PISA 2012 Results: Creative Problem Solving (Volume V) Students' Skills in Tackling Real-Life Problems Macmillan

This volume represents the current state of research on picture books and other adjacent hybrid forms of visual/verbal texts such as comics, graphic novels, and book apps, with a particular focus on texts produced for and about young people. When Perry Nodelman's *Words about Pictures: the Narrative Art of Children's Picture Books* was published almost three decades ago, it was greeted as an important contribution to studies in children's picture books and illustration internationally;

and based substantially on it, Nodelman has recently been named the 2015 recipient of the International Grimm Award for children's literature criticism. In the years since *Words About Pictures* appeared, scholars have built on Nodelman's groundbreaking text and have developed a range of other approaches, both to picture books and to newer forms of visual/verbal texts that have entered the marketplace and become popular with young people. The essays in this book offer 'more words' about established and emerging forms of picture books, providing an overview of the current state of studies in visual/verbal texts and gathering in one place the work being produced at various locations and across disciplines. Essays exploring areas such as semiological and structural aspects of conventional picture books, graphic narratives and new media forms, and the material and performative cultures of picture books represent current work not only from literary studies but also media studies, art history, ecology, Middle Eastern Studies, library

and information studies, and educational research. In addition to work by international scholars including William Moebius, Erica Hateley, Nathalie op de Beeck, and Nina Christensen that carries on and challenges the conclusions of *Words about Pictures*, the collection also includes a wide-ranging reflection by Perry Nodelman on continuities and changes in the current interdisciplinary field of study of visual/verbal texts for young readers. Providing a look back over the history of picture books and the development of picture book scholarship, *More Words About Pictures* also offers an overview of our current understanding of these intriguing texts.

Many words and expressions are viewed as 'taboo', such as those used to describe sex, our bodies and their functions, and those used to insult other people. This 2006 book provides a fascinating insight into taboo language and its role in everyday life. It looks at the ways we use language to be polite or impolite, politically correct or offensive, depending

on whether we are 'sweet-talking', 'straight-talking' or being deliberately rude. Using a range of colourful examples, it shows how we use language playfully and figuratively in order to swear, to insult, and also to be politically correct, and what our motivations are for doing so. It goes on to examine the differences between institutionalized censorship and the ways individuals censor their own language. Lively and revealing, *Forbidden Words* will fascinate anyone who is interested in how and why we use and avoid taboos in daily conversation.

Meaning in Interaction: An Introduction to Pragmatics is a comprehensive

introductory text which discusses the development of pragmatics - its aims and methodology - and also introduces themes that are not generally covered in other texts. Jenny Thomas focuses on the dynamic nature of speaker meaning, considering the central roles of both speaker and hearer, and takes into account the social and psychological factors involved in the generation and interpretation of utterances. The book includes a detailed examination of the development of Pragmatics as a discipline, drawing attention to problems encountered in earlier work, and brings the reader up to date with recent discussion in the field. The book is written principally for students with no previous knowledge of pragmatics, and the basic concepts are covered in considerable detail. Theoretical and more complicated information is highlighted with examples that have been drawn from the media, fiction and real-life interaction, and makes the study more accessible to newcomers. It is an ideal introductory textbook for students of linguistics and

for all who are interested in analysing problems in communication.

Buku ini merupakan hasil karya yang diambil dari tesis penulis hampir dua dekade lalu yang berjudul "Penguasaan Perbendaharaan Kata Anak Usia Taman Kanak-kanak ditinjau dari Inteligensi dan Aktivitas Menonton Televisi". Hasil penelitian di tesis ini

masih relevan dengan kondisi saat ini, di mana penulis menemukan bahwa aktivitas menonton televisi tidak berkaitan dengan peningkatan perbendaharaan kata pada anak prasekolah. Hal

ini salah satunya disebabkan pada saat menonton televisi, anak-anak prasekolah ini tidak didampingi orang tua atau orang dewasa di sekitar anak. Anak-anak

prasekolah ini tidak memperoleh pengukuhan (reinforcement) dari orang tua atau orang dewasa di sekitarnya meskipun mereka memperoleh kata-kata baru saat mereka menonton televisi.
