The Risky Business of French Feminism Hachette Jeunesse Uncle Quentin and Aunt Fanny are away on holiday, and the Five are left with their friendly cook Joan, for a peaceful holiday at Kirrin Cottage. What with endless days of bathing and good food ahead, the Five are extremely happy and relaxed, but a Robbery

which has involved the culprit making off with one of Uncle Quentin's Scientific notebooks, cuts short their blissfully inactive days of the Summer holidays. How has the thief entered the house, and did the 'face at the window' which Anne earlier sighted, have anything to do with the mystery? Suddenly the household find themselves being closely watched.--Brief Summary by Poppy Hutchinson. Ragamuffin Jo could have been George's double--it was astonishing how much alike they were. And Jo had a way with dogs, too. She was fearless, and could climb like a cat, which was lucky when it came to making a quick get-away from Red Tower. The Five certainly met adventure when they met Jo on Kirrin beach.

Despite having the highest rates of cannabis use in the continent, France enforces the most repressive laws against the drug in all of Europe. Perhaps surprisingly, France was once the epicentre of a global movement to medicalize cannabis, specifically hashish, in the treatment of disease. In *Taming Cannabis* David Guba examines how nineteenth-century French authorities routinely

blamed hashish consumption, especially among Muslim North Africans, for behaviour deemed violent and threatening to the social order. This association of hashish with violence became the primary impetus for French pharmacists and physicians to tame the drug and deploy it in the homeopathic treatment of mental illness and epidemic disease during the 1830s and 1840s. Initially heralded as a wonder drug capable of curing insanity, cholera, and the plague, hashish was deemed ineffective against these diseases and fell out of repute by the middle 1850s. The association between hashish and Muslim violence, however, remained and became codified in French colonial medicine and law by the 1860s: authorities framed hashish as a significant cause of mental illness, violence, and anti-state resistance among indigenous Algerians. As the French government looks to reform the nation's drug laws to address the rise in drug-related incarceration and the growing popular demand for cannabis legalization, *Taming Cannabis* provides a timely and fascinating exploration of the largely untold and living history of cannabis in colonial France.

Famous Five: Five Fall Into Adventure Wildside Press LLC

In this landmark, character-driven history, Greg Behrman tells the story of the Marshall Plan, the unprecedented and audacious policy through which America helped rebuild World War II-ravaged Western Europe. With nuanced, vivid prose, Behrman recreates the story of a unique American enterprise that was at once strategic, altruistic and stunningly effective, and of a time when America stood as a beacon of generosity and moral leadership. When World War II ended in Europe, the continent lay in tatters. Tens of millions of people had been killed. Ancient cities had been demolished. The economic, financial and commercial foundations of Europe were in shambles. Western

Europe's Communist parties -- feeding off people's want and despair -- were flourishing as, to the east, Stalin's Soviet Union emerged as the sole superpower on the continent. The Marshall Plan was a four-year, \$13 billion (more than \$100 billion in today's dollars) plan to provide assistance for Europe's economic recovery. More than an aid program, it sought to modernize Western Europe's economies and launch them on a path to prosperity and integration; to restore Western Europe's faith in democracy and capitalism; to enmesh the region firmly in a Western economic association and eventually a military alliance. It was the linchpin of America's strategy to meet the Soviet threat. It helped to trigger the Cold War and, eventually, to win it. Through detailed and exhaustive research, Behrman brings this vital and dramatic epoch to life and animates the personalities that shaped it. The narrative follows the six extraordinary American statesmen -- George Marshall, Will Clayton, Arthur

Vandenberg, Richard Bissell, Paul Hoffman and W. Averell Harriman -- who devised and implemented the Plan, as well as some of the century's most important personalities -- Winston Churchill, Josef Stalin, Joseph McCarthy -- who are also central players in the drama told here. More than a humanitarian endeavor, the Marshall Plan was one of the most effective foreign policies in all of American history, in large part because, as Behrman writes, it was born and executed in a time when American "foreign policy was defined by its national interests and the very best of ideals."
