This book and all the other books in my beginner's series tell you about what really works in the real time live markets that can make you money every day when you are putting your capital to work. There is very little regulation in the trading/investing education industry; most people learn to trade completely wrong and unrealistically from someone who is good at sales and marketing and most of the time does not even trade in the live market. I get a lot of flak from the trading education industry for writing these books and telling brand new traders the right information they need to be successful right away. New traders are their own worst enemy when they first start out and the professionals in the live market know this and take complete advantage of their lack of knowledge and skill. Professionals are just looking to transfer the account of the brand new trader to their own, that's how they get paid. Don't be the one who pays be the one who gets paid! I am not selling any course, method or system. I don't have a magic indicator that tells you when to buy and sell. No green or red hopium pills here, just real money making information to help you to cut down the long learning curve there can be to leaning this business right. You either get it in this business or you don't, it's that simple. The beautiful thing about day trading the financial markets is that anyone can learn it and you can make money doing it, perhaps a lot of it! Make this book your first investment in your new trading business reference library.
