How to heal the psychological wounds of an abused child? How can we restore security to a neglected child? How can we help a child and his parents create an emotional bond? How can an adopted child reconcile his or her successive lives? Confronted with parents who are unaffectionate, depressive, absent or excluded, a child can become withdrawn, panic-stricken by fear of abandonment, violent or unable to express him/herself in

words or actions. In France, over 300,000 children are under protective care. Dr. Daniel Rousseau, who has worked in a nursery run by the French child welfare agency (Aide sociale à l'enfance), uses case studies to explain how these abused children invent solutions to survive and grow up, sometimes even without their parents. A child psychiatrist for 25 years, Dr Daniel Rousseau has been working at the Maine-et-Loire children's home for 20 years. He has received three awards from the Fondation pour la Recherche Médicale, the Fondation de France and the Observatoire National de l'Enfance en Danger for his research on children in the Aide Sociale à l'Enfance system.

A trick of magic, a twist of fate. As the orphaned nephew of the king, trusted companion to his cousin, and second heir to the throne of Skala, Prince Tobin's future is clear. But not as clear as the spring in which a hill witch shows him his true face--and his secret destiny.... Now Tobin carries a burden he cannot share with even his closest friend, Ki, his squire. He is to rule--not as he is but as he was born: a woman. Given the shape of a boy by dark magic, Tobin is the last hope of the people of Illior--those who desperately seek a return to the old ways, when Skala was ruled by a line of warrior queens. They still believe that only a woman can lift the war, famine, and pestilence that have run rampant through the land since the king usurped his half sister's throne. It is these outlaw wizards and witches who protect Tobin--and it is for them that Tobin must accept his fate. With the unsuspecting yet fiercely loyal Ki at his side, Tobin must turn traitor against the only blood ties he has left. He must lift the masks of Skala's rulers to show their true colors--before he can reveal the power of the woman within himself.

This volume presents research from an international, interdisciplinary, and intersectoral research project in which 15 doctoral researchers explored a range of issues related to the life-course experiences of children born of war in 20th-century conflicts. Children Born of War (CBOW), children fathered by foreign soldiers and born to local mothers during and after armed conflicts, have long been neglected in the research of the social consequences of war. Based on research projects completed under the auspices of the Horizon2020-funded international and interdisciplinary research and training network CHIBOW (www.chibow.org), this book examines the psychological and social impact of war on these children. It focusses on three separate but interrelated themes: firstly, it explores methodological and ethical issues related to research with war-affected populations in general and children born of war in particular. Secondly, it presents innovative historical research focussing specifically on geopolitical areas that have hitherto been unexplored; and thirdly, it addresses, from a psychological

and psychiatric perspective, the challenges faced by children born of war in post-conflict communities, including stigmatisation, discrimination, within the significant context of identity formation when faced with contested memories of volatile post-war experiences. The book offers an insight into the social consequences of war for those children associated with the 'enemy' by virtue of their direct biological link.

"A stunningly atmospheric fantasy that doubles as an exceptional character study . . . we can't wait to see where Dabos takes it next." —Entertainment Weekly ("The 10 Best YA Books of 2018")
One of Publishers Weekly's Best YA Books of the Year A National Indie Bestseller Lose yourself in the fantastic world of the arks and in the company of unforgettable characters in this French runaway hit, Christelle Dabos' *The Mirror Visitor* quartet. Plain-spoken, headstrong Ophelia cares little about appearances. Her ability to read the past of objects is unmatched in all of *Anima* and, what's more, she possesses the ability to travel through mirrors, a skill passed down to her from previous generations. Her idyllic life is disrupted, however, when she is promised in marriage to Thorn, a taciturn and influential member of a distant clan. Ophelia must leave all she knows behind and follow her fiancé to Citaceleste, the capital of a cold, icy ark known as the Pole, where danger lurks around every corner and nobody can be trusted. There, in the presence of her inscrutable future husband, Ophelia slowly realizes that she is a pawn in a political game that will have far-reaching ramifications not only for her but for her entire world. *The World of the Arks* Long ago, following a cataclysm called the Rupture, the world was shattered into many

floating celestial islands, now known as arks. Over each, the spirit of an omnipotent and immortal ancestor abides. The inhabitants of these arks each possess a unique power. Ophelia, with her ability to read the pasts of objects, must navigate this fantastic, disjointed, perilous world using her trademark tenacity and quiet strength.

Histories of Sexology: Between Science and Politics takes an interdisciplinary and reflexive approach to the historiography of sexology. Drawing on an intellectual history perspective informed by recent developments in science and technology studies and political history of science, this book examines specific social, cultural, intellectual, scientific and political contexts that have given shape to theories of sexuality, but also to practices in medicine, psychology, education and sexology. Furthermore, it explores various ways that theories of sexuality have both informed and been produced by sexologies—as scientific and clinical discourses about sex—in Western countries since the 19th century.

Comment soigner les blessures psychiques d'un enfant maltraité ? Comment redonner de la sécurité à un enfant délaissé ?

