Abgrall, a practicing psychiatrist and professional criminologist who won a case against the Scientologists in Europe, has spent 15 years researching cult phenomena. Well organized and readable. This book is recommended for public and academic libraries. <i>The Origin of the Land Grant Act of 1862 (the So-called Morrill Act) and Some Account of Its Author, Jonathan B. Turner</i> Springer Nature	
In October 1873, as every Conference Report recalls, the Associ ation for the Reform and Codification of the Law of Nations was founded in Brussels (Belgium). At the Brussels Conference of 1895 the Association's name was changed and ever since it has been "The International Law Association". On August 30 and 31 and September 1, 1973, a Centenary Cele bration will be held in the Association's place of birth. In the course of preparations made for this triduum, plans were also laid by the Executive Council for a Centenary Volume to mark the event. The formula adopted for the book was mostly based on contributions by Chairmen and/or Rapporteurs of International Committees of the Association who were asked to shed light on "the present state" of their subject. Hence the title of the Volume. For good measure, vari ous other topics not coming under the terms of reference of Inter national Committees were added. Almost all of the authors invited responded favourably, and their studies are to be found in Part II, arranged in sections which have no other justification than the Editor's whim. It should be pointed out that Chairmen and/or Rapporteurs of International Committees wrote their articles a titre personnel and, therefore, cannot be deemed to express opinions held by their Com mittees as such. Part I contains the "other essays", dealing with the Association itself rather than with the present state of international law.	
<b>The Origin of the Land Grant Act of 1862</b> Springer	
In October 1994, fifty-three members of the Order of the Solar Temple in Switzerland and Québec were murdered or committed suicide. This incident and two later group suicides in subsequent years played a pivotal role in inflaming the cult controversy in Europe, influencing the public to support harsher actions against non-traditional religions. Despite the importance of the Order of the Solar Temple, there are relatively few studies published in English. This book brings together the best scholarship on the Solar Temple including newly commissioned pieces from leading scholars, a selection of Solar Temple documents, and important previously published articles newly edited for inclusion within this book. This is the first book-length study of the Order of the Solar Temple to be published in English.

Les marchés fonciers urbains et périurbains des villes d’Afrique de l’Ouest en expansion rapide opèrent dans des contextes où coexistent des régimes fonciers différents et où les procédures d’accès aux terrains sont complexes. Un cadre d’analyse faisant défaut jusqu’ici, ce livre propose une approche systémique et l'applique à la zone urbaine et périurbaine de Bamako et à son hinterland rural. La méthode repose sur une analyse des différentes filières d’approvisionnement en terres et identifie, depuis la mise en circulation des terres agricoles pour répondre aux besoins en terrains à usage résidentiel, les changements de tenure et types de transactions qui accompagnent le passage aux terrains urbains, ainsi que les interactions entre les différentes filières. L'analyse montre que l’approvisionnement en terre est à l’origine assurée par la filière coutumière, qui prédomine dans les zones périurbaines, et par la filière publique et parapublique où l’État alloue des terrains à usage d’habitation aux individus ou les cède à des sociétés de promotion foncière et immobilières. Ces filières alimentent la filière privée formelle qui met ensuite sur le marché, à des prix élevés, des parcelles viabilisées avec titre de propriété. Les parcelles peuvent être cédées successivement, avec un degré d’informalité qui dépend de la tenure, de la légalité de la transaction et de son enregistrement. Alors que le développement du marché formel est entravé par des facteurs structurels, le marché foncier informel offre peu de sécurité. Adapté aux revenus moyens et bas, le marché informel attire aussi les acheteurs aisés et introduits auprès de l’administration et du pouvoir politique, et qui peuvent plus facilement obtenir une formalisation de la tenure. Prix des terrains et coûts de transaction élevés, conflits fonciers, procédures de formalisation longues et complexes, et diversité des acteurs se combinent dès lors pour entraver l’accès au foncier des pauvres en milieu urbain.

Harp uses the familiar figure of Bibendum and the promotional campaigns designed around him to analyze the cultural assumptions of "belle-epoque" France, including representations of gender, race and class. He also considers Michelin's efforts to promote automobile tourism in France and Europe through its famous "Red Guide" (first introduced in 1900), noting that, in the aftermath of World War I, the company sold tour guides to the battlefields of the Western Front and favourably positioned France's participation in the war as purely defensive and unavoidable. Throughout this period, the company successfully identified the name of Michelin with many aspects of French society, from cuisine and local culture to nationalism and colonialism.

This study of new religious movements in Quebec focuses on nine groups—including the notoriously violent Solar Temple; the iconoclastic Temple of Priapus; and the various “Catholic” schisms, such as those led by a mystical pope; the Holy Spirit incarnate; or the reappearance of the Virgin Mary. Eleven contributing authors offer rich ethnographies and sociological insights on new spiritual groups that highlight the quintessential features of Quebec’s new religions (“sectes” in the francophone media). The editors argue that Quebec provides a favorable “ecology” for alternative spirituality, and explore the influences behind this situation: the rapid decline of the Catholic Church after Vatican II; the “Quiet Revolution,” a utopian faith in Science; the 1975 Charter of Human Rights and Freedoms; and an open immigration that welcomes diverse faiths. The themes of Quebec nationalism found in prophetic writings that fuel apocalyptic ferment are explored by the editors who find in these sectarian communities echoes of Quebec’s larger Sovereignty movement.

Modular Forms is a graduate student-level introduction to the classical theory of modular forms and computations involving modular forms, including modular functions and the theory of Hecke operators. It also includes applications of modular forms to various subjects, such as the theory of quadratic forms, the proof of Fermat's Last Theorem and the approximation of π. The text gives a balanced overview of both the theoretical and computational sides of its subject, allowing a variety of courses to be taught from it.This second edition has been revised and updated. New material on the future of modular forms as well as a chapter about longer-form projects for students has also been added.
