*The End of the End of the Earth*

Bloomsbury Publishing

The story of a notorious New York eccentric and the journalist who chronicled his life: “A little masterpiece of observation and storytelling” (Ian McEwan). Joseph Mitchell was a cornerstone of the *New Yorker* staff for

decades, but his prolific career was shattered by an extraordinary case of writer’s block. For the final thirty-two years of his life, Mitchell published nothing. And the key to his silence may lie in his last major work: the biography of a supposed Harvard grad turned Greenwich Village tramp named Joe Gould. Gould was, in Mitchell’s words, “an odd and penniless and unemployable little man who came to this city in 1916 and ducked and dodged and held on as hard as he could for over thirty-five years.” As Mitchell learns more about Gould’s epic Oral History—a reputedly nine-million-word collection of philosophizing, wanderings, and hearsay—he eventually uncovers a secret that adds even more intrigue to the

already unusual story of the local legend. Originally written as two separate pieces (“Professor Sea Gull” in 1942 and then “Joe Gould’s Secret” twenty-two years later), this magnum opus captures Mitchell at his peak. As the reader comes to understand Gould’s secret, Mitchell’s words become all the more haunting. This ebook features an illustrated biography of Joseph Mitchell including rare images from the author’s estate.

*A Pragmatic Approach* HarperCollins

For readers of Nathaniel Philbrick’s *Mayflower*, a groundbreaking history that makes the case for replacing Plymouth Rock with Jamestown as America’s founding myth. We all know the great American origin story: It begins with an

exodus. Fleeing religious persecution, the hardworking, pious Pilgrims thrived in the wilds of New England, where they built their fabled “shining city on a hill.” Legend goes that the colony in Jamestown was a false start, offering a cautionary tale of lazy louts hunted gold till they starved and shiftless settlers who had to be rescued by English food and the hard discipline of martial law. Neither story is true. In *Marooned*, Joseph Kelly re-examines the history of Jamestown and comes to a radically different and decidedly American interpretation of these first Virginians. In this gripping account of shipwrecks and mutiny in America's earliest settlements, Kelly argues that the colonists at Jamestown were literally and figuratively marooned, cut loose from civilization, and cast into the wilderness. The British caste system meant little on this frontier: those who wanted to survive had to learn to work and fight and intermingle with the nearby native populations. Ten years before the Mayflower Compact and decades before Hobbes and Locke, they invented the idea of government by the people. 150 years before Jefferson, the colonists discovered the truth that all men

were equal. The epic origin of America was not an exodus and a fledgling theocracy. It is a tale of shipwrecked castaways of all classes marooned in the wilderness fending for themselves in any way they could--a story that illuminates who we are as a nation today.

Students in first-year composition courses across the country discuss and write about touchy subjects like race, class, gender and religion. This book focuses on the latter, offering a pragmatic way of working with religious belief as a subject of study in the secular setting of the university classroom. Based on the work of American pragmatists like Charles Peirce, William James and John Dewey, this approach considers what religious belief does in the world--the tangible consequences of believing or not believing--and steers away from questions concerning God's existence or benevolence. Religion is viewed as a social and political force affecting human interaction. Drawing on years of experience teaching composition in Chile and the United States, the author explores real-world events such as Chile's 1973 coup d'etat, the resignation of Pope Benedict XVI, and the daily interplay of religious beliefs among family members. Reading and writing assignments--geared for believers and nonbelievers alike--are provided, including student essays that make various arguments about religion.

As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on "a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise" (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod,

strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.

The Little Norton Reader W. W. Norton  
 The Seagull Anton Pavlovich Chekhov - The best-selling official for Novel that everybody is looking for. The Seagull is a play by Russian dramatist Anton Chekhov, authored within 1895 as well as created in 1896. The Seagull is usually regarded as the first of his 4 major plays. It dramatizes the artistic and romantic conflicts between 4 characters: the popular middlebrow story writer Boris Trigorin, the ingenue Nina, the fading actress Irina Arkadina, as well as the son of her the symbolist

playwright Konstantin Treplyov. Though the character of Trigorin is regarded as Chekhov's best male role as Chekhov's other full-length plays, *The Seagull* is based in an ensemble cast of varied, completely developed characters. In distinctions to the melodrama of mainstream 19th-century theatre, lurid steps (such as Konstantin's suicide attempts) aren't shown onstage. Characters tend to talk in tactics that skirt around problems instead of addressing them directly; quite simply, their lines are full of what's known in remarkable practice as subtext. The opening night of the very first creation was a popular failure. Vera Komissarzhevskaya, taking part in Nina, was so unnerved through the hostility of this market that she lost voice. The audience was left by Chekhov and spent the previous 2 actions behind the scenes. When supporters published to him the generation, later on, grew to become successful, he assumed that these were simply attempting to be sort. When Konstantin Stanislavski, the seminal Russian theatre professional of the moment, directed it inside 1898 for the Moscow Art Theatre of his, the play would

have been a triumph. Stanislavski's creation became "one of probably the greatest incidents in the record of Russian theatre and among probably the greatest brand new advancements in the history of planet drama". Stanislavski's *The Seagull* was caused by direction to be perceived as a tragedy via overzealousness with the idea of subtext, while Chekhov intended it to become a comedy.

It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit

down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the

reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most

popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
