University Press  
Describes the origin of the Eurocentric global order, which Schmitt dates from the discovery of the New World, discusses its specific character and its contribution to civilization, analyzes the reasons for its

decline at the end of the 19th century, and concludes with prospects for a new world order. It is a reasoned, yet passionate argument in defense of the European achievement, not only in creating the first truly global order of international law, but also in limiting war to conflicts among sovereign states, which in effect civilized war.

Excerpt from How to Become a Commercial Traveller IN issuing this Handbook for the use of Commercial Travellers, I have been chiefly animated by the hope that such a work would prove useful to my fellow travellers and especially to the beginner. On the origin or antiquity of commercial travelling I have been silent, as I can well imagine that the present aspect of the Road has more interest for the reader than the past. The Time Machine is a science fiction novella by H. G. Wells, published in 1895 and written as a frame narrative. The work is generally credited with the popularization of the concept of time travel by using a vehicle or device to

travel purposely and

selectively forward or  
backward through time
