Financing Healthcare for All in India Wiley-Blackwell

Abstract: In 2003, after over 20 years of minimal health insurance coverage in rural areas, China launched a heavily subsidized voluntary health insurance program for rural residents. The authors use program and household survey data, as well as health facility census data, to analyze factors affecting enrollment into the program and to estimate its impact on households and health facilities. They obtain estimates by combining differences-in-differences with matching methods. The authors find some evidence of lower enrollment rates among poor households, holding other factors constant, and higher enrollment rates among households with chronically sick members. The household and facility data point to the scheme significantly increasing both outpatient and inpatient utilization (by 20-30 percent), but they find no impact on utilization in the poorest decile. For the sample as a whole, the authors find no statistically significant effects on average out-of-pocket spending, but they do find some-albeit weak-evidence of increased catastrophic health spending. For the poorest decile, by contrast, they find that the scheme increased average out-of-pocket spending but reduced the incidence of catastrophic health spending. They find evidence that the program has increased ownership of expensive equipment among central township health centers but had no impact on cost per case.

Annual Report Arihant Publications India limited

This book describes the present awful state of India's Public Health Care Delivery, its dismal planning and implementation. It argues that it can be remedied comprehensively and effectively, using its 'own already present' resources. A radical re-evaluation of some sacrosanct ideas and discarding many of these, especially in Primary Care and its structure is required. It can be done without disadvantage to the last man served. This book starts with the sea change India has undergone and emphasizes new ways of managing health. High quality work force creation and its deployment, an unsolved problem is effectively given a solution. The bulk of the book discusses the entire public health care structure and function and how it can be newly laid out with proper work force allocation, hitherto grossly inadequate, including professionals from other training backgrounds. It is total solution that will help India to achieve the goal of Universal Health Care.

IAP Guidebook on Immunization 2018-2019 Springer

Each year, almost 11 million children under five years of age die from largely preventable causes,

whilst about half a million women die in pregnancy, childbirth or soon after. This year's report focuses on maternal, newborn and child health issues as an integral part of progress towards achieving the Millennium Development Goals targets and promoting poverty reduction. It identifies exclusion as a key feature of inequity as well as a barrier to progress, and sets out strategies required to ensure universal access to health care and social health insurance systems for every mother and child, through a continuum that extends from pregnancy through childbirth, the neonatal period and childhood.

Magbook General Science 2020 Arihant Publications India limited

E-Governance has been one of the strategic sectors of reform in India since late 1990s under the rubric of 'good governance' agenda promoted by International Organizations. As India's policy focus changed towards economic liberalization, deregulation and privatization proliferating domestic and foreign investment, ICT (Information Communication Technology) has been one of the leading areas for such heightened investment. Consequently, there has been a burgeoning interest in deploying ICT, in revamping the public service delivery and eventually the overall system of governance. This book analyses e-Governance in India and argues that such initiatives did not take place in isolation but followed in the footsteps of broader governance reform agenda that has already made considerable impact on the discourses and practices of governance in India. Employing interdisciplinary methodology by combining approaches from the Political Sciences, Sociology and Postcolonial/ transcultural studies, this book presents a qualitative account of the policies and practices of e-Governance reform in India along with a detailed case study of the Common Services Centres (CSCs) Scheme under the National e-Governance Plan of the Government of India and its resultant impact on the overall system of governance. It unfolds general theoretical issues in terms of the relationship between technology and governance and the entanglement of politics, technology and culture in the complex whole of governance. This furthers our understanding of the impact of the transnational governance reform agenda on post-colonial and post-communist societies of the developing world. Making an important and original contribution to the emerging field of e-Governance and to the existing body of research on governance in general, this book will be of interest to students and scholars of Political Science, Political Sociology, South Asian Politics and Governance.

District Hospitals World Bank Publications

A number of national level examinations like IAS Mains, State PCS, IES, IFS, etc. check the English language aptitude of candidates with a compulsory English language paper. This book has been designed for such examinations which assess the English language abilities in detail. Governometrics and Technological Innovation for Public Policy Design and Precision Chandresh Agrawal

The objective of this book is to provide guidance for selecting the most appropriate options for safely managing solid waste generated at primary health care centres in developing countries. The main tool of this guide consists of six decision-trees aimed at assisting the user in identifying appropriate waste management methods. The guide takes into consideration the most relevant local conditions, the safety of workers and of the general public as well as of environmental criteria. This guide may also be used to evaluate existing practices related to health-care waste management. More detailed sources of information on handling and storage practices, technical options for treatment and disposal of wastes, training and personal protection, and assessment of a country's situation are also presented.

Basic Health Science S. Chand Publishing

The book discusses the concepts of E-Governance from the understanding of a naive user. While providing introduction to the concept, it shows the status of E-Governance in India through various measures, and its progress through different case studies. The historical development of E-Governance around the world and its rise in few developed and developing nations have also been discussed. The book also elaborates the establishment of E-Governance in India in detail and then compares the progress in Indian states through different measures and metrics. The structure of the E-Governance in India has been explained, including the explanation of the details related to National E-Governance Plan. The book is a combination of theoretical and practical concepts defined over various aspects of E-Governance in India. This book serves as the first stage reading material for any individual working in the Indian region on E-Governance.

The World Health Report 2005 Springer Nature

This book has been designed by combining the goodness of the original Wren & Martin text, High School Grammar & Composition, and specialized content developed by a panel of competitive examination experts in the area of the English language. The USP is therefore adapting a classical text to the needs of the various admission and recruitment competitive examination aspirants. Its exhaustive coverage ensures that virtually no competitive examination remains untouched. Students preparing for descriptive tests such as UPSC (Compulsory English and General English Papers of Main Exams) and state PCS examinations, Judicial Services examination, Indian Forest Service examination, Statistical Services and many other examinations in which subjective papers/tests are mandatory will find this book immensely useful. The book is also a boon for those students who are preparing for objective tests such as Banking and Insurance, SSC, UPSC preliminary, Defence Services, Law entrance, Business School entrance examinations, and many other admission and recruitment examinations. A unique feature of this book is demonstration of the

connectedness of the concepts and their applications visually, with the help of arrows and pointers. The aspirant will also find questions from recent examinations on virtually every page of the book. An index of examination-wise questions has been included so that the aspirant can choose the sections according to the targeted examination and focus more. Topic-wise distribution of questions in English examination papers - both descriptive and objective - will also help aspirants to undertake a very well directed test-prep program using the book.

The Medical Job Interview: Secrets for Success World Health Organization

40 pages Authors Kurian, Oommen C. Publication date 29 May 2015 Publisher Oxfam India Series Oxfam Working Papers Type Working paper This paper explores available evidence, contextualises and maps the debate in India around financing healthcare for all. While the focus is on healthcare in response to current policy debates, Oxfam India recognises the crucial importance of adopting a holistic approach to health, addressing factors such as nutrition and sanitation, and broader social determinants of health.
