One of the prime purposes of accounting is to communicate and yet, to date, this fundamental aspect of the discipline has received relatively little attention. The Routledge Companion to Accounting Communication represents the first collection of contributions to focus on the power of communication in accounting. The chapters have a shared aim of addressing the misconception that accounting is a purely technical, number-based discipline by highlighting the use of narrative, visual and technological methods to communicate accounting information. The contents comprise a mixture of reflective overview, stinging critique, technological exposition, clinical analysis and practical advice on topical areas of interest such as: The miscommunication that preceded the global financial crisis The failure of sustainability reporting The development of XBRL How to cut clutter With an international coterie of contributors, including a communication theorist, a Big Four practitioner and accounting academics, this volume provides an eclectic array of expert analysis and reflection. The contributors reveal how accounting communications represent, or misrepresent, the financial affairs of entities, thus presenting a state-of-the-art assessment on each of the main facets of this important topic. As such, this book will be of interest to a wide range of readers, including: postgraduate students in management and accounting; established researchers in the fields of both accounting and communications; and accounting practitioners.

Today we imagine green business to be a new thing. This book shows that it is not, and that there were green entrepreneurs who had huge concerns about environmental sustainability, and built businesses that they hoped could address these issues, including Whole Foods Market, Aveda, and The Body Shop, among others.

A S Watson Group (ASW), its health and beauty retail arm commonly known as 'Watsons' in Asia,

traces its humble beginnings back to a matshed colonial apothecary shop called the Hong Kong Dispensary (the 'Dispensary') when it was set up back in 1841. This book unlocks the secrets and transformations of ASW from a colonial chemist to the number three global player in health and beauty retailing. How was ASW able to pull through each and every global or national crisis it faced in the 180 years to emerge more robust and vibrant? In Part One of this book, Patrick vividly describes Watson's globalization journey over the past 180 years. He details how Watsons survived the waves of social unrest, civil wars, global financial turmoil, political crisis, and pandemics that confronted the world. One of the most exciting developments in this history took place from 1999 to 2006 when ASW achieved quantum leaps and consolidated its position as a leading global drug store chain under Wade's leadership. In Part Two of this book, Patrick analyzes the corporate management practices of Watson. He articulates Andrew Chi-Fai Chan's 'Left-and-Right Circles' theory behind Ian Wade's branding strategy. He further draws upon Wade's other 'Prosperity Strategies' in parallel with the '4+2' Formula' advocated by Nitin Nohria et al. Over the past fourteen years, the global market has undergone tremendous changes in China, Asia, and Europe. And with it, ASW has undertaken a pragmatic growth approach to dodge the headwinds of the subprime mortgage crisis, the Eurozone crisis, China-US decoupling, Brexit, and the recent COVID-19 pandemic.

Originally published in 1999 The Commercial Use of Biodiversity examines how biodiversity and the genetic material it contains are now as valuable resources. Access to genetic resources and their commercial development involve a wide range of parties such as conservation and research institutes, local communities, government agencies and companies. Equitable partnerships are not only crucial to conservation and economic development but are also in the interests of business and often required by law. In this authoritative and comprehensive volume, the authors explain the

provisions of the Convention on Biological Diversity on access and benefit-sharing, the effect of national laws to implement these, and aspects of typical contracts for the transfer of materials. They provide a unique sector-by-sector analysis of how genetic resources are used, the scientific, technological and regulatory trends and the different markets in Pharmaceuticals, Botanical Medicines, Crop Development, Horticulture, Crop Protection, Biotechnology (in fields other than healthcare and agriculture) and Personal Care and Cosmetics Products. This will be an essential sourcebook for all those in the commercial chain, from raw material collection to product discovery, development and marketing, for governments and policy-makers drafting laws on access and for all the institutions, communities and individuals involved in the conservation, use, study and commercialisation of genetic resources.

*Annual Report of the Department of Health, Education, and Welfare to the Congress on Training Activities Under the Manpower Development and Training Act* City of London College of Economics With the rapidly growing importance of sustainability and corporate responsibility in a globalised world, management schools are increasingly integrating long-term economic, environmental and social issues into their teaching and research. Climate change, poverty, labour standards and human rights are among the many topics that future decision-makers will need to face in their careers. Business education needs to reflect this new reality and provide a broadened understanding of value creation in order to create economic capital while developing social and preserving natural capital. Many sustainability trends also offer interesting new business opportunities that are ripe for entrepreneurial thinking. Case studies can be important tools for creating learning processes on different levels - students are forced to struggle with exactly the kinds of decisions and dilemmas managers confront every day. In this reflection of reality, the values and goals of the student are systematically challenged. This can be especially valuable in the context of sustainability and strategy - organisations are now continually forced to value the different aspects of sustainability and their interrelations: How do social issues impact the economic bottom line? How can an environmentally sound strategy create a positive impact on employee motivation and thus have measurable impact on economic performance? What comes first and why? But excellent case studies for management education in the field of sustainability management and strategy are rare. This innovative collection has been produced to fill this gap. It

is based on the winning cases of an annual competition organised by oikos - the international Student Organization for Sustainable Economics and Management. So what makes an excellent case in sustainability management? These cases have been highly praised because they provide excellent learning opportunities, tell engaging stories, deal with recent situations, include quotations from key actors, are thought-provoking and controversial, require decision-making and provide clear take-aways. These cases explore both the opportunities and pitfalls companies and NGOs face in targeting sustainability issues and how their values and core assumptions impact their business strategies. They deal with a myriad of issues including supply chain management, stakeholder dialogue, social entrepreneurship, sustainable marketing, ethics, governance, the business case for sustainability, partnerships, purchasing and climate change. Case Studies in Sustainability Management and Strategy is an essential purchase for educators and is likely to be a widely used as a course textbook at all levels of management education. Online Teaching Notes to accompany each chapter are available on request with the purchase of the book.
