Persuasion in Society Routledge

This fully-updated fourth edition introduces readers to the rich tapestry of persuasive technique and scholarship, interweaving perspectives from rhetoric, critical theory, and social science and applying their insights to practical political, social, and business contexts. This text examines current and classical theory through the lens of contemporary culture, encouraging readers to explore the nature of persuasion and to understand its impact in their lives. Employing a contemporary approach, it draws from popular culture, mass media, social media, advertising, political campaigns, and social movements to help readers become informed creators and consumers of persuasive messages. Case studies show how and why people fall for persuasive messages, demonstrating how persuasion works at a cognitive level. This new edition includes extended treatment of the ethics of persuasion, including opposing views on handling controversial issues in the college classroom; a new chapter on propaganda and ideology; and a greater focus on digital contexts and social media. Discussion questions, exercises, and key terms are provided for each chapter. This textbook will be a valuable tool for students of communication, media studies, politics, psychology, and business and advertising. Online resources for instructors include PowerPoint slides and test bank. *Logic and the Organization of Information* IGI Global Describes scales that may be used in organizational surveys. ' . . . I would recommend this book to any student of international employment relations. It approaches the subject from a wide and unusual angle and is rooted,

most importantly, in research.' - Len Holden, Asia Pacific Business Review
Historically, alternative models of the employment relationship have developed across culturally diverse nation states. However, the trend towards globalization incorporates a powerful force towards an international uniformity of employment relations. Underlying the issues addressed in this book is the question of how important cultural differences are and will continue to be.

Nursing Leadership and

Management Oxford University Press
 Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience. *Essentials of Management* concisely surveys current management theories and research. Through a variety

of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.

Hearings Springer Science & Business Media

This book introduces entrepreneurship as a concept that is popular in the general media but also in academic study. What is evident is due to its positive and negative connotations in society. This book identifies that it is important to debate the topic of entrepreneurship in order to understand its multi-faceted nature. This edited book includes a number of chapters that discuss multidimensional perspectives from an international perspective. This book emphasizes the geo-political frontiers related to entrepreneurship based on current debates, which includes recent global changes. This book also challenges the debatable as to whether entrepreneurship should be examined at the individual, firm, regional, or industry level. This book goes further to demonstrate that this depends on the type and nature of the study. Therefore, it is better to consider entrepreneurship in a multidimensional way that incorporates different levels of

analysis. This book shows each level of analysis that can be considered from a geo-political perspective. This means including an overview of the cultural factors that influence entrepreneurial behavior. In this way, this book helps readers to understand how and why geography and politics influence entrepreneurial action.
