State tax systems are in trouble. Revenue collecting methods developed more than a half century ago are straining to deal with 21st century economies. Globalization and e-commerce are changing the way people work and purchase goods; devolution has steadily shifted responsibility from the federal government to the states; tax incentives have become the weapon of choice in the battle to attract business investment. All of this, in an environment where anti-tax messages have become a staple of political campaigns, have made creating tax policy more challenging than ever before. In the updated fourth edition of *State Tax Policy*, David Brunori analyzes these and other critical challenges facing state governments. He identifies the important issues, and examines possible solutions in formulating and implementing state tax policy. *State Tax Policy* is the only book that provides students and professionals with a concise, approachable, and up-to-date introduction to the intricacies of state tax policy.

Newman's best-selling *Sociology: Exploring the Architecture of Everyday Life*, this briefer, streamlined version continues to show students how to see the "unfamiliar in the familiar," inspiring them to think critically about their own lives and social contexts. As in the full text, the author's approachable writing style and lively personal anecdotes make the Brief Edition a text that "reads like a real book." It uses the metaphors of "architecture" and "construction" to help

students understand that society is not something that exists “out there,” independently of themselves; it is a human creation that is planned, formed, maintained, or altered by individuals. Rather than surveying every subfield in sociology, the Brief Edition focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures.
