*Resources in Vocational Education* OECD Publishing

This book introduces the fundamental concepts necessary for designing, using, and implementing database systems and database applications. Our presentation stresses the fundamentals of database modeling and design, the languages and models provided by the database management systems, and database system implementation techniques. The book is meant to be used as a textbook for a one- or two-semester course in database systems at the junior, senior, or graduate level, and as a reference book. Our goal is to provide an in-depth and up-to-date presentation of the most important aspects of database systems and applications, and related technologies. We assume that readers are familiar with elementary programming and data structuring concepts and those they have had some exposure to the basics of computer organization.

Practical Airport Operations, Safety, and Emergency Management: Protocols for Today and the Future focuses on the airport itself, not the aircraft, manufacturers, designers, or even the pilots. The book explores the safety of what's been called 'the most expensive piece of pavement in any city'— the facility that operates, maintains, and ensures the safety of millions of air passengers every year. The book is organized into three helpful sections, each focusing on one of the sectors described in the title. Section One: Airport Safety, explores the airport environment, then delves into safety management systems. Section Two: Airport Operations, continues the conversation on safety management systems before outlining airside and landside operations in depth, while Section Three: Airport Emergency Management, is a careful, detailed exploration of the topic, ending with a chapter on the operational challenges airport operations managers can expect to face in the future. Written by trusted experts in the field, users will find this book to be a vital resource that provides airport operations managers and students with the information, protocols, and strategies they need to meet the unique challenges associated with running an airport. Addresses the four areas of airport management: safety, operations, emergency management, and future challenges together in one book Written by leading professionals in the field with extensive training, teaching, and practical experience in airport operations Includes section on future challenges, including spaceport, unmanned aerial vehicles, and integrated incident command Ancillary materials for readers to reinforce concepts and instructors teaching operations courses Focuses on the topics of safety, operations, emergency management, and what personnel and students studying the topic can expect to face in the future

Teacher Education Series Copyright Office, Library of Congress

This book comprises the refereed papers together with the invited keynote papers, presented at the Second International Conference on Enterprise Information Systems. The conference was organised by the School of Computing at Staffordshire University, UK, and the Escola Superior de Tecnologia de Setubal, Portugal, in cooperation with the British Computer Society and the International Federation for Information Processing, Working Group 8.1. The purpose of this 2nd International Conference was to bring together researchers, engineers and practitioners interested in the advances in and business applications of information systems. The papers demonstrate the vitality and vibrancy of the field of Enterprise Information Systems. The research papers included here were selected from among 143 submissions from 32 countries in the following four areas: Enterprise Database Applications, Artificial Intelligence Applications and Decision Support Systems, Systems Analysis and Specification, and Internet and Electronic Commerce. Every paper had at least two reviewers drawn from 10 countries. The papers included in this book were recommended by the reviewers. On behalf of the conference organising committee we would like to thank all the members of the Programme Committee for their work in reviewing and selecting the papers that

appear in this volume. We would also like to thank all the authors who have submitted their papers to this conference, and would like to apologise to the authors that we were unable to include and wish them success next year.

Information Management John Wiley & Sons

C++ For Artists The Art, Philosophy, and Science of Object-Oriented Programming takes a refreshing and sometimes controversial approach to the complex topic of object-oriented programming and the C++ language. Intended as both a classroom and reference *t Books and Pamphlets, Including Serials and Contributions to Periodicals* Pulp Free Press Many companies are relying on a business model that is fundamentally suited to a different era. Now, organizations are under pressure from new trends such as digitization and servitization. Trying to adapt to a new environment, they risk relying on improvements that only scratch the surface of developing a radically different value proposition. Based on rigorous research into companies that have successfully and radically redesigned their business models, Radical Business Model Transformation shows why they made the leap, what they had to do to achieve it and how it has transformed the potential for their organizations. This book is a step-by-step guide for leaders who want to seize the opportunity of new business models and gain a competitive advantage. It explains how to assess the status quo, identify the value of future business models and develop a transformation path. It also provides advice on how to involve both the leadership team and all other employees in order to implement successful business model transformation. Illustrative case studies of organizations that have crossed the line to a more transformative business range from exponential-growth companies like Netflix and global players like Xerox, SAP and Daimler to mid-sized hidden champions like Knorr-Bremse and LEGIC. Radical Business Model Transformation is essential reading for business leaders, transformation experts and MBA students interested in ensuring that their business model is future-proof and can withstand the new proliferation of innovations that are set to transform the business landscape. Online supporting resources include a business model transformation calculator to help design your transformation path.
