Benedict's Way DIANE Publishing

Foreword by Marcello Pera Written by Joseph Ratzinger shortly before he became Pope Benedict XVI. Christianity and the Crisis of Cultures looks at the growing conflict of cultures evident in the Western world. The West faces a deadly contradiction of its own making, he contends. Terrorism is on the rise. Technological advances of the West, employed by people who have cut themselves off from the moral wisdom of the past, threaten to abolish man (as C.S. Lewis put it)whether through genetic manipulation or physical annihilation. In short, the West is at war with itself. Its scientific outlook has brought material progress. The Enlightenment's appeal to reason has achieved a measure of freedom. But contrary to what many people suppose, both of these accomplishments depend on Judeo-Christian foundations, including the moral worldview that created Western culture. More than anything else, argues Joseph Ratzinger/Benedict XVI, the important contributions of the West are threatened today by an exaggerated scientific outlook and by moral relativism-what Benedict XVI calls "the dictatorship of relativism"-in the name of freedom. Christianity and the Crisis of Cultures is no mere tirade against the moral decline of the West. Razinger challenges the West to return to its roots by finding a place for God in modern culture. He argues that both Christian culture and the Enlightenment formed the West, and that both hold the keys to human life and freedom as well as to domination and destruction. Ratzinger challenges non-believer and believer alike. "Both parties," he writes, "must reflect on their own selves and be ready to accept correction." He challenges secularized, unbelieving people to open themselves to God as the ground of true rationality and freedom. He calls on believers to "make God credible in this world by means of the enlightened faith they live." Topics include: Reflections on the Cultures in Conflict Today The Significance and Limits of Today's Rationalistic Culture The Permanent Significance of the Christian Faith Why We Must Not Give Up the Fight The Law of the Jungle, the Rule of Law We Must Use Our Eyes! Faith and Everyday Life Can Agnosticism Be a Solution? The Natural Knowledge of God "Supernatural" Faith and Its Origins

The Rise of Western Christendom Penguin

A NEW YORK TIMES EDITORS' CHOICE • A gripping, behind-the-scenes portrait of the rise of Saudi Arabia's secretive and mercurial new ruler "Revelatory . . . a vivid portrait of how MBS has altered the kingdom during his half-decade of rule."—The Washington Post Finalist for the PEN/Jacqueline Bograd Weld Award • ONE OF THE BEST BOOKS OF THE YEAR: Financial Times, Foreign Affairs, Kirkus Reviews MBS is the untold story of how a mysterious young prince emerged from Saudi Arabia's sprawling royal family to overhaul the economy and society of the richest country in the Middle East—and gather as much power as possible into his own hands. Since his father, King Salman, ascended to the throne in 2015, Mohammed bin Salman has leveraged his influence to restructure the kingdom's economy, loosen its strict Islamic social codes, and confront its enemies around the region, especially Iran. That vision won him fans at home and on Wall Street, in Silicon Valley, in Hollywood, and at

the White House, where President Trump embraced the prince as a key player in his own vision for the Middle East. But over time, the sheen of the visionary young reformer has become tarnished, leaving many struggling to determine whether MBS is in fact a rising dictator whose inexperience and rash decisions are destabilizing the world's most volatile region. Based on years of reporting and hundreds of interviews, MBS reveals the machinations behind the kingdom's catastrophic military intervention in Yemen, the bizarre detention of princes and businessmen in the Riyadh Ritz-Carlton, and the shifting Saudi relationships with Israel and the United States. And finally, it sheds new light on the greatest scandal of the young autocrat's rise: the brutal killing of journalist Jamal Khashoggi by Saudi agents in Istanbul, a crime that shook Saudi Arabia's relationship with Washington and left the world wondering whether MBS could get away with murder. MBS is a riveting, eye-opening account of how the young prince has wielded vast powers to reshape his kingdom and the world around him. Praise for MBS "Saudi Arabia is testing the extremes of tradition and innovation, of half-baked visions and intensifying repression. Ben Hubbard's authoritative reporting on the inner sanctums of its society offers a perfect synthesis of journalism and area expertise: the best description we have at the moment of why things happen as they do in the kingdom."—Robert D. Kaplan, author of *The Return of Marco Polo's World*

Dare to Lead TAN Books

Living at a time of unprecedented upheaval and social chaos, Benedict of Nursia could not save the Roman Empire from collapse, but he did something more remarkable: he created Europe to take its place. It didn't happen overnight but instead over centuries. Benedict took the best that classical culture had to offer, combined it with Christianity, and came up with a very specific way to live in a world where chaos was the rule. The Rule of St. Benedict proposed in specific terms, down to the amount of beer a monk was allowed to drink, how to live in a world where the empire had failed. Benedict's Rule became, in Dawson's words, "the Roman standard of the monastic life and finally the universal type of Western monasticism." It brought order and classical coherence to the chaotic ethnic existence of the Germanic tribes, as well as the formation of new centers of culture in Ireland, Northumbria, and ultimately the Carolingian Empire. The Europe Benedict created is now facing another kind of threat. Europe has lost contact with its roots. The Enlightenment separates Europe's contemporary inhabitants from the man who made their culture possible. Cut off from his roots and disillusioned by one failed utopian experiment after another, European Man has contracted a spiritual disease whose clearest manifestation is his inability to reproduce. If this sickness is not cured within the the next generation, Europe will almost certainly reach the demographic tipping point and become a Muslim continent. The same is true of America. Cities like New York are fast on their way to losing their European character. And they are losing it for much the same reason: those of European descent are not having children. Benedict's vision of the small community is now more relevant than ever. At a time of American imperial over-extension and the threat of imminent collapse, at a time when "citizen" is a euphemism for taxpayer, or cannon fodder, or both, everyone needs a supportive community. At a time of demographic collapse, young people need to know that these small communities will support them so they can marry and raise families. When they fail to receive that assurance from the Church, the young simply fail to marry and have children, creating a sense of doom based on the feeling that there is no future. And they are right. Without children there is no future. Their fears have created a self-fulfilling prophecy. Cut off from Europe's Benedictine past, the Europeans and their American cousins also find themselves cut off from the future by their fear-driven refusal to have children. The Old English Rule of Saint Benedict CCEL

Americans are ruled by an unwritten constitution consisting of executive orders, signing statements, and other quasi-laws designed to reform society, Bruce Frohnen and George Carey argue. Consequently, the Constitution no longer means what it says to the people it is supposed to govern and the government no longer acts according to the rule of law.

The federal government wastes your tax dollars worse than a drunken sailor on shore leave. The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, *The Pig Book* proves one thing about Capitol Hill: pork is king!

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 500 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love.

Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

The Life of St. Benedict Penguin

The novel's protagonist is a British Roman Catholic priest, Father Percy Franklin, who looks identical to the mysterious U.S. Senator Julian Felsenburgh of Vermont. The senator appears as a lone and dramatic figure promising world peace in return for blind obedience. No one quite knows who he is or where he comes from, but his voice mesmerizes. Under his leadership, war is

abolished. Felsenburgh becomes the President of Europe, then of the world, by popular acclaim. Everyone is fascinated with him, yet still no one knows much about him. People are both riveted and frightened by the way he demands attention. Most follow without question. Having been a close observer of President Felsenburgh's rise, Father Franklin is called to Rome, a Hong Kong-style enclave ruled by Pope John XXVI and raised to the College of Cardinals. Meanwhile, defections among bishops and priests increase. At Cardinal Franklin's instigation, the pope abolishes the Eastern Catholic Churches and forms a new religious order, the Order of Christ Crucified. All its members, including the Pope, vow to die in the name of the faith.
