A passionately urgent call for all of us to unlearn imperialism and repair the violent world we share, from one of our most compelling political theorists In this theoretical tour-de-force, renowned scholar Ariella Aïsha Azoulay calls on us to recognize the imperial foundations of knowledge and to refuse its strictures and its many violences. Azoulay argues that the institutions that make our world, from archives and museums to ideas of sovereignty and human rights to history itself, are all dependent on imperial modes of thinking. Imperialism has segmented populations into differentially governed groups, continually emphasized the possibility of progress while it tries to destroy what came before, and voraciously seeks out the new by sealing the past away in dusty archival boxes and the glass vitrines of museums. By practicing what she calls potential history, Azoulay argues that we can still refuse the original imperial violence that shattered communities, lives, and worlds, from native peoples in the Americas at the moment of conquest to the Congo ruled by Belgium's brutal King Léopold II, from dispossessed Palestinians in 1948 to displaced refugees in our own day. In *Potential History*, Azoulay travels alongside historical companions—an old Palestinian man who refused to leave his village in 1948, an anonymous woman in war-ravaged Berlin, looted objects and documents torn from their worlds and now housed in archives and museums—to chart the ways imperialism has sought to order time, space, and politics. Rather than looking for a new future,

Azoulay calls upon us to rewind history and unlearn our imperial rights, to continue to refuse imperial violence by making present what was invented as “past” and making the repair of torn worlds the substance of politics.

This book addresses the meanings and implications of multilingualism and its uses in a context of rapid changes, in Europe and around the world. All types of organisations, including the political institutions of the European Union, universities and private-sector companies must rise to the many challenges posed by operating in a multilingual environment. This requires them, in particular, to make the best use of speakers' very diverse linguistic repertoires. The contributions in this volume, which stem from the DYLAN research project financed by the European Commission as part of its Sixth Framework Programme, examine at close range how these repertoires develop, how they change and how actors adapt skilfully the use of their repertoires to different objectives and conditions. These different strategies are also examined in terms of their capacity to ensure efficient and fair communication in a multilingual Europe. Careful observation of actors' multilingual practices reveals finely tuned communicational strategies drawing on a wide range of different languages, including national languages, minority languages and lingue franche. Understanding these practices, their meaning and their implications, helps to show in what way and under what

conditions they are not merely a response to a problem, but an asset for political institutions, universities and business.

Archaeologies of the Contemporary Past turns what is usually seen as a method for investigating the distant past onto the present. In doing so, it reveals fresh ways of looking both at ourselves and modern society as well as the discipline of archaeology. This volume represents the most recent research in this area and examines a variety of contexts including: \* Art Deco \* landfills \* miner strikes \* college fraternities \* an abandoned council house.

This book is for the memory of John E. Reinecke, a man whose humanistic activism and sharp-hewn scholarship helped to shape the scientific study of pidgin and creole languages throughout much of the twentieth century. Reinecke was both a social reformer and a leading sociolinguistic researcher working with creole languages and societies that derive from diverse groups of people thrown into close social contact. Most notably, Reinecke's keen sense of social justice has had a telling effect on the social history of Hawaii. Along with his persistent efforts to obtain a fair

and equal share for wage earners in sharply stratified societies, his attention early became focused on their language. By encouraging others to study what he called "marginal languages," he was able to bring to them (and to the extraordinary issues—theoretical and practical—which they raise) a measure of prestige, both in the eyes of their speakers and in the increased attention accorded them by students of language and society. The book presents a description of Reinecke's life and work, the text of his own last paper on creolistics, and seventeen papers which reflect the range and vitality of the field that he did so much to open. Some of the papers reflect the issue which has come to dominate creole studies—the debate over the role of universals and of specific substrata as competing explanations of the amazing similarities that creoles, and perhaps pidgins also, exhibit across the world. Many describe the intense language contact within which language contraction and expansion occur (they do this either directly, or by supplying new data which will eventually feed such descriptions), and some are our belated response to calls which Reinecke made in the 1930s. Fifty years ago, he saw the need for the kind of comparative studies which are only now under way—in, for example, Hazel Carter's paper, which represents a pioneering attempt to compare the suprasegmentals of English-based Creoles on both sides of the Atlantic. In his last years, Reinecke strongly supported research on contact languages with non-European lexical bases. He thought this was the area from which future creole studies would derive the greatest theoretical and practical gain, and in this volume six papers answer his call by analyzing such pidgins and creoles.

Drawing on two and a half years of field work, Victor Turner offers two thorough ethnographic studies of Ndembu revelatory ritual and divinatory techniques, with running commentaries on symbolism by a variety of Ndembu informants. Although previously published, these essays have not been readily available since their appearance more than a dozen years ago. Striking a personal note in a new introductory chapter, Professor Turner acknowledges his indebtedness to Ndembu ritualists for alerting him to the theoretical relevance of symbolic action in understanding human societies. He believes that ritual symbols, like botanists' stains, enable us to detect and trace the movement

of social processes and relationships that often lie below the level of direct observation.

