timepiece. Drive Time is the first monograph of its kind to celebrate automotive-inspired watches. A stunning and thoughtfully curated collection of over 85

watches inspired by automobiles, motorcycles, racing and racers.

Informative, insightful and entertaining Drive Time is the perfect anthology for all manner of gear heads. *A Man & His Car* Editions Assouline

From the creation of its first writing implements in 1868 to today's position as the world's second largest producer of fine writing instruments, Cartier has beautifully combined technical innovation with creative audacity. This volume features a comprehensive

selection of pieces from Cartier's incredibly inventive repertoire-- pens, inkwells, mechanical pencils, calendars, stationary and other accessories-- dating from the middle of the 19th century to the present, weaving the story of Cartier's production as a joaillier into the broader fabric of the history of writing instruments and the famous clients who chose to use them. The historical pieces-- many of which are shown here for the first time-- are highly

sought after by collectors, and even those made during the last decade are commanding record prices in the salesrooms. The Baron de Rothschild, J. P. Morgan, Mona Bismarck, the Duke and Duchess of Windsor, and Rudyard Kipling are among the distinguished clients who wrote with magnificent pens and pencils made of gold or platinum, incorporating diamonds, jade, sapphires, emeralds, lacquer, mother-of-pearl, or ingenious timepieces and calendars. One-of-a-

kind pieces from New York, Paris and London are thoroughly documented and illustrated with photography specially commissioned for this book. The contemporary writing instruments featured here, from the famous Must to the recent Diabolo de Cartier demonstrate how the company's designers are using the company's long-standing traditions to remain at the forefront of imaginative pen and pencil design for the future. This eloquent

testimony to the ingenuity and craftsmanship of Cartier's designers and craftsmen will be essential to collectors of writing instruments and to all those interested in jewelry and the decorative arts.

Cartier - Time Art

Conran
Between the gold-embossed pages of this decadent and amusing volume, you'll find the wall-to-wall monogrammed carpeting, lacquered furniture, tinted glass, panther draperies and mirrors reflecting the

faces of celebrities that represented the era of the 1970s and 1980s at the height of its glory. Nineteen sixty eight. The year all certainties were shattered, it was in good taste to burn what one loved and to trample underfoot the values of yesterday. If, in this new world of dissent, luxury was no longer appropriate, the taste for beauty didn't completely disappear. No, luxury was not dead! It simply needed to be reinvented. In the midst of this new counterculture, which

burned all belongings and lived according to the flames of passion, Cartier enflamed hearts and luxury markets by creating a lighter that landed with the impact of a bomb--"Les Must" de Cartier saw the light of day. Existing somewhere between tradition and modernity, Cartier's lighters, pens, watches, glasses, jewelry, leather goods and perfume engulfed the world. Cartier justified luxury by offering a more perfect modernity. Protected by a panther-skin slipcase, this

limited-edition volume invites you to visit the delirious parties that announced every new "must. "The 1990s provided the opportunity to calmly reflect on the turbulent, effervescent and paradoxical years of the previous two decades. In perfect harmony with their time, Les Must had also played their part in history, creating a unique legend that would always be their own. They had participated fully in the luxury revolution that shifted away from decorative objects to

functional objects, from caste signifier to sign of the times. Indefatigable, Les Must had accompanied a whole generation of chic jet-setters in their peregrinations. Faithful companions of those who could not be discouraged from any excess, avid partygoers for whom "too much" was not in their vocabulary, Les Must had always been part of the decor. From Studio 54 in New York, where Mick Jagger, Jacqueline Bisset, Liza Minelli, Andy Warhol, Tina Chow and Halston hung out, to the Palace in

Paris, where the oh-so-chic promoters of a new dandyism were Yves Saint-Laurent, Loulou de La Falaise, Paloma Picasso, Gerard Garouste and Andree Putman. From Chez Castel to Chez Regine, where the bright young things gathered, everyone knew each other and dashed around the world on the Concorde. Paris and New York had never been closer to the great joy of this naturally cosmopolitan population, eager to shrink time and live several days, perhaps even several lives, in one

day. This book inside its panther slipcase is already a collector's item. "Les Must de Cartier has now become a legend, part of that mythology of the 1970s and '80s that saw the world reinvented by an ardent youth who wanted to believe in happiness."

From their forms to their movements, Cartier watches are unique. They are an enduring combination of the unexpected and the classical. This book chronicles Cartier's constant quest for excellence in the manufacture of complicated watches. From a Tortue single push-piece chronograph, created in 1929, to a

contemporary Santos 100 skeleton watch, Cartier interprets complications in its own inimitable way, always with a sense of design. Laziz Hamanis photographs capture these objects of exceptional technicity while author and expert Jack Forster shares the spirit that motivates each craftsman, engineer and artist to create the most stunning complicated watches.

Retro Watches Abrams Faithful to its pioneering spirit, Piaget, at the end of the 1950s, set about

designing and manufacturing the ultra-thin movements that would become one of the House's signatures and leave a lasting impression on the world of watchmaking. But Piaget was also a style: a marriage of gold and platinum, precious gems, and dials made of hard stones. Carried along the wave of extraordinary creativity that permeated the watch manufacturer in the 1970s, under the impetus of Yves G. Piaget, the brand's jewellery collection grew in an

original direction with an emphasis on colour. Always bold, the brand innovated by offering jewels in motion and collection of extravagant haute joaillerie. The great watchmaker Piaget has thus transformed itself into one of the most prestigious watchmaker-jewellers in the world. *The Old Money Book - 2nd Edition* Antique Collector's Club

- The first complete book dedicated to one of the most desirable chronographs of the 1960s, Chronomaster Aviator Sea Diver by NIVADA & CROTON
Chronomaster Aviator Sea Diver: this singular name belongs to one of the most original professional watches of the 1960s,

combining an unparalleled number of functions with a timeless design. Created in 1961, this chronograph was produced for around ten years under several brand names, through a partnership between the Swiss company NIVADA SA and the American firm CROTON WATCH CO. This led to some of its dials bearing probably the most complicated name in watchmaking history: CROTON NIVADA GRENCHEN Chronomaster Aviator Sea Diver. Thanks to the authors' trademark

rigorous methodology, the signature of the 'ONLY' reference works, this book reveals the incredible diversity of the Chronomaster models. It is intended both as an initiation for connoisseurs of exceptional watches and as a reference guide for collectors. This legendary watch will doubtless thus regain the place it deserves among the most desirable 1960s chronographs. Cartier: The Tank Watch
Laurence King Publishing
'The Wristwatch Handbook' provides the reader with a comprehensive anatomy of the mechanical wristwatch; every conceivable function and form. It is the foundational text for the novice and the reference book for the seasoned enthusiast.

Where other books about watches focus on advising the collector, on a single brand, or on a timeline of key historical figures and events, 'The Wristwatch Handbook' takes a detailed look at mechanical wristwatch complications (functions) and leaves no stone unturned. The reader will gain the ability to identify a complicated watch from twenty paces and perform a top-to-bottom assessment of even the most exotic timepiece in a matter of seconds. Despite the functional

obsolescence of the mechanical wristwatch (our phones, computers, even microwaves tell more accurate time), there are more varieties of mechanical watches available than ever before. Today, innovation is no longer exclusively preoccupied with accuracy; pioneer manufacturers are also exploring friction reduction, anti-magnetism, scratch resistance, dial decoration, exotic materials and so on.
