Plant Science Catalog University of Chicago Press

A reprint of the classic investigation tracing the origins of the plants cultivated by humans.

Bulletin de la Societe?te? botanique de France Boydell & Brewer

This catalogue, which integrates nearly 35,000 records of benthic marine algae from the Indian Ocean into a taxonomic classification comprising 3,355 specific and infraspecific taxa in 629 genera, will greatly facilitate future work in this region. The bibliography of 4,000 references is the largest list of phycological literature ever published. The extensive taxonomic and nomenclatural notes are of paramount importance.

Vols. 1-13 include Botanical necrology for 1887-89; vols. 1-4 include section called Record of current literature.

Official Gazette of the United States Patent and Trademark Office Edinburgh University Press

A horticultural tour of Marie-Antoinette's domain, the lavishly constructed gardens at Versailles, accompanied by eighteenth-century archival illustrations. Plants, flowers, and trees were Marie-Antoinette's passion; she transformed the Petit Trianon's gardens into an enchanted escape from the oppressive shackles of Versailles. Based on archival documents, this book meanders through Marie-Antoinette's estate as the queen herself would have walked it: traversing hyacinths, buttercups, and anemones in the French Gardens, via winding paths in the Anglo-Chinese Gardens, through the conifers of the Belvedere Gardens--where fabulous nocturnal parties were hosted--past the entrancing aromas of the shrubs surrounding the Temple of Love, to the wildflowers of the Garden of Solitude.

For over a century, plant specialists worldwide have sought to transform healing plants in African countries into pharmaceuticals. And for equally as long, conflicts over these medicinal plants have endured, from stolen recipes and toxic tonics to unfulfilled promises of laboratory equipment and usurped personal patents. In *Bitter Roots*, Abena Dove Osseo-Asare draws on publicly available records and extensive interviews with scientists and healers in Ghana, Madagascar, and South Africa to interpret how African scientists and healers, rural communities, and drug companies—including Pfizer, Bristol-Myers Squibb, and Unilever—have sought since the 1880s to develop drugs from Africa's medicinal plants. Osseo-Asare recalls the efforts to transform six plants into pharmaceuticals: rosy periwinkle, Asiatic pennywort, grains of paradise, *Strophanthus*, *Cryptolepis*, and *Hoodia*. Through the stories of each plant, she shows that herbal medicine and pharmaceutical chemistry have simultaneous and overlapping histories that cross geographic boundaries. At the same time, Osseo-Asare sheds new light on how various interests have tried to manage the rights to these healing plants and probes the challenges associated with assigning ownership to plants and their biochemical components. A fascinating examination of the history of medicine in colonial and postcolonial Africa, *Bitter Roots* will be indispensable for scholars of Africa; historians interested in medicine, biochemistry, and society; and policy makers concerned with drug access and patent rights.

Herbier de la France ... [Vols. 10-13].
Рипол Классик

New essays examining the differences and commonalities between late Weimar-era and early Nazi-era German cinema against a backdrop of the crises of that time.
Annals of Botany Cambridge University Press

"J'ai imaginé pour Vous cet Herbier "extraordinaire" ! D'un part, il vous aidera à identifier les fleurs glanées lors de vos promenades grâce aux aquarelles que j'ai peintes d'après nature. Ensuite, lorsque vous aurez soigneusement séché chaque

plante, vous vous amuserez à la réintégrer aux planches documentaires recréant ainsi le fabuleux enchevêtrement naturel des végétaux ; Par l'association des fleurs séchées collées au fil des aquarelles, vous personnaliserez un ouvrage de botanique, à la fois complet et original, compagnon indispensable de vos escapades. Je Vous souhaite beaucoup de bonheur sur les chemins de Randonnée de nos plus belles Campagnes..." Michèle Delsaute

Origin of Cultivated Plants: The International Scientific Series Volume XLVIII by Alphonse de Candolle is a comprehensive exploration into the origins and evolution of cultivated plants. Candolle's meticulous research and analysis provide readers with a deep understanding of botany and agriculture, making it a valuable resource for scholars and plant enthusiasts.

Herbier de la France ... [Vols. 4-6].

This book is the first major study of a French silent cinema star. It focuses on Pierre Batcheff, a prominent popular cinema star in the 1920s, the French Valentino, best-known to modern audiences for his role as the protagonist of the avant-garde film classic *Un chien andalou*. Unlike other stars, he was linked to intellectual circles, especially the Surrealists. The book places Batcheff in the context of 1920s popular cinema, with specific reference to male stars of the period. It analyses the tensions he exemplifies between the 'popular' and the 'intellectual' during the 1920s, as cinema - the subject of intense intellectual interest across Europe - was racked between commercialism and 'art'. A number of the major films are studied in detail: *Le Double amour* (Epstein, 1925), *Feu Mathias Pascal* (L'Herbier, 1925), *Education de prince* (Diamant-Berger, 1927), *Le Joueur d'echecs* (Bernard, 1927), *La Sirene des tropiques* (Etievant and Nalpas, 1927), *Les Deux timides* (Clair, 1928), *Un chien andalou* (Bunuel, 1929), *Monte-Cristo* (Fescourt, 1929), and *Baroud* (Ingram, 1932).
Key features:
*The first major study of a French silent cinema star.
*Provides an in-depth analysis of star performance.
*Includes extensive appendices of documents from popular

cinema magazines of the period.
