"Catharine A. MacKinnon, noted feminist and legal scholar, explores and develops her original theories and practical proposals on sexual politics and law. These discourses, originally delivered as speeches, have been brilliantly woven into a book that retains all the spontaneity and accessibility of a live presentation. Through these engaged works on issues such as rape, abortion, athletics, sexual harassment, and pornography, MacKinnon seeks feminism on its own terms, unconstrained by the limits of prior traditions. She argues that viewing gender as a matter of sameness and difference--as virtually all existing theory and law have done--covers up the reality of gender, which is a system of social hierarchy, an imposed inequality of power"--Back cover.

First published in 1984, this book examines corporate crime in the pharmaceutical industry. Based on extensive research, including interviews with 131 senior executives of pharmaceutical companies in the United States, the United Kingdom, Australia, Mexico and Guatemala, the book is a major study of white-collar crime. Written in the 1980s, it covers topics such as international bribery and corruption, fraud in the testing of drugs and criminal negligence in the unsafe manufacturing of drugs. The author considers the implications of his findings for a range of strategies to control corporate crime, nationally and internationally.

The opioid crisis in the United States has come about because of excessive use of these drugs for both legal and illicit purposes and unprecedented levels of consequent opioid use disorder (OUD). More than 2 million people in the United States are estimated to have OUD, which is caused by prolonged use of prescription opioids, heroin, or other illicit opioids. OUD is a life-threatening condition associated with a 20-fold greater risk of early death due to overdose, infectious diseases, trauma, and suicide. Mortality related to OUD continues to escalate as this public health crisis gathers momentum across the country, with opioid overdoses killing more than 47,000 people in 2017 in the United States. Efforts to date have made no real headway in

stemming this crisis, in large part because tools that already exist—like evidence-based medications—are not being deployed to maximum impact. To support the dissemination of accurate patient-focused information about treatments for addiction, and to help provide scientific solutions to the current opioid crisis, this report studies the evidence base on medication assisted treatment (MAT) for OUD. It examines available evidence on the range of parameters and circumstances in which MAT can be effectively delivered and identifies additional research needed.

Conflict in intimate relationships is as normal and essential as love. How you fight and resolve conflicts determines the difference between a sustained healthy and satisfying marriage or endless pain, frustration, and often divorce. At a time when families are falling apart at alarming rates and with enormous social cost, this book provides a research-based program to prevent relationship breakdown. The new audiotope set provides the key to the communication skills of PREPTM.

An engaging guide to excelling in today's venture capital arena Beginning in 2005, Brad Feld and Jason Mendelson, managing directors at Foundry Group, wrote a long series of blog posts describing all the parts of a typical venture capital Term Sheet: a document which outlines key financial and other terms of a proposed investment. Since this time, they've seen the series used as the basis for a number of college courses, and have been thanked by thousands of people who have used the information to gain a better understanding of the venture capital field. Drawn from the past work Feld and Mendelson have written about in their blog and augmented with newer material, *Venture Capital Financings* puts this discipline in perspective and lays out the strategies that allow entrepreneurs to excel in their start-up companies. Page by page, this book discusses all facets of the venture capital fundraising process. Along the way, Feld and Mendelson touch on everything from how valuations are set to what externalities venture capitalists face that factor into entrepreneurs' businesses. Includes a breakdown analysis of the mechanics of a Term Sheet and the tactics needed to negotiate

Details the different stages of the venture capital process, from starting a venture and seeing it through to the later stages Explores the entire venture capital ecosystem including those who invest in venture capitalist Contain standard documents that are used in these transactions Written by two highly regarded experts in the world of venture capital The venture capital arena is a complex and competitive place, but with this book as your guide, you'll discover what it takes to make your way through it. *ABA Journal* American Mathematical Soc.

The theory of topological modular forms is an intricate blend of classical algebraic modular forms and stable homotopy groups of spheres. The construction of this theory combines an algebro-geometric perspective on elliptic curves over finite fields with techniques from algebraic topology, particularly stable homotopy theory. It has applications to and connections with manifold topology, number theory, and string theory. This book provides a careful, accessible introduction to topological modular forms. After a brief history and an extended overview of the subject, the book proper commences with an exposition of classical aspects of elliptic cohomology, including background material on elliptic curves and modular forms, a description of the moduli stack of elliptic curves, an explanation of the exact functor theorem for constructing cohomology theories, and an exploration of sheaves in stable homotopy theory. There follows a treatment of more specialized topics, including localization of spectra, the deformation theory of formal groups, and Goerss-Hopkins obstruction theory for multiplicative structures on spectra. The book then proceeds to more advanced material, including discussions of the string orientation, the sheaf of spectra on the

moduli stack of elliptic curves, the homotopy of topological modular forms, and an extensive account of the construction of the spectrum of topological modular forms. The book concludes with the three original, pioneering and enormously influential manuscripts on the subject, by Hopkins, Miller, and Mahowald.

This is the first handbook focussing on classical social theory. It offers extensive discussions of debates, arguments, and discussions in classical theory and how they have informed contemporary sociological theory. The book pushes against the conventional classical theory pedagogy, which often focused on single theorists and their contributions, and looks at isolating themes capturing the essence of the interest of classical theorists that seem to have relevance to modern research questions and theoretical traditions. This book presents new approaches to thinking about theory in relationship to sociological methods.

Disease Control Priorities, Third Edition (Volume 6) Jossey-Bass

Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

Traditional corporation law (or entity law) no longer covers the challenges presented by today's multinational corporate integration and control. Now, Blumberg's ground-breaking analysis of the law of corporate groups (or enterprise law) brings current trends in business law into sharp focus, with detailed examination of thousands of cases. Every corporate lawyer must deal with state statutory issues, and this is the source to turn to for information and guidance. Blumberg provides expert, practical analysis of the statutes -- and their application -- in such areas as: Public utilities, banking, and Savings and Loan Associations following federal models -- Insurance Alcoholic beverages and gambling -- The vital topic of professional

responsibility in the representation of affiliated corporations is also covered here.
