Universal basic income (UBI) is emerging as one of the most hotly debated issues in development and social protection policy. But what are the features of UBI? What is it meant to achieve? How do we know, and what don't we know, about its performance? What does it take to implement it in practice? Drawing from global evidence, literature, and survey data, this volume provides a framework to elucidate issues and trade-offs in UBI with a view to help inform choices around its appropriateness and feasibility in different contexts. Specifically, the book examines how UBI differs from or complements other social assistance programs in

terms of objectives, coverage, incidence, adequacy, incentives, effects on poverty and inequality, financing, political economy, and implementation. It also reviews past and current country experiences, surveys the full range of existing policy proposals, provides original results from micro+tax benefit simulations, and sets out a range of considerations around the analytics and practice of UBI.

India has a long-standing tradition of dispute resolution through arbitration, with arbitral-type regulations going back to the eighteenth century. Today, amendments to the 1996 Indian Arbitration Act, a steady evolution of case law and new arbitral institutions position India's vibrant system once more at the forefront

of international commercial dispute resolution. In this handbook, over forty members of the international arbitration community in India and beyond offer authoritative perspectives and insights into topics on arbitration that matter in India. International arbitration practitioners, Indian practitioners, and scholars have combined efforts to produce a practical and informative guide on the subject. Among numerous notable features, the contributors provide detailed analysis and description of such aspects of arbitration as the following, with a focus on the Indian context: Indian application of the 1958 New York Convention; law governing the merits of the dispute and awards; investor-state dispute settlement; drafting arbitration clauses for

India-centric agreements; managing costs and time; rise of virtual arbitration and technology; effect of public policy in light of extensive Indian jurisprudence; and arbitration of claims relating to environmental damage. Practical features include checklists for drafting arbitration clauses and a comparative chart of major commercial arbitration rules applicable to India. Also included is a comparative analysis of arbitral regimes in India, Singapore and England; chapters on the India Model Bilateral Investment Treaty and ISDS reforms; a special section on the enforcement of foreign awards; a section on the drafting of the award guided by leading arbitrators and stakeholders and a review of the new 2021 ICC Rules. For foreign counsel and arbitrators with arbitrations in India, this complete and up-to-date analysis provides guidelines for practitioners, corporate counsel, and judges on considerations to be borne in mind with respect to arbitration with an Indian nexus and whilst seeking

enforcement and execution of an arbitral award in India. It will prove an effective tool for students and others in understanding and navigating the particularities and peculiarities of India's system of domestic and international commercial arbitration.

The Ministry of Finance, Government of India established a High Powered Expert Committee in 2006 to study the feasibility of India's entry into the global market for international financial services and that of Mumbai becoming an international financial center. The Committee's report analyses Mumbai's strengths and weaknesses in terms of the above seven key factors essential for the success of an IFC. The report strives to deliver a nuanced appreciation of the likely costs and benefits of the path to an IFC, based on an understanding of which policy-makers can make a reasoned choice.

INTERVIEW with SUBRATA ROY EVERYTHING YOU WANTED TO KNOW ABOUT SUBRATA ROY AND SAHARA INDIA PARIWAR, BUT WERE AFRAID TO ASK... Sahara: The Untold Story is based on painstaking research to demystify India's most secretive and largely unlisted conglomerate, the Sahara India Pariwar. It also delves into the group's ongoing legal battle with the market regulator. Entrepreneur Subrata Roy, the guardian angel of the group, whose feet are touched by everybody in the Pariwar,

