Cornea Lippincott Williams & Wilkins

Although residents and pediatric ophthalmology fellows examine patients in the clinic, they may not be involved in surgery on the same patients and even less often get to follow the progress of these patients postoperatively. The Wills Eye Strabismus Surgery Handbook is designed to address this challenge in residency and fellowship education as a manual focused on developing surgical plans for strabismus patients. Drs. Leonard B. Nelson and Alex V. Levin and their contributors have organized The Wills Eye Strabismus Surgery Handbook to allow for the reader to take notes regarding their own diagnosis and treatment plan for each case that is presented. This workbook style and its practical, easy-to-read format make this resource useful for written and oral board preparation, and as a handy reference guide for use long after exams are over. Each chapter presents an introduction into the decision-making process for a specific strabismus condition, followed by the surgical plans selected by three expert

Wills Eye Strabismus Center strabismologists with regard to their approach to the presented case. Summary remarks by the chapter editor briefly review the basic concepts in developing a diagnosis and treatment plan while bringing together the varied opinions offered by the strabismologists in order to put them in context. Topics covered include: Strabismus surgery decision making Esotropia Exotropia Dissociated vertical deviation Cranial nerve palsies Strabismus syndromes Strabismus in systemic disease Reoperations Nystagmus Other complex strabismus cases The Wills Eye Strabismus Surgery Handbook is an essential resource for residents and pediatric ophthalmology fellows, as well as other ophthalmologists, looking to develop their surgical planning skills. It is a helpful field guide for any ophthalmologists who does strabismus and who is looking for a handy addition to their reference shelf.

PORTABLE, VISUAL, CONCISE, AFFORDABLE – A POWERFUL COMBINATION THE ULTIMATE RESOURCE FOR QUALITY EYE CARE
Neuro-ophthalmology McGraw Hill Professional

This text is part of the Color Atlas and Synopsis of Clinical Ophthalmology which was developed at Philadelphia's famed Wills Eye Institute. The beauty of this series is the powerful combination of illustrative photographs and a summary approach to the text. While the seven ophthalmic subspecialties in this series, Cornea, Retina, Glaucoma, Oculoplastics, Neuroophthalmology, Pediatrics, and Uveiti, employ varying levels of visual recognition, a relatively standard format for the text is used for all volumes. The goal of the series is to provide an up-to-date clinical overview of the major areas of ophthalmology for students, residents, and practitioners in all the healthcare professions. Oculoplastics, Second Edition, presents unmistakable guidelines for the differential diagnosis and treatment of the full range of oculoplastic conditions. This book is a unique combination of text, quick reference, and color atlas, with over 250 full color illustrations throughout. A short, succinct format includes: Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management.

The Wills Eye Strabismus Surgery Handbook McGraw Hill Professional

The significantly expanded second edition of this full-color atlas provides a step-by-step, visual guide to the most common

procedures in emergency medicine. Completely revised, it also includes new procedures such as REBOA, the HINTS test, sphenopalatine ganglion block, occipital nerve block, and lung ultrasonography. Procedures are described on a single page, or two-page spreads, so that the physician can quickly access and review the procedure at hand. The atlas contains more than 700 diagnostic algorithms, schematic diagrams, and photographic illustrations to highlight the breadth and depth of emergency medicine. Topics are logically arranged by anatomic location or by type of procedure, and all procedures are based on the most current and evidence-based practices. Atlas of Emergency Medicine Procedures, Second Edition is an essential resource for physicians and advanced practice professionals, residents, medical students, and nurses in emergency medicine, urgent care, and pediatrics.

The Massachusetts Eye and Ear Infirmary Illustrated Manual of Ophthalmology Mosby Incorporated

The updated Second Edition of this atlas is the definitive pictorial guide to differential diagnosis and treatment of virtually every presenting condition seen in ophthalmologic practice.
