ELSA SYDNEE

101 Projects for Your Porsche Boxster

Crowood Press (UK)

The full story of the Classic Quattros from Audi, the first car to combine performance and four-wheel drive in a commercially successful package. Its success in rallying during the 1980s ensured good publicity and healthy sales. Since then the Audi range has had a quattro variant for every model, and they continue to be leaders in their field.

Fast Ladies Evro Publishing Limited
FIAT in Motorsport is an in-depth look at Fiat's historical and prestigious involvement in all forms of motorsport from the earliest days of racing right up to the present day. The achievements of the cars and drivers are described in detail, along with many original photographs, sourced from the official Fiat archives. In the early days, before the First World War, Fiat was a major contender in Grand Prix racing, and employed many of the leading drivers of the era. Although it withdrew from Grand Prix racing in 1927, Fiat cars were still to be seen participating in high-profile races, such as the Mille Miglia. In these events most Fiat models were sports editions of the highly successful 'Balilla' range. In 1952 the introduction of the sensational 8V coupé resulted in many racing successes in private owners' hands, while the late 1950s saw the introduction of 'Formula Junior' class of racing and Fiat-engined cars were very successful in the early years. In the 1970s, Abarth, then owned by Fiat, successfully ran the rally team, which resulted in three World Championships. Speed record attempts over the years are also detailed in this fascinating history of Fiat's sporting achievements.

Audi Quattro McKlein Distribution

The Group B cars marked one of the most thrilling yet most tragic periods in the history of world rallying and beyond. The 037, the S4, the EVC and the ECV2, "ephemeral player" of a still-born Group S, were the unforgettable protagonists of the 1982-1986 seasons that for the Lancia marque were constellated by a series of

World, European and Italian titles, but also by terrible accidents that cost the lives of Attilio Bettega, Henri Toivonen and Sergio Cresto. Sergio Remondino, a historic journalist and great expert in the multifaceted field of rallying, traces that unforgettable era, year by year, through a text rich in anecdotes and thanks to the contribution of the engineer Sergio Limone, one of the artificers of the Group B cars. This invaluable book is completed by the evocative images of Reinhard Klein, one of the most successful rallying photographers.

More than 120 years of motorsport: stories, triumphs and tragedies, sensational innovations, rapid progress, and grandiose dead ends. The History of Motorsport gives a gripping and informative rundown of the colourful world of motor racing, with its trailblazing technical developments and its greatest series and races. The book begins with the first Grand Prix in motor-racing history, and takes readers on a journey through the decades all the way to FIA Formula E. Along the way they will encounter cars like Michael Schumacher's 'red goddess', the Red Bull of Sebastian Vettel, and its Formula 1 forefathers from Alfa Romeo, Ferrari, Lotus, and Brabham, the likes of the Lancia Stratos and Delta Integrale, Audi Sport Quattro, Citroën WRC, and the VW Race Touareg for the Dakar rally. Touring cars through to Mike Rockenfeller's Schaeffler-Audi RS5 also take their place of honour here. The choice of vehicles has been made to ensure all important races and racing series are included. Extensive statistics complete this comprehensive book.

It took a great deal of determination on the part of women to sweep aside male resistance from the inner circles of the motoring world. A veritable saga with a wealth of illustrations spanning almost a century of motor racing. Over forty unique portraits of daring, brave women who took part in speed records events, rallies and Grand Prix races.

Audi Quattro Giorgio NADA Editore

At Audi, they are fond of recalling how a pre-production quattro left all rear-wheel-drive sedans behind on an incline in wintry Austria - with summer tires! In fact, the well-known Audi slogan Vorsprung durch Technik (Progress through Technology) has seldom been put into practice as tangibly as with the presentation of permanent all-wheel drive in the Audi quattro, which established this drive

variant as one of the first in production vehicle manufacturing. And it was not only on snow-covered mountain passes that the four driven wheels played out their advantages: They were safer and, above all, faster on all kinds of surfaces. There are numerous special features that make this brand-defining sports coupe stand out: the five-cylinder in-line engine made for a husky voice, the digital displays installed in the interior from 1982 onward gave it a futuristic look, and the angular body design with its distinctive twin headlights had a high recognition factor. Anyone who drove a quattro stood out. This successful package was crowned by the successes of the sports version: Walter Röhrl's victory in the 1984 Monte Carlo Rally and the record-breaking drive in the 1987 Pikes Peak Hillclimb cemented the nimbus of the sporty all-purpose weapon. Forty years after its unveiling at the 1980 Geneva Motor Show, the Audi quattro now receives its well-deserved tribute in a comprehensive monograph written by brand connoisseur, Audi driver, and noted automotive journalist Dirk-Michael Conradt. This 400 page, heavily illustrated book offers a complete chronology of the Urquattro from prototype to final model, and includes technical data and production figures. The illustrations include numerous previously unpublished images from the Audi factory archive.

An English Car Designer Abroad is the humorous and personal account of a life spent working on the design of some of the world's best known cars. Commencing his career as a designer at Vauxhall Motors, Luton in 1973, Peter Birtwhistle then left the UK in 1977 to take a position abroad, at Audi in Germany, where he lived for the rest of his working life. From Audi, his career took him to Porsche in Stuttgart, and eventually, in 1988, to the Japanese company Mazda, with whom he would help develop a Design Centre close to Frankfurt, eventually becoming Chief Designer for Mazda Motor Europe. During his career, Birtwhistle was involved in the design of some very significant cars and in his work and travels, crossed the paths of many significant personalities from the car industry. Car design has changed enormously since the time he commenced his career, and for Birtwhistle it was clear, his story needed to be documented before it was lost in time. Featuring original photographs and illustrations from the author's own collection, this highly humorous and very personal story creates a fascinating collage of anecdotes and historical facts, not only from the secretive world of car design, but also his private

life.