wants to reach out to a million lives and feels impeded and shuttered in by regulations. So the clash with the regulators was inevitable. But when a regulator slams one door, maverick Roy opens another. This play has been on since 1978, when Sahara was set up. Roy is well known for glamour and his association with film stars, cricketers and politicians. He exudes patriotism, with a statue of Bharat Mata (the presiding deity of the group) on a chariot driven by four fierce-looking lions adorning his headquarters in Lucknow. He is the Robin Hood of a country where only 35% of the adult population has access to formal banking services. This India and its millions of illiterate poor depositors stand in awe and admiration of him. But does he also exploit them? Do these poor people actually keep money with him or are they fronting for others? EXCERPT FROM THE SAHARA INDIA PARIWAR DISCLAIMER 'The book at best can be treated as a perspective of the author with all its defamatory content, insinuation and other objections, which prompted us to exercise our right to approach the court of law in order to

save the interest of the organization and its crores of depositors and 12 lakh workers.' TamalBandyopadhyay, a deputy managing editor of Mint, is one of the most respected business journalists in India. Tamal has kept a close watch of the financial sector for over a decade and a half and has had a ringside view of the enormous changes in Indian finance and banking over this period. His first book, A Bank for the Buck, released by P Chidambaram in November 2012, has been a non-fiction bestseller. *CURRENT AFFAIRS -GK* Trafford on Demand Pub Digital technologies are spreading rapidly, but digital dividends--the broader benefits of faster growth, more jobs, and better services--are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China--one third of them women--can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And if India can provide unique digital identification to 1

billion people in five years, and thereby reduce corruption by billions of dollars, why can't other countries replicate its success? Indeed, what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver? Two main reasons. First, nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way. Second, and more important, the benefits of digital technologies can be offset by growing risks. Startups can disrupt incumbents, but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms. Employment opportunities may be greater, but not when the labor market is polarized. The internet can be a platform for universal empowerment, but not when it becomes a tool for state control and elite capture. The World Development Report 2016 shows that while the digital revolution has forged ahead, its 'analog complements'--the regulations that promote entry and competition, the skills that enable

workers to access and then leverage the new economy, and the institutions that are accountable to citizens-- have not kept pace. And when these analog complements to digital investments are absent, the development impact can be disappointing. What, then, should countries do? They should formulate digital development strategies that are much broader than current information and communication technology (ICT) strategies. They should create a policy and institutional environment for technology that fosters the greatest benefits. In short, they need to build a strong analog foundation to deliver digital dividends to everyone, everywhere. **Sahara SAGE India 2020 - A Reference Annual** is a comprehensive digest of the country's progress in different fields. The book deals with all aspects of development - from rural to urban, industry to infrastructure, science and technology to art and culture, economy, health, defence to education and mass communication. The sections on general knowledge, current affairs, sports and important events, are a

must read for comprehensive understanding of these fields. *The Republic of India* Butterworth-Heinemann Banking on Self-help Groups reviews the existing state of affairs in respect of the SHG (Self-help Group) movement and addresses the question of what should be the next phase of development of the SHGs. It identifies the policy gaps and opportunities that exist for the SHGs to be mainstreamed further into the formal financial system. The author examines elements of strategy and design being adopted by the National Rural Livelihoods Mission as also the potential role of NABARD in the development of SHGs in the future. The study focuses on three core issues pertaining to SHGs. These relate to (i) cost-effectiveness, (ii) sustainability, and (iii) impact, i.e., the development cost of SHGs and SHG-based institutions, the sustainability of SHG models and community institutions fostered by them, and the economic and social impact on SHG members. The book concludes with a discussion of proposals

and institutional arrangements that provide the way forward for the continued and uninterrupted growth of SHGs as an agency for change in the rural sector of India.

