The Official (ISC)²® Guide to the CISSP®-ISSEP® CBK® provides an inclusive analysis of all of the topics covered on the newly created CISSP-ISSEP Common Body of Knowledge. The first fully comprehensive guide to the CISSP-

ISSEP CBK, this book promotes understanding of the four ISSEP domains: Information Systems Security Engineering (ISSE); Certification and Accreditation; Technical Management; and an Introduction to United States Government Information Assurance Regulations. This volume explains ISSE by comparing it to a traditional Systems Engineering model, enabling you to see the correlation of how security fits into the design and development process for information systems. It also details key points of more than 50 U.S. government policies and procedures that need to be understood in order to understand the CBK and protect

U.S. government information. About the Author Susan Hansche, CISSP-ISSEP is the training director for information assurance at Nortel PEC Solutions in Fairfax, Virginia. She has more than 15 years of experience in the field and since 1998 has served as the contractor program manager of the information assurance training program for the U.S. Department of State.

Business Data Networks and

Security CRC Press Eleventh Hour CISSP Study Guide serves as a guide for those who want to be information security professionals. The main job of an information security professional is to evaluate the risks involved in securing assets and to find ways to mitigate those risks. Information security jobs include firewall engineers, penetration testers, auditors, and the like. The book is composed of 10 domains of the Common Body of Knowledge. In each section, it defines each domain. The first domain provides information about risk analysis and mitigation, and it discusses security governance. The second domain discusses techniques

of access control, which is the basis for all security disciplines. The third domain explains the concepts behind cryptography, which is a secure way of communicating that is understood only by certain recipients. Domain 5 discusses security system design, which is fundamental in operating the system and software security components. Domain 6 is one of the critical domains in the Common Body of Knowledge, the Business Continuity Planning and Disaster Recovery Planning. It is the final control against extreme events such as injury, loss of life, or failure of an organization. Domain 7, Domain 8 and Domain 9 discuss telecommunications and network security,

application development security, and the operations domain, respectively. Domain 10 focuses on the major legal systems that provide a framework for determining laws about information system. A groundbreaking guide to forging trusting, mutually beneficial B2B relationships

Companies that have entered into B2B alliances may simultaneously be one and another's customers, suppliers, allies, and competitors. But in today's turbo-charged e-environment, how do companies take full advantage of the many benefits of B2B alliances while avoiding the obvious dangers of

allowing potential competitors intimate access to their value chains? In this groundbreaking book Harry DeMaio, Director of Deloitte & Touche's renowned Enterprise Risk Service Practice, answers that question with the revolutionary concept of E-Trust, a proven strategy based on fostering business relationships based on mutual self-interest and trust. Writing for managers and corporate decision-makers, DeMaio explains the current

state of B2B in an approachable, entertaining fashion, making difficult concepts easy to grasp. He demonstrates the critical role that trust, privacy, and security issues play in the B2B environment and provides guidance on how companies in various industries engaged in B2B relationships must address their varying security and privacy needs. Harry DeMaio (Cincinnati, OH) is Director of Deloitte & Touche's Enterprise Risk Service Practice.
