stereotypes abound, hampering a serious exploration of unfamiliar philosophies and practices.

On the other hand, the popular idea that all religions lead to the same God or the same moral life fails to account for the distinctive origins and radically different teachings found across the world's many religions. *Understanding World Religions* presents religion as a complex and intriguing matrix of history, philosophy, culture, beliefs, and practices. Hexham believes that a certain degree of objectivity and critique is inherent in the study of religion, and he guides readers in responsible ways of carrying this out. Of particular importance is Hexham's decision to explore African religions, which have frequently been absent from major religion texts. He surveys these in addition to varieties of Hinduism, Buddhism, Judaism, Christianity, and Islam.

Introduction to Sociology 2e HPA Press University apologist, director, and popular speaker Alex McFarland has spent the last two decades answering questions about Christian worldview and the Bible from children, teens, and parents. In *The 21 Toughest Questions Your Kids Will Ask about Christianity*, he summarizes questions today's children and teens are asking about God, the Bible, and the problem of evil. Alex's experiences have taught him that how adults answer questions about God is as important as, if not more important than, what kids ask. He provides parents with teaching strategies that will help them reach their children intellectually and spiritually. Today's kids and teens are looking for authenticity, integrity, and straightforward truth. Alex comes

alongside parents and gives them tools to effectively answer not only their children's toughest academic questions but also the questions that plague their hearts.

What Is the Sangha? Galore Park Religions in today's culture seem to be multiplying. Have you ever wondered why certain religions believe and practice what they do? Or how they view the Bible? This volume delves into these and other engaging questions, such as: How can a Christian witness to people in these religions? Do these other religions believe in creation and a Creator? How do we deal with these religions from a biblical authority perspective? Many religions and cults discussed in this first volume openly affirm that the Bible is true, but then something gets in their

way. And there is a common factor every time—man’s fallible opinions. In one way or another the Bible gets demoted, reinterpreted, or completely ignored. Man’s ideas are used to throw the Bible’s clear teaching out the window while false teachings are promoted. This book is a must for laymen, church leaders, teachers, and students to understand the trends in our culture and around the world where certain religions dominate, helping you discern truth and guard your faith. When you understand a religion’s origins and teachings, you are in a better position to know how to proclaim the gospel of Jesus Christ as you take the good news to those in false religions.

Science and the World's Religions [3 volumes] Oxford University Press, USA
Exploring the Cosmos Within Me is my continuing attempt to respond to the questions that have preoccupied humanity over the millennia from my own perspective: "Who are we? Why are we here on Earth?" What is our role and purpose in life? How about our future and destiny?" In my earlier Amazon books, I tried to answer those questions

by exploring the Cosmos outside--from the moment we evolved from the chimpanzees to the time of the Big Bang, when all the tiny particles (leptons, quarks, neutrons, protons, and electrons) through a process of chance merger, produced the primordial atoms as well as the planets, stars, and galaxies that incubated us in their wombs--up to the time we evolved from chimpanzees. In this book, in an effort to understand our nature, role, and future, I went further back in time to the moment before the Big Bang when time, space, matter, energy as well as the forces and principles that govern their behavior were compressed in a singularity ready to manifest themselves at the opportune time. I also reviewed what science and religion have to say about us and the

Cosmos we are living in, correlating their answers to my very essence as a human being in the process of becoming, based on what I personally know and have experienced. As I examined the world within me, little did I know that the Cosmos I was exploring outside is really within me, which is also where the meaning and purpose I was looking for in my life also resides. While I consider the enormous contributions of science and religion to the entire humanity, I realized that the answers they provide to the questions I and others have asked, barely satisfied my quest for meaning and purpose in life. I find science too materialistic in its perspective of life, religion too dogmatic and absolutist. Their conflicting and irreconcilable opinions becomes even more glaring if

viewed within each of their disciplines. Quantum physicists, cosmologists, astronomers as well as biologists, neuroscientists, medical scientists, and psychologists are at odds with each other when it comes to explaining our origin, nature, purpose, and future. This is likewise true for the world's most ancient religions like Judaism, Christianity, Islam, Buddhism, and Hinduism. Both science and religion remain isolationist and separatist in their views to this day in spite of the many efforts expended by many of their followers to bridge the gap between them. Sadly, their aggressive isolationist posture only continues to divide humanity into two separate and opposing camps. As I grow and mature, I realize I have to detach myself from

religion in the same manner that I need to test the limits of rationality even if I was heavily trained to be critical and scientific in my approach to life. These issues that arose in finding myself wary of both religion and science are contained in this book. Yet, more than just a critique of religion and science, it is a personal chronicle of my search for answers to the bigger questions in life. As I realize that there are an infinite number of responses open for each one of us, I lay no absolute claim to the truths and beliefs I discovered and experienced in my personal journey. After all, I could be totally wrong from the reader's perspective. At best, my personal narrative may only serve as a guide for those who are still in the process of clarifying the meaning,

purpose, and future of their lives. Paul J. Dejillas May 30, 2019

The Test New Leaf Publishing Group "Answers To: Where Do We Go From Here" isn't written just for older adults; the author's calm and thoughtful voice speaks to everyone from their teen years on up. People of all ages contemplate but rarely discuss the important issues that Nelson brings to light. Is there a human spirit? If so, where does that spirit go when our bodies die? Is re-incarnation real? Is there a Heaven and Hell? These are questions all of us wrestle with as we navigate life's ups and downs, its peaks and valleys, its triumphs and defeats. One thing remains the same though, namely, no one person has the right answer for everybody. Though

most people follow one of the world religions, every one of us has our own unique beliefs. And those deep-seated beliefs (including our faith) will either provide us comfort or distress when our time to leave this world comes. It's clear throughout Nelson's writing that his main goal is to get each reader to examine their own faith, to test their own beliefs, and to be comfortable in whatever views they have regarding death and what, if anything, follows after. He eloquently and thoughtfully provides insights from different religions, different scientific and medical figures, and ordinary people who have experienced extraordinary circumstances. His casual, yet witty style of writing allows readers to participate in what feels like a late-night chat with a

long-time friend. As such a friend, he wants to draw us out on a topic most of us tend to avoid - our own death. That's what friends do.

This trio of volumes contains essays that explore vital existential, moral, or metaphysical issues surrounding the relationship between the sciences and

the world's religions. In *Science and the World's Religions*, experts with scientific and religious backgrounds explore vital existential or practical issues, drawing on whatever sciences are relevant and engaging at least two religious traditions. The multidisciplinary essays exhibit rigorous intellectual, scholarly thinking but are written to clearly communicate to educated adult lay readers. The first volume addresses questions about the origins and purpose of the cosmos and the human project. The second volume investigates the roles of religion and spirituality in human existence, considering issues ranging from the brain and religious experience to the human life cycle. The third volume tackles controversies in which both religion and science are stakeholders,

showing how both can deepen understanding and enrich human experience. Together, these three books present readers with powerful tools that enable them to think through the challenge of integrating science with their religious beliefs and spiritual practices.

A World of Difference (Reasons to Believe) CHANGDER OUTLINE

It can be a surprise to find that Buddhism gives great importance to the Sangha, the spiritual community. Some may feel that their guru or teacher is all that they need. To others, the idea of sharing their inner and outer lives with others can seem a challenge or even a threat. But the spiritual community is not about unthinking conformity or belonging to a comfortable group. Rather, it is the free association of developing individuals choosing to help each other along the path.