 Fixtures--the component or assembly that holds a part undergoing machining--must be designed to fit the shape of that part and the type of machining being done. This book discusses the fundamentals of Computer-Aided Fixture Design (CAFD) techniques and covers fixture planning, fixture design (both modular and dedicated fixtures), fixture design verifications, and the overall integration with CAD/CAM. The book shows how CAFD may lead to a significant reduction of product and process development time and production cost, and how CAFD can increase quality assurance through simulation and science-based technical specification and cost estimation in business quoting, especially in current supplier-based manufacturing. It also

provides case study examples. This book provides a total solution of CAFD, including planning, design, and design verification

 The coronavirus disease (COVID-19) pandemic disrupted both supply and demand sides of an interconnected world economy in 2020. Asia and the Pacific was not immune as lockdowns and travel and trade

restrictions affected nearly all aspects of cross-border economic activity. This publication examines the initial impact on trade, investment, finance, and people's mobility across the region as the pandemic struck. It looks at how regional economies individually or collectively respond to the crisis by, for example, leveraging rapid technological progress and digitalization as well as increasing services trade to reconnect and recover. The theme chapter focuses on digital platforms and how they can accelerate digital transformation across the region.

 This book is primarily designed for students preparing for various competitive examinations. It will also be helpful for those preparing for midterm exams in schools or universities. The aim of this book is twofold: first, to help the students preparing for competitive examinations, seeking admission to universities or schools, or pre-prepare for job interviews. Second, it will also be helpful for those studying CURRENT AFFAIRS-GK. This book

contains more than 2675 questions from the core areas of CURRENT AFFAIRS-GK. The questions are grouped chapter-wise. There are total 2 chapters, 0 sections and 2675+ MCQ with answers. This reference book provides a single source for multiple choice questions and answers in CURRENT AFFAIRS-GK. It is intended for students as well as for developers and researchers in the field. This book is highly useful for faculties and students. One can use this book as a study guide, knowledge test questions bank, practice test kit, quiz book, trivia questions . . . etc. The strategy used in this book is the same as that which mothers and grandmothers have been using for ages to induce kids in the family to sip more soup (or some other nutritious drink). The children are told that some cherries (their favourite noodles or cherries) are hidden somewhere in the bowl, and that serves as an incentive for drinking the soup. In joint families, by the time the children are old enough to know the trick played by their grandma, there is usually another group of kids ready to fall for it! They

excite the kids, but the real nutrition lies not in the noodles but in the soup. The problems given in this book are like those noodles/cherries while solving all these problems are nutritious soup. Now it is your choice to drink the nutritious soups or not!!!. *Mumbai - An International Financial Centre* Organisation for Economic Co-operation and Development ; [Washington, D.C. : sold by OECD Publications Center] While handing over the first set of 12-digit unique identification numbers to ten tribal families of Tembhli, a dusty village tucked away in a far corner of Maharashtra, the then Prime Minister Manmohan Singh said, 'UID will help hundreds of people in India, whose pride was hurt for so many years because of the lack of an identity. This will be their source of recognition from now on'. The Aadhaar scheme, since its inception, has been operating without parliamentary approval and, thus, the Supreme Court of India held that Aadhaar cannot be made mandatory for availing public services in India. This book, therefore, is an attempt to understand how Aadhaar will make

India's poor free. Fifteen chapters describe the evolution of different schemes of the Indian government that have sought to provide identification, enrolment to and functioning of Aadhaar, and the legal framework involved in the process. This book is an in-depth analysis of this unique and controversial programme in India. Das maintains that while the Aadhaar programme's contribution in the implementation of PDS, MGNREGS, education, and public health can only be modest, it will be in a position to create a platform for greater financial inclusion of the poor.

**Reproductive and Developmental Toxicology** Asian Development Bank Mechanical Engineer's Data Handbook provides a comprehensive yet concise set of information relevant in the practice of mechanical engineering. The book is comprised of eight chapters that cover the main disciplines of mechanical engineering. The text first details the strengths of materials, and then proceeds to discussing applied mechanics. Next, the book talks about thermodynamics and fluid

mechanics. The fifth chapter presents manufacturing technology, which includes cutting tools, metal forming processes, and soldering and brazing. The next two chapters deal with engineering materials and measurements, respectively. The last chapter of the text presents general data, such as units, symbols, and fasteners. The book will be most useful to students and practitioners of mechanical engineering.
