## ALLEN MYA

The Ruling Class Edward Elgar Publishing

This widely praised work provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. The expanded edition includes an all-new chapter that addresses the practical issues of applying these ideals in actual, real-life situations. "The New Public Service, Expanded Edition" is organized around a set of seven core principles: serve citizens, not customers; seek the public interest; value citizenship and public service above entrepreneurship; think strategically, act democratically; recognize that accountability isn't simple; serve, rather than steer; and value people, not just productivity. The book asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important and meaningful about public service and considers how we might better live up to those ideals and values. All students and serious practitioners in public administration and public policy should read this book. While debates about public policy issues will surely continue, this compact, clearly written volume provides an important framework for public service based on and fully integrated with citizen discourse and the public interest.

The Political System. An Inquiry Into the State of Political Science  
World Bank Publications

The 14th century Javanese epic poem, Sutasoma, relates the life of a prince, born an incarnation of the Jina-Buddha Wairocana. It follows his spiritual journey to enlightenment and his temporal journey through marriage, kingship and eventual victory over the mighty, world-threatening demon, Porusada. Kate O'Brien's new translation delivers to the reader a highly approachable and lively rendition of this Buddhist epic, comparable in both complexity and scale to that of the Ramayana, yet significantly less known or understood.

**Sound Governance** Routledge

"Law in Modern Society" is a comparative study of the place of law in societies as well as a criticism of social theory. Under what conditions do different kinds of law emerge? What are the bases of the rule of law ideal that marks advanced liberal, capitalist

societies? What can the study of law teach us about social hierarchy and moral vision in these societies, and, indeed, about the specificity of Western civilization? Why do we find it necessary to struggle for the rule of law and impossible to achieve it? What political possibilities are closed or opened by present-day changes in the established styles of legality and legal thought? Unger deals with these questions in a broad range of historical settings. But he also relates them to the central issues of social theory: the method of explanation, the conditions of social order, and the nature of 'modern' society. the book argues that to resolve its own internal dilemmas the science of society must once again become both metaphysical and political.

Indonesia needs significant additional infrastructure investment to sustain its economic growth. However, the COVID-19 pandemic

has further limited the fiscal space of the government. This report proposes a new method to increase infrastructure investment based on the concept of value capture. The report studies how Indonesia's existing policies and regulations can be used to build a value capture framework that ensures the maximization of the social, economic, and environmental value of infrastructure investments. The framework focuses on strategies to deliver infrastructure projects that create greater value and, at the same time, generate funding for up-front investment.

*An Introduction to Politics* Syracuse University Press

This handbook provides a general description of the different models of political finance regulations and analyses the relationship between party funding and effective democracy. The most important part of the book is an extensive matrix on political

finance laws and regulations for about 100 countries. Public funding regulations, ceilings on campaign expenditure, bans on foreign donations and enforcing an agency are some of the issues covered in the study. Includes regional studies and discusses how political funding can affect women and men differently, and the delicate issue of monitoring, control and enforcement of political finance laws.

The economic, political, and cultural forces of globalization affect every citizen of the world—and the institutions that govern them. Against a backdrop of increasing resistance to these forces, especially in the developing world, this volume establishes a new theoretical and practical framework for analyzing the effects of globalization on nation-states, local governments, nongovernmental and international organizations, and other administrative systems. Invoking a term attributed to Darius the Great over 2,500 years ago—sound governance—editors Ali Farazmand and Rosalyn Carter set the stage for a rich and multidimensional collection of essays on emerging issues in public administration around the world. Topics include: The impact and influence of the United Nations; Ethics and accountability in government; Applying the total quality management model to public sector institutions; Judicial and legislative reforms; Business-government partnerships and improvements in the delivery of public services. The result is a comprehensive study of innovations in public administration that will serve as an essential resource for students, researchers, policymakers, and practitioners alike.

Decentralization is sweeping the world and having dramatic and far-reaching impacts on resource management and livelihoods, particularly in forestry. This book is the most up-to-date examination of the themes, experiences and lessons learned from decentralization worldwide. Drawing on research and support from all of the major international forestry and conservation organizations, the book provides a balanced account that covers the impact of decentralization on resource management worldwide, and provides comparative global insights with wide implications for policy, management, conservation and resource use and planning. Topics covered include forest governance in federal systems, democratic decentralization of forests and natural resources, paths and pitfalls in decentralization and biodiversity conservation in decentralized forests. The book provides in-depth case studies of decentralization from Bolivia, Ghana, Indonesia, Russia, Scotland, Switzerland, Uganda and the US, as well as highlights from federal countries including Australia, Brazil, Canada, India and Malaysia. It also addresses the critical links between the state, forests, communities and power relations in a range of regions and circumstances, and provides case examples of how decentralization has been viewed and experienced by communities in Guatemala, Philippines and Zimbabwe. The Politics of Decentralization is state-of-the-art

coverage of decentralization and is essential for practitioners, academics and policy-makers across forestry and the full spectrum of natural resource management.

*A Textbook of Jurisprudence* Cornell University Press

The last two years have seen a huge amount of academic, policy-making and media interest in the increasingly contentious issue of land grabbing - the large-scale acquisition of land in the global South. It is a phenomenon against which locals seem defenceless, and one about which multilateral organizations, such as the World Bank, as well as civil-society organizations and action NGOs have become increasingly vocal. This in-depth and empirically diverse volume - taking in case studies from across Africa, Asia and Latin America - takes a step back from the hype to explore a number of key questions: Does the 'global land grab' actually exist? If so, what is new about it? And what, beyond the immediately visible dynamics and practices, are the real problems? A comprehensive and much-needed intervention on one of the most hotly contested but little-understood issues facing countries of the South today.

Indonesia terletak di persimpangan tiga lempeng benua ketiganya bertemu di sini menciptakan tekanan sangat besar pada lapisan kulit bumi. Akibatnya, lapisan kulit bumi di wilayah ini terdesak ke atas, membentuk paparan-paparan yang luas dan beberapa pegunungan yang sangat tinggi. Seluruh wilayah ini sangat rentan terhadap gempa bumi hebat dan letusan gunung berapi dahsyat yang kerap mengakibatkan kerusakan parah. Hal ini terlihat dari beberapa catatan geologis. Gempa bumi dan

tsunami mengerikan yang dialami Aceh belum lama ini hanyalah episode terakhir dari seluruh rangkaian peristiwa panjang dalam masa prasejarah dan sejarah. (Aryso Santos, 2010).
