Experiments in Ethics Tiger Tales

The Kamishibai man used to ride his bicycle into town where he would tell stories to the children and sell them candy, but gradually, fewer and fewer children came running at the sound of his clappers. They were all watching their new televisions instead. Finally, only one boy remained, and he had no money for candy. Years later, the Kamishibai man and his wife made another batch of candy, and he pedaled into town to tell one more story—his own. When he comes out of the reverie of his memories, he looks around to see he is surrounded by familiar faces—the children he used to entertain have returned, all grown up and more eager than ever to listen to his delightful tales. Using two very different yet remarkable styles of art, Allen Say tells a tale within a tale, transporting readers seamlessly to the Japan of his memories.

In the current ever changing world - the liquid modernity - the most pressing psychological challenge to all of us is to create and maintain a personal balance between mental stability and mental flexibility. In *Transformative Learning and Identity* Knud Illeris, one of the leading thinkers on the way people learn, explores, updates and re-defines the concept and understanding of transformative learning while linking the concept of transformative learning to the concept of identity. He thoroughly discusses what transformative learning is or could be in a broader learning theoretical perspective, including various concepts of learning by change, as opposed to learning by addition, and ends up with a new, short and distinct definition. He also explores and discusses the concept of identity and presents a general model depicting the complexity of identities today. Building on the work of Mezirow, various perspectives of transformative learning are analysed and discussed, including; transformative learning in

different life ages; progressive and regressive transformations; motivation and identity defence; development of identity; personality and competence, and transformative learning in school, education, working life, and in relation to current and future life conditions. This vital new book by one of the leading learning theorists of our time will prove of lasting interest to academics, teachers, instructors, leaders and researchers in the field of adult learning and education. It will also appeal to many students and researchers of psychology and sociology in general. *Modern Essentials HANDBOOK* Constable

From bestselling poet Daniel Ladinsky, a rich collection that brings the great Sufi poet Hafiz to Western readers To Persians, the poems of Hafiz are not "classical literature" from a remote past but cherished wisdom from a dear and intimate friend that continues to be quoted in daily life. With uncanny insight, Hafiz captures the many forms and stages of love. His poetry outlines the stages of the mystic's "path of love"—a journey in which love dissolves personal boundaries and limitations to join larger processes of growth and transformation. With this stunning collection, Ladinsky has succeeded brilliantly in capturing the essence of one of Islam's greatest poetic and spiritual voices. "If you haven't yet had the delight of dining with Daniel Ladinsky's sweet, playful renderings of the musings of the great saints, I Heard God Laughing is a perfect appetizer. . . . This newly released edition of his first playful foray into Hafiz's divinely inspired poetry is essential reading. . . . Ladinsky is a master who will be remembered for finally bringing Hafiz alive in the West." —Alexandra Marks, *The Christian Science Monitor*

Do you know your own feelings? Sometimes, we're happy, so we laugh and shout with glee. Other times, we're angry, and want to rage and roar. It is not easy to deal with our many contradictory emotions. To recognize our own feelings and deal with them responsibly is an important learning process for children, and a trial of limits. This vibrantly and expressively illustrated book invites children to talk about feelings. It takes readers through a range of potential emotions without ever calling them "good" or "bad," allowing children to recognize and examine their own emotional world.

This book is a sound science report about the consequences of pesticides to nature, health and environment. The book shares essential insights into the use of pesticides in agriculture, discusses the politics, rhetoric and profits involved, addresses the potential health and ecological risks of pesticides in our daily lives, and debates possible solutions. Does sustainable agriculture exist, and is agriculture without pesticides possible at all? Moreover, the author gives insight into his scientific work, the set-up of the experiments, and also writes about his very own experiences with the media and press after publication of his studies. For many years, Johann G. Zaller, an ecologist at the University of Natural Resources and Life Sciences in Vienna, and his team, have been researching applied chemicals and their effects on the environment. Their findings, together with relevant literature and media reports, are presented in this book, which offers a unique resource for anyone who wants to know the nature and background of pesticides and how we come into contact with them in our daily lives. Systemic thinking has opened up further areas of specialization from one-on-one and couples therapy to clinical supervision and organizational development. Systemic intervention sees a problem as an incident involving a number of different, interacting individuals. In this sense, conflict, problems and occurrences are viewed and treated within the social context. This comprehensive introduction contains many examples and detailed suggestions for a practical approach to directed conversation.

A colorful look at getting along! Matilda, the Queen of Colors, has a color for her every mood—she calls for Blue when she's calm, Red when she's wild, and Yellow when she wants to be warm. But when Matilda and Yellow begin to quarrel, not even Blue and Red can stop the argument. And before long everything in the kingdom turns Gray, until Matilda cries tears—bright colorful tears. Jutta Bauer's simple yet evocative story and pictures convey a rainbow of emotions as The Queen of Colors plays and jousts with her primary subjects—Blue, Red, and Yellow.

The Queen of Colors Springer Science & Business Media

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In Experiments in Ethics, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Ein schlankes, erfülltes Leben ohne Zucker ... Ist das wirklich möglich? Ja, es geht. Aber anders als gedacht: Die meisten Menschen versuchen durch Willenskraft ihren Zuckerkonsum zu reduzieren, abzunehmen und ihr gesundes Wohlfühlgewicht dauerhaft zu halten. Doch das funktioniert nicht, hier braucht es mehr als Willenskraft. Es braucht eine andere Denkweise. Das

Resultat dieses Umdenkprozesses ist die Zuckerfreiheit, mit der ein Verzicht auf schlechten Zucker selbstverständlich wird, leicht fällt und Freude macht. Zuckerfreiheit hilft nicht nur beim Abnehmen und dabei, dauerhaft seinen gesunden Wohlfühlkörper zu haben. Zuckerfreiheit schenkt Lebensfreude, Selbstvertrauen und ein konstant hohes Energielevel. Dieses Buch erinnert daran, dass Zuckerfreiheit ein natürlicher Seins-Zustand ist. Und es schenkt den Leser*innen die mentalen und emotionalen Zutaten für ein zuckerfreies Leben, das sie lieben werden.

Andy Gage was born in 1965 and murdered not long after by his stepfather. . . . It was no ordinary murder. Though the torture and abuse that killed him were real, Andy Gage's death wasn't. Only his soul actually died, and when it died, it broke in pieces. Then the pieces became souls in their own right, coinheritors of Andy Gage's life. . . . While Andy deals with the outside world, more than a hundred other souls share an imaginary house inside

Andy's head, struggling to maintain an orderly coexistence: Aaron, the father figure; Adam, the mischievous teenager; Jake, the frightened little boy; Aunt Sam, the artist; Seferis, the defender; and Gideon, who wants to get rid of Andy and the others and run things on his own. Andy's new coworker, Penny Driver, is also a multiple personality, a fact that Penny is only partially aware of. When several of Penny's other souls ask Andy for help, Andy reluctantly agrees, setting in motion a chain of events that threatens to destroy the stability of the house. Now Andy and Penny must work together to uncover a terrible secret that Andy has been keeping . . . from himself.
