Gamsberg MacMillan

Fundamental of Nuclear Engineering is derived from over 25 years of teaching undergraduate and graduate courses on nuclear engineering. The material has been extensively class tested and provides the most comprehensive textbook and reference on the fundamentals of nuclear engineering. It includes a broad range of important areas in the nuclear engineering field; nuclear and atomic theory; nuclear reactor physics, design, control/dynamics, safety and thermal-hydraulics; nuclear fuel engineering; and health physics/radiation protection. It also includes the latest information that is missing in traditional texts, such as space radiation. The aim of the book is to provide a source for upper level undergraduate and graduate students studying nuclear engineering.

Namibia Review Oxford University Press, USA

This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation, particularly in non-Western and non-English-speaking contexts (i.e., outside the UK, USA, Australia, NZ, etc.).
Medium Term Expenditure Framework Faculty of Education
University of Namibia

This book describes the Nyae Nyae Village Schools, an innovative and unique mother-tongue education initiative set in north-eastern Namibia. Inspired by the optimism of Independence, the project was designed in close consultation with the Ju| hoansi community in the early 1990s. Drawing upon their traditional

knowledge transmission strategies, and initiated in a supportive political environment, the project exemplified best practice. During the following two decades, the Village Schools have transitioned from a donor-supported project to government schools, and have received much attention and support from donors, civil society organisations, researchers, and others. However, the students still do not seem to succeed in the mainstream schools. Why is this? Based on long-term field-work in the region, including interviews with Nyae Nyae residents over several years and work with involved organisations, the book addresses this question. Contextualising the Village Schools within post-Independence Namibia, southern African history and the global indigenous rights movement, it examines the enormous paradoxes that schooling presents for the Nyae Nyae community. Owners of Learning is the English translation of the Ju| hoansi word for teacher and it serves to highlight a fundamental question to whom does education belong?
Debates of the National Assembly National and Regional Rank Order of Schools Democracy and Education in Namibia and Beyond

The Namibian constitution makes full provision for education as a fundamental human right and freedom. Three years into independence, as part of the government's educational policy, the 'Education for All Policy' was launched as a stepping stone to free quality education. However, inequities have become widely pronounced within the Namibian educational system. Democracy and Education in Namibia and beyond debates the education-democracy nexus in Namibia and the southern African context. It defines and explores the meaning of democracy and related concepts. It also looks at what democracy means in the context of human rights and access to education. The ten chapters in this collection interrogate the strengths and

limitations of education as an instrument of social change and question whether or not the Namibian educational objectives and practices do develop and help to sustain a democratic culture in Namibia. The authors in the collection have drawn material from their own teaching and research experience across the fields of education and social science in Namibia and beyond, and present their findings in a pedagogical framework suitable as a challenging text for tertiary students. At a time when education is in crisis, especially in South Africa where strident calls for free tertiary education and Africanisation of the curriculum are spreading like wildfire, this book gives scholarly insight into the history and social conditions that gave rise to our current predicament.

Second National Development Plan (NDP2).

2001/2002-2005/2006: Macroeconomic, sectoral, and cross-sectoral polices. 1, Chapters 1-22. 2, Chapters 23-47 Springer

This book focuses on Namibias education since independence. The book is developed around 40 articles reflecting the rich cross-section and multi-cultural diversit of interests, opinions, values, expectations and perspectives, and is held together by a common thread, of a shared national vision for Namibia, that knits - freedom, peace, unity, equity and progress into every economic activity forthe sustained well-being of all Namibians.

Minerals Yearbook African Books Collective

Consolidated Treaties & International Agreements is the only up-to-date publication available that offers the full-text coverage of all new U.S. treaties and international agreements. A unique and thorough indexing system, with indices appearing in each volume, provides readers with quick and easy access to treaties.

Improving Quality and Equity in Education in Namibia

University of Namibia Press

This is a policy Document which translates the Namibian philosophy on education into concrete and implementable government policies. It is detailed and comprehensive, thus covering all the important facets of education.

JSC Accounting IGI Global

With the need for sustainability, a focus on developing an economic system that aims at minimizing waste, commonly referred to as the circular economy, is emerging. Circular economy and studies related to it have gained worldwide attention, as it seems to be an effective alternative economic system. Naturally, the circular economy will impact enterprises and will shift how entrepreneurship development and entrepreneurial opportunities are perceived, developed, and resourced. The Handbook of Research on Entrepreneurship Development and Opportunities in Circular Economy is a collection of pioneering research that advances the understanding of entrepreneurship development, identifies the opportunities, and manages the entrepreneurship development, policies, and programs in order to further a circular economy. In addition to entrepreneurship development and entrepreneurial

opportunities, the book will cover and discuss a number of other factors necessary for a successful transformation, such as entrepreneurship and innovation, entrepreneurship and change, and entrepreneurship education. While highlighting topics including consumer consumption, knowledge management, and linear economics, this book is ideally designed for entrepreneurs, small business owners, managers, consultants, organization development specialists, policymakers, researchers, industry experts, academicians, and students.

Accumulative national and regional distribution on cut-off points
 BRILL

This book assesses the influence of the international organization UNESCO on the development of national Technical and Vocational Education and Training (TVET) systems in the Southern African Community Region (SADC), focusing particularly on Botswana and Namibia. Designed around UNESCO's Better Education for Africa's Rise (BEAR) project, the study is an excellent example of applied policy research. Analysis is from the perspective of key stakeholders including UNESCO headquarters and field offices, Ministries of Education and of Labor, employers and employees, education and training institutions, international partners and more. Both qualitative and quantitative evidence are used to

provide a comparative overview, and the author also reveals the current state of data on skills. Readers will discover common goals and challenges across the nations but also a common lack of action to measure the impact and influence that UNESCO's programs have had at a national level, prior to this study. Were the newly implemented educational policies successful or not? If the public policies failed, why was that? These chapters shed light on such questions and how UNESCO's contribution influenced the national development processes, in the context of globalization processes and trends of global mass education. The book has much to offer for both scholars and those working in UN agencies or national governments who seek to develop education systems and better link them to the world of work.
