Welcome to the Consumer Financial Protection Bureau's Your Money, Your Goals: A financial empowerment toolkit for social services programs! If you're reading this, you are probably a case manager, or you work with case managers. Finances affect nearly every aspect of life in the United States. But many people feel overwhelmed by their financial situations, and they don't know where to go for help. As a case manager, you're in a unique position to provide that help. Clients already know you and trust you, and in many cases, they're already sharing financial and other personal information with you. The financial stresses your clients face may interfere with their progress toward other goals, and providing financial empowerment information and

tools is a natural extension of what you are already doing. What is "financial empowerment" and how is it different from financial education or financial literacy? Financial education is a strategy that provides people with financial knowledge, skills, and resources so they can get, manage, and use their money to achieve their goals. Financial education is about building an individual's knowledge, skills, and capacity to use resources and tools, including financial products and services. Financial education leads to financial literacy. Financial empowerment includes financial education and financial literacy, but it is focused both on building the ability of individuals to manage money and use financial services and on providing access to products that work for them. Financially empowered individuals are informed and skilled; they know where to get help with their financial challenges. This sense of empowerment can build confidence that they can effectively use their financial knowledge, skills, and resources to reach their goals. We designed this toolkit to help you help your clients become financially empowered consumers. This financial empowerment

toolkit is different from a financial education curriculum. With a curriculum, you are generally expected to work through most or all of the material in the order presented to achieve a specific set of objectives. This toolkit is a collection of important financial empowerment information and tools you can access as needed based on the client's goals. In other words, the aim is not to cover all of the information and tools in the toolkit - it is to identify and use the information and tools that are best suited to help your clients reach their goals.

“As so many Americans feel powerless to confront a financial system designed to serve the few, Shuman offers us real choices: tools that align our lives with our values. That's power. I love this highly readable, timely, surprising book.”

—Frances Moore Lappé, author of *Daring Democracy* and *Diet for a Small Planet*

Americans agree on very little these days, but red state conservatives and blue state progressives can agree on one critical point: Wall Street can no longer be trusted. Yet most of us continue to invest our money in the stocks and bonds of Fortune 500 companies, transferring our capital far from where we live and work. Local investing expert Michael Shuman offers another alternative. He shows how we can use two well-established—but rarely used—investment tools to keep our money close and get a return as good as or better than what we'd get investing in distant, indifferent corporations. Shuman explains the nuts and bolts of self-directed IRAs and solo 401(k)s and how they can be combined with other recently legalized local investing tools. He details how to set these accounts up, identify and evaluate a whole range of local investment

opportunities, and make sure account holders stay on the right side of the law. While the book is written for people without a lot of investment experience—Shuman explains concepts like “liquidity” and “diversification” in simple terms—even if you're as experienced as Warren Buffett, this book will make you rethink everything you know about investing. With Shuman's expert advice, you can strengthen your investment portfolio and your community, neighborhoods, and schools at the same time!

Have you suffered from the weakest thirty year period of growth since the Great Depression and workers getting the smallest share of the economic pie ever? Are you concerned the record number of people facing financial stress enables addictions and aggravates tensions between political parties, races and religions? Do you want to be part of the solution rather than the blame game? This myth-shaking, data-backed book maps the path to national prosperity. It exposes the lies that tricked voters to favor: stagnate wages, weak growth, asset bubbles that pop and unsustainable deficits. The book will encourage those creating great wealth. The takers, those wealthy who consume way more than they produce, will dread the fact based conclusions. If you are a worker do you want to double your pay over the next several years? If you are a business owner would you like the value of

your business to grow twice as fast?

There's a tax policy for that. It's the one that corresponded with economic growth above 5 percent for thirty-six years. Hint: it's the opposite of what coddled elites call pro growth tax policy, but is really a bait and switch that squeezes the middle class. The last thirty years the economy grew at 2.5 percent. When voters know better, we could do twice that. Three decades of studying what drives the economy and financial markets, building an economic data base and modeling what happens and when it happens may have made me an expert or perhaps I'm more like the young boy shouting, "The emperor has no clothes." What is obvious to someone who has really studied the data is not the message elites promote to the general public. The book will give you a clear understanding of how you can be a part of restoring national prosperity and enhancing your own. Find out how to: - Restore the incentive to work and double your income as a worker, - Grow your business twice as fast, - Understand tax policy beyond what you thought you were capable of, - See the wolf under the sheepskin, - Keep your retirement savings

from disappearing in a popping financial bubble, - Solve the Federal budget/debt crisis, - Give the nation a stronger sense of community and - Give your children and grandchildren a bright future. Follow the advice in this book and together we can make the 21st century another American Century. What's stopping you from making your vote a powerful tool to restore the nation? Local Dollars, Local Sense is a guide to creating Community Resilience. Americans' long-term savings in stocks, bonds, mutual funds, pension funds, and life insurance funds total about \$30 trillion. But not even 1 percent of these savings touch local small business--even though roughly half the jobs and the output in the private economy come from them. So, how can people increasingly concerned with the poor returns from Wall Street and the devastating impact of global companies on their communities invest in Main Street? In *Local Dollars, Local Sense*, local economy pioneer Michael Shuman shows investors, including the nearly 99% who are unaccredited, how to put their money into building local businesses and resilient regional economies--and profit in the process. A revolutionary toolbox for social change, written with compelling personal stories, the book delivers the most thorough overview available of local investment options, explains the obstacles, and profiles investors who have paved the way. Shuman demystifies the growing realm of local investment choices--from institutional lending to investment clubs and networks, local investment

funds, community ownership, direct public offerings, local stock exchanges, crowdfunding, and more. He also guides readers through the lucrative opportunities to invest locally in their homes, energy efficiency, and themselves. A rich resource for both investors and the entrepreneurs they want to support, *Local Dollars, Local Sense* eloquently shows how to truly protect your financial future--and your community's.

Advertising and other forms of marketing communications are not serving the needs of marketers or their audiences as well as they should. Faced with increasing pressure for accountability, marketers are often disappointed in the result of their communications investment. The problem is that marketers continue to focus most of their resources on the types of communications that have little credibility with and impact on audiences. Parker Stoner of marketing communications agency Swanson Russell says there is a Hierarchy of Marketing Communications Effectiveness in which the categories of communications near the top have much greater influence on purchase decisions compared to the often overused categories lower in the hierarchy. Near the top of the hierarchy are peoples' actual

and virtual experiences with brands, along with recommendations from sources they trust. On the other hand, basic brand awareness and image advertising, brand sponsorships, and other types of commonly used communications are found near the bottom of the hierarchy. In Put Your Mouth Where the Money Is, Stoner argues that marketers need to allocate more of their communications (mouths) to those categories that most influence audience purchases (money). Put Your Mouth Where the Money Is begins by helping marketers make a CONNECTION with their audiences by explaining why and where to refocus marketing communications resources. It follows with a recommended PROCESS to implement and measure communications among their customers and prospects. It then concludes with IDEAS for marketers to develop marketing communications that enhance the value of their products for customers. When followed, the principles help marketers better engage and influence their audiences, resulting in greater return on marketing communications resources.

The authors designed and tested a voluntary commitment product to help smokers quit smoking. The product (CARES) offered smokers a savings

account in which they deposit funds for six months, after which they take a urine test for nicotine and cotinine. If they pass, their money is returned; otherwise, their money is forfeited to charity. Eleven percent of smokers offered CARES tookup, and smokers randomly offered CARES were 3 percentage points more likely to pass the 6-month test than the control group. More importantly, this effect persisted in surprise tests at 12 months, indicating that CARES produced lasting smoking cessation.