"The lectures of M. Victor Cousin possess an interest seldom to be met with in philosophical publications. It is certain that philosophical views and doctrines are no longer regarded, on the continent of Europe, merely as subjects of literary curiosity or of elegant entertainment. For it is well known that they excite strong emotions of sympathy and approbation, and are listened to and read with that attention and respect which is the most satisfactory evidence of a powerful conviction of their rationality and truth, by a very numerous class of intelligent and well informed young men, who may be fairly considered to represent the flower of the rising generation in their respective countries. Philosophical lectures therefore assume, on this account, an importance which is in a great measure independent of the opinions which we ourselves may form of the truth or fallacy of their contents. For although we may consider the principles which determine our own perceptions of truth, and the foundations upon which our own convictions rest, so firmly established as to be unwilling to submit them to any further discussion or examination; yet most men naturally desire to understand the spirit and to know the principles of truth, by which the public opinion of contiguous nations is influenced, and may probably be ruled, at no very distant period. Nothing therefore that is likely to influence public opinion in France can be indifferent to the people of the United States. For if contiguity can be predicated of the spirit of different nations, as well as of their local position in space, the French nation may, in the first sense of the word, be said to be nearer neighbors to the inhabitants of America, than to those of Great Britain; and besides this, the high rank among civilized nations, which is held by France, as well as the powerful influence which the spirit of France is well known to exert on the state of public opinion throughout Europe, must necessarily render the peculiar qualities and character of that spirit at any particular epoch the source of incalculable good or evil to all contemporary nations"—Preface. *Migrating Music* considers the issues around music and cosmopolitanism in new ways. Whilst much of the existing literature on 'world music' questions the apparently world-disclosing nature of this genre - but says relatively little about migration and mobility - diaspora studies have much to say about the latter, yet little about the significance of music. In this context, this book affirms the centrality of music as a mode of translation and cosmopolitan mediation, whilst also pointing out the complexity of the processes at stake within it. *Migrating music*, it argues, represents perhaps the most salient mode of performance of otherness to mutual others, and as such its significance in socio-cultural change rivals - and even exceeds - literature, film, and other language and image-based cultural forms. This book will serve as a valuable reference tool for undergraduate and postgraduate students with research interests in cultural studies, sociology of culture, music, globalization, migration, and human geography.

*Figures of the Thinkable* Routledge

This volume offers a critical re-examination of colonial and anti-colonial resistance imageries and practices in imperial history. It offers a fresh critique of both pejorative and celebratory readings of 'insurgent peoples', and it seeks to revitalize the study of 'resistance' as an analytical field in the comparative history of Western colonialisms. It explores how to read and (de)code these issues in archival documents - and how to conjugate documental approaches with oral history, indigenous memories, and international histories of empire. The topics explored include runaway slaves and slave rebellions, mutiny and banditry, memories and practices of guerrilla and liberation, diplomatic negotiations and cross-border confrontations, theft, collaboration, and even the subversive effects of nature in colonial projects of

labor exploitation.

How do ordinary people identify themselves as part of a group? By what means do they express a largely unspoken understanding of themselves in society? This special issue on new social imaginaries examines the emergent forms of solidarity and collective identity in a global context. The essays explore how local cultural forms and global social movements contribute to the making and unmaking of imagined collective identities.

Contributors to this collection include major voices in the fields of philosophy, critical literature, sociology, anthropology, and communication studies. The articles consider how people conceive of and categorize themselves as part of a cohesive group under the multiple rubrics of the public and counterpublic, nation, ethnos, civilization, genealogy, democracy, and the market. Many of the essays are situated in specific national and cultural sites such as Africa, Australia, eighteenth-century England, the European Union, India, and Turkey. Others examine the intersections of global financial markets and democratic institutions. As a whole, *New Imaginaries* suggests a new way of synthesizing economic, political, and cultural approaches to social life. Contributors. This is an extremely wide-ranging and interdisciplinary survey of colonization from its origins to the post-colonial world. Original and lively, it offers the student: \* a wide focus featuring Africa, America, Asia, Australia, Europe, Japan and the USSR \* an interpretation drawn from cultural and social history, with sections on myth, literature, film and philosophy \* constant reference to implications for the present world situation \* a comprehensive synthesis of the background, context and expansion of colonization \* a comparative thematic discussion of the impact of imperialism \* extensive coverage and analysis of decolonization. Very simply, a key publication for the study of colonization.

" . . . useful, timely, and important . . . a good and informative book on the Lusophone countries, Portuguese colonialism, and postcolonial influences." —Phyllis Martin, Indiana University "This book, produced by the obvious—and distinguished—corps of country specialists . . . fills a real gap in both state-level and 'regional' (broadly defined) studies of contemporary Africa." —Norrie MacQueen, University of Dundee Although the five Portuguese-speaking countries in Africa that gained independence in 1974/75—Angola, Mozambique, Guinea-Bissau, Cape Verde, and São Tomé e Príncipe—differ from each other in many ways, they share a history of Portuguese rule going back to the 15th century, which has left a mark to this day. Patrick Chabal and his co-authors assess the nature of the Portuguese legacy,

using a twofold approach. In Part I, three analytical, thematic chapters by Chabal examine what the five countries have in common and how they differ from the rest of Africa. In Part II, individual chapters by leading specialists, each devoted to a specific country, survey the histories of those countries since independence. The book places the postcolonial experience of the Lusophone countries within the context of their precolonial and colonial past and compares and contrasts their experience with that of non-Lusophone African states. The result is a comprehensive, readable, and up-to-date text and reference work on the evolution of postcolonial Portuguese-speaking Africa.