Comment aider un enfant et ses parents à créer un lien affectif ? Comment un enfant adopté peut-il conjuguer ses vies successives ? Confronté à des parents incapables d'affection, dépressifs, absents ou exclus, l'enfant peut en arriver à se replier sur lui-même, à manifester une peur panique de l'abandon, à être violent ou à ne plus pouvoir s'exprimer ni par les mots, ni par les gestes. En France, plus de 300 000 enfants bénéficient d'une mesure de protection. Le Dr Daniel Rousseau, fort de son expérience dans une pouponnière de l'Aide sociale à l'enfance, nous explique à travers des cas concrets comment ces enfants malmenés inventent des solutions pour survivre et grandir, parfois même sans leurs parents. Pédopsychiatre depuis 25 ans, le Dr Daniel Rousseau intervient au foyer de l'enfance du Maine-et-Loire depuis 20 ans. Il a été triple lauréat de la Fondation pour la recherche médicale, de la Fondation de France et de l'Observatoire national de l'enfance en danger pour ses travaux de recherche sur les enfants de l'Aide sociale à l'enfance.

Emile is a treatise on the nature of education and on the nature of man written by Jean-Jacques Rousseau, who considered it to be the "best and most important of all my writings". Due to a section of the book entitled "Profession of Faith of the Savoyard Vicar," Emile was banned in Paris and Geneva and was publicly burned in 1762, the year of its first publication. During the French Revolution, Emile served as the inspiration for what became a new national system of education. The work tackles fundamental political and philosophical questions about the relationship between the individual and society— how, in particular, the

individual might retain what Rousseau saw as innate human goodness while remaining part of a corrupting collectivity. Its opening sentence: "Everything is good as it leaves the hands of the Author of things; everything degenerates in the hands of man." Rousseau seeks to describe a system of education that would enable the natural man he identifies in *The Social Contract* to survive corrupt society. He employs the novelistic device of Emile and his tutor to illustrate how such an ideal citizen might be educated. Emile is scarcely a detailed parenting guide but it does contain some specific advice on raising children.[5] It is regarded by some as the first philosophy of education in Western culture to have a serious claim to completeness

Neversuch House is home to the very unusual Halibut family. Spanning generations, the Halibuts all live together totally isolated from the outside world, never needing - or wanting - to step outside the walls of Neversuch, with every whim being catered for by a mass of servants. But when twelve-year-old Omnia Halibut sees a hooded figure emerging from the woods by the Wall, she can't help but wonder who the man is and why he is skulking around the House. And as Omnia sets out to discover the truth she triggers a chain of events that threatens to destroy Neversuch House forever. For the House is steeped in secrets, secrets that some people want to remain hidden, and, as Omnia tries to unravel the mysteries of Neversuch House, someone is watching her, and they will do anything to stop her from revealing the truth...

This psychobiographical study of the renowned French pediatrician and psychoanalyst Françoise Dolto introduces both her theories of child development and her unique insights into language and identity. A friend of Jacques Lacan's, Dolto believed that we are all humanized through language, and that the words we use carry unconscious traces of our early histories of love, suffering and desire. Suggesting that infants unconsciously symbolize and that a continuous circulation of unconscious affects—the transference—prevails in all language-based relations, her findings challenge assumptions about autism, autobiography, linguistics, literacy, pedagogy and therapy. Dolto's own corpus—a rich archive blending the personal and professional—demonstrates this, with echoes between Dolto's constructs about the child and her own challenging childhood. This fascinating book will not only introduce the work of Françoise Dolto to many readers, but will be a valuable resource for all psychoanalytic researchers and theorists interested in childhood, language and identity.

The book presents a series of ethnographic studies, which illustrate issues of wider importance, such as the role of cultural traditions, concepts and learning procedures in the development of formal (or mathematical) thinking outside of the western tradition. It focuses on research at the crossroads of anthropology and ethnomathematics to document indigenous mathematical

knowledge and its inclusion in specific cultural patterns. More generally, the book demonstrates the heuristic value of crossing ethnographical, anthropological and ethnomathematical approaches to highlight and analyze—or "formalize" with a pedagogical outlook—indigenous mathematical knowledge. The book is divided into three parts. The first part extensively analyzes theoretical claims using particular ethnographic data, while revealing the structural mathematical features of different ludic, graphic, or technical/procedural practices in their links to other cultural phenomena. In the second part, new empirical studies that add data and perspectives from the body of studies on indigenous knowledge systems to the ongoing discussions in mathematics education in and for diverse cultural traditions are presented. This part considers, on the one hand, the Brazilian work in this field; on the other hand, it brings ethnographic innovation from other parts of the world. The third part comprises a broad philosophical discussion of the impact of intuitive or "ontological" premises on mathematical thinking and education in the light of recent developments within so-called indigenously inspired thinking. Finally, the editors' conclusions aim to invite the broad and diversified field of scholars in this domain of research to seek alternative approaches for understanding mathematical reasoning and the adjacent adequate educational goals and means. This book is of interest to scholars and students in anthropology, ethnomathematics, history and philosophy of science, mathematics, and mathematics education, as well as other individuals interested in these topics.
