Geological Survey Bulletin Cambridge University Press

Après les personnages réels convoqués dans la série, ce dixième volume s'intéresse aux grands périple

exotiques effectués par Blutch et Chesterfield, au Mexique puis au Canada, à travers deux de leurs aventures, « El padre » (tome 17) et « L'or du Québec » (tome 26). Fort de ses recherches et de ses illustrations, le dossier de Philippe Tomblaine met en lumière le contexte géopolitique des

principaux pays d'Amérique du Nord durant la guerre de Sécession, entre sillages colonialistes et émancipations nationales. Un ouvrage qui fera voyager très loin tous ceux qui ont envie d'accompagner le sergent Chesterfield et le caporal Blutch dans leurs aventures !

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

Gaston John Libbey Eurotext

This delightful little volume, first published in French in 1936, extols the many joys and benefits of wine. Wine

drinkers will take pleasure in Gaston Derys's quaint appreciation of the grape, and art lovers will admire Raoul Dufy's joyful watercolors. Reflecting the exuberance and elan of an earlier day, Derys takes us back to a time when the doctor's favored prescription was an amiable glass of wine. In Derys's ode to wine, here translated into English, we discover that the medicinal and therapeutic uses of wine are many: it assists in fighting typhoid, infant sicknesses, and diabetes; it exerts a positive effect on one's character, beauty, and creativity; and it lends a fortifying power to athletes and soldiers. Supported by the comments of French doctors as well as Dufy's beautifully reproduced paintings, Derys's argument to raise a glass of wine becomes

pleasantly irrefutable.

*Gaston* Edoardo Confalonieri

This is the urban century in which, for the first time, the majority of people live in towns and cities. Understanding how people influence, and are influenced by, the 'green' component of these environments is therefore of enormous significance. Providing an overview of the essentials of urban ecology, the book begins by covering the vital background concepts of the urbanisation process and the effect that it can have on ecosystem

functions and services. Later sections are devoted to examining how species respond to urbanisation, the many facets of human-ecology interactions, and the issues surrounding urban planning and the provision of urban green spaces.

Drawing on examples from urban settlements around the world, it highlights the progress to date in this burgeoning field, as well as the challenges that lie ahead.

This English language edition is far more than a simple translation of the work "L'Histoire des vaccinations" published in 2008. The French edition has actually been totally revised and improved. In particular, it features a chapter dedicated entirely to yellow fever. A greater number of illustrations are included. This book will undoubtedly be of great interest to a section of the general public and to specialists. The history of vaccinations is a significant phase in the history of humanity. With the development of hygiene, vaccinations have certainly been the most notable progress of medicine. Nevertheless, this subject which has revolutionised human and animal medicine has long been explored poorly

or not at all. This oversight has now been addressed through this fascinating work. All translated Pasteur texts are from the original manuscripts found in his laboratory notebooks. Finally, the moral problems inherent in the use of vaccines are addressed and at times, appear strangely similar to current situations. . .
