Des champs en culture au pot sur le feu, des archives aux livres de recettes, des secrets de grands-mères aux cuisines "nationales", elles éclairent maints aspects de l'histoire du paysage et des plantes cultivées, des environnements économiques et politiques, des croyances et des représentations. <u>Newspaper Press Directory</u> KARTHALA Editions In Children of the Soil, Tasha Rijke-Epstein offers an urban history of the port city of Mahajanga, Madagascar, before, during, and after colonization. Drawing on archival and ethnographic evidence, she weaves together the lives and afterlives of built spaces to show how city residents negotiated imperial encroachment, colonial rule, and global racial capitalism over two centuries. From Mahajanga's hilltop palace to the alluvial depths of its cesspools, the city's spaces were domains for ideological debates between rulers and subjects, French colonizers and indigenous Malagasy peoples, and Comorian migrants and Indian traders. In these spaces, Mahajanga's residents expressed competing moral theories about power over people and the land. The built world was also where varying populations reckoned with human, ancestral, and ecological pasts and laid present and future claims to urban belonging. Migrants from nearby Comoros harnessed built forms as anticipatory devices through which they sought to build their presence into the landscape and transform themselves from outsiders into "children of the soil" (zanatany). In tracing the centrality of Mahajanga's architecture to everyday life, Rijke-Epstein offers new ways to		<p>Sicily: a collection of case studies on the Renaissance renewal of Italian court palaces from a comparative perspective. <i>Le cas Métérié</i> Duke University Press Well into the 1980s, Strasbourg, France, was the site of a curious and little-noted experiment: Ungemach, a garden city dating back to the high days of eugenic experimentation that offered luxury living to couples who were deemed biologically fit and committed to contractual childbearing targets. Supported by public authorities, Ungemach aimed to accelerate human evolution by increasing procreation among eugenically selected parents. In this fascinating history, Paul-André Rosental gives an account of Ungemach's origins and its perplexing longevity. He casts a troubling light on the influence that eugenics continues to exert—even decades after being discredited as a pseudoscience—in realms as diverse as developmental psychology, postwar policymaking, and liberal-democratic ideals of personal fulfilment. <i>Les élections et les cahiers de Paris en 1789</i> BoD – Books on Demand This volume is a major contribution to the field of disability history in the ancient world.