Peugeot 205 T16 Group B Rally Car Enthusiast's Manual Delius Klasing Verlag Gmbh

Almost all makers of four-wheel drive motor vehicles have benefitted from the work of Harry Ferguson Research and Ferguson Formula Developments Ltd. Even Land Rover, Jeep, and Audi have come to FF Developments for their expertise. Traction for Sale is the story of the Ferguson Formula four-wheel drive system in all automotive fields.

Ford Escort RS Cosworth & World Rally Car Veloce Publishing Ltd

"A fast-paced, high-interest introduction to rally cars, modified race cars known for their teams of drivers and use in multi-stage rally races. Also included is a biographical story about rally driver Michele Mouton"--

Audi Quattro Delius Klasing

The Peugeot 205 T16 is the legendary Group B turbocharged four-wheel-drive rally car produced by Peugeot between 1984 and 1986. Between 1984 and 1986, 205 T16s won 16 World Championship rallies in the hands of Ari Vatanen, Timo Salonen, Juha Kankkunen and Bruno Saby, and lifted both the manufacturers' and drivers' titles in 1985 and 1986 in the hands of Timon Salonen and Juha Kankkunen, respectively, against strong opposition from Audi, Lancia, Ford and Austin-Rover. The car was used to extraordinary effect by Peugeot as a marketing tool for the 205 road car, and the project lifted Peugeot to become a mainstream manufacturer to rival the established brands worldwide. The original 205 T16 appeared on the rally stages in 1984, while the revised 'E2' was introduced partway through 1985. The 'E2' incorporated various revisions raising power output to 550bhp. After the cancellation of Group B at the end of 1986, Peugeot modified three 205 T16 cars to compete in the famous Pikes Peak Hillclimb, and later cars were modified to compete in the Paris-Dakar rally, winning in 1987 and 1988. The car also formed the basis of the '405 T16', which won the Paris-Daker for Peugeot in 1989 and 1990. Today, the appearance of 205 T16s is always eagerly anticipated at historic rally events, and motorsport retrospectives such as the Goodwood Festival of Speed. Peugeot 205 T16 Group B Rally Car Enthusiast's Manual chronicles the design, anatomy and operation of the 205 T16, with input from many of the drivers and engineers involved.

McRae Delius Klasing Verlag Gmbh

The Audi Quattro was the world's first successful four-wheel-drive rally car. It

brought new standards to the sport, and inspired many others to copy it. This is the complete story.

Race and Rally Car Source Book Haynes Publications

It would be a mistake to think that only Volkswagen's Beetle has captured the imagination of the motoring public. The Transporter -- or VW Bus -- was designed to incorporate many of the Beetle's tried-and-true features in a capable and roomy commercial vehicle. What was a purely utilitarian transport in the 1950s and '60s has become an icon of the '90s, as owners rebuild tired Transporters for a new generation. Author Meredith charts the full history of the transporter from 1949 to the present.

Audi a History of Progress Delius Klasing Verlag Gmbh

The original rally Quattro debuted in 1980, and was based on the road car, but with a highly tuned 300bhp engine. In 1981, Audi Quattro works driver Michele Mouton became the first woman to win a World Championship rally. The Quattro took the Manufacturers' Championship in 1982 and 1984, and the Drivers' Championship in 1983 and 1984 with Hannu Mikkola and Stig Blomqvist respectively. Audi implemented a continuous development programme for the Quattro, and the A1 and A2 were produced to meet the Group B regulations introduced in 1983, while the fearsome Sport Quattro S1 was introduced in 1984. The ultimate development - the S1 E2 - was introduced at the end of 1985, producing over 500bhp, and winning the 1985 San Remo rally in the hands of Walter Röhrl and the famous Pikes Peak hillclimb with Michele Mouton. The Audi Quattro Rally Car Manual looks at the design, evolution, anatomy and operation of the Quattro.

The History of Motorsport Haynes Publishing UK

"This book, published on the quattro's 40th anniversary ... explores 25 years of factory-prepared and factory-supported quattros in motorsport"--Page 4 of cover

Touring Car Racing Haynes Publishing UK

Little Book of the Audi Quattro is a 128-page hardback book written by Stan Fowler and Charlotte Morgan. Developed using four wheel drive technology, the Audi quattro stands out as one of the most revolutionary sports cars ever built. From its debut in the 1980s, the quattro was set to steal the show and it went on to do just that both on and off road. Today, it is a much loved classic with fans and quattro enthusiasts the world over. Originally, Audi had intended to produce just 400 quattros to be used in rally driving, but in the end, nearly 11,500 vehicles were built for a

hungry export market. The car was unveiled at the Geneva Motor Show in March 1980 and as the first four-wheel drive grand tourer since 1966 it caused a

sensation. The car became one of the most significant rally cars of all time when it was one of the first to take advantage of the changed rules in competition racing allowing a four-wheel drive to participate.

Critics were sceptical that a four-wheel drive could achieve as near as much momentum, power and versatility. They were to be proved wrong.
