\*\* ACCORDING TO BUSINESS INSIDER: "Getting your MBA has never been easier. Haroun is one of the highest rated professors on Udemy, so you can expect to be in good hands through the course of your education." \*\* This is the book version of the popular Udemy.com course called "An Entire MBA in 1 Course." From the Author of "101 Crucial Lessons They Don't Teach You in Business School," which Forbes magazine calls "1 of 6 books that all entrepreneurs need to read right now." This book will teach you everything you need to know about business...from starting a company to taking it public. Most business books are significantly outdated. This book leverages many online resources and makes the general business, accounting and finance process very easy to understand (and enjoyable too)! There are many incredibly engaging and entertaining video links in the book to YouTube and other sources; 'edutainment' works! Although this book is close to 400 pages, I tried to visualize the content of this book as much as possible as this is a more impactful and enjoyable way to learn (think Pinterest versus the tiny words in the Economist)! The contents of this book are all based on my work experience at several firms, including Goldman Sachs, the consulting industry at Accenture, a few companies I have started, the hedge fund industry where I worked at Citadel and most recently, based on my experience at a prominent San Francisco based venture capital firm. I also included many helpful practical business concepts I learned while I did an MBA at Columbia University and a Bachelor of Commerce degree at McGill University. Think of this book as a "greatest hits" business summary from my MBA, undergraduate business degree, work experience in consulting, equities, hedge funds, venture capital and starting my own companies. As the title of this book suggests, this is an entire MBA in one book; it's also a practical manual to help you accomplish your business career goals. I have minimized "boring theoretical concepts" in this book in order to keep it as close to reality as possible. I hope you enjoy it! In addition to teaching at 4 universities in the San Francisco Bay Area, you can find other courses that I teach online at [www.udemy.com/user/chris-haroun/](http://www.udemy.com/user/chris-haroun/).

When online learning began more than two decades ago, many universities envisioned the creation of international student markets, but this has only recently become a reality. The emergence of a global economy, advances in technology, increased market competition, reduced funding, and the growing desire for degrees from internationally recognized universities have created opportunities that promote transnational degrees. Transnational Distance Learning and Building New Markets for Universities presents the opportunities, methods, issues, and risks involved in extending university education across national borders. It is important to understand cultural, financial, and legal issues, as well as management approaches, academic delivery options, and business considerations needed to create quality programs that are marketable and cost effective in reaching emerging international markets. The purpose of the book is to review how to reach emerging international markets, increase access to education, and do so at a profit.

Legislative and institutional affirmative and positive action policies, intended to increase accessibility and the participation of historically disadvantaged groups in employment and education, have been with us for some time, particularly in Anglo Saxon countries. One of the major issues they are intended to address is gender inequality. Proponents of these policies have hailed quota initiatives as a key to promoting equal opportunities and reducing discrimination. At the same time, affirmative action policies and processes have been challenged in courts and have caused controversy in educational establishments, highlighting the fact that these practices can have negative consequences. Exploring the application of quotas and affirmative action at an institutional or organizational level from a variety of different perspectives, the contributions in Diversity Quotas, Diverse Perspectives provide an understanding of the complexity and controversial nature of policies and actions in different countries. Even within Europe, implementation has varied widely from country to country. For example, while most European countries have employment quotas for people with disabilities, there is little consistency among the European Union's member states when it comes to quotas and other policies relating to ethnic minorities in employment and educational settings. Focussing here particularly on gender-related initiatives, but raising questions pertinent to other aspects of diversity, the contributions from international researchers investigate variances between and differing justifications for policies. The book offers a global perspective on the subject and expands the discussion of it beyond Anglo-Saxon contexts.

The resolution of conflicts based on religious and ethnic contradictions is a time-consuming process. Under certain conditions, a religious conflict became a form of expression of class, estate, interethnic contradictions, and the confrontation of states. However, we know that all religions call for peace, tolerance, and understanding. There is a need to realize that social injustice, inequality, and hostility toward any religious and ethnic groups fluctuates depending on the extent to which religious and ethnic differences are linked to economic, political, or national interests. The Handbook of Research on Ethnic, Racial, and Religious Conflicts and Their Impact on State and Social Security forms a civil position and identity and provides knowledge of the development of conflict preconditions. This research explains conflict avoidance and solutions and creates a solid base for ethnic and religious integration while being aware of conflict consequences and avoiding xenophobia. Covering topics such as economic crisis, radicalization, and spiritual security, this book is an indispensable resource for students of higher education, professors, faculty, libraries, researchers, policymakers, community leaders, human rights activists, religious leaders, and academicians.
