Combat Helmets of the Third Reich: A study in photographs Schiffer Pub Limited

Denying History takes a bold and in-depth look at those who say the Holocaust never happened and explores the motivations behind such claims. While most commentators have dismissed the Holocaust deniers as antisemitic neo-Nazi thugs who do not deserve a response, historians Michael Shermer and Alex Grobman have immersed themselves in the minds and culture of these Holocaust "revisionists." In the process, they show how we can be certain that the Holocaust happened and, for that matter, how we can confirm any historical event. This edition is expanded with a new chapter and epilogue examining current, shockingly mainstream revisionism.

The collecting of MKII helmets from the second world war has seen a considerable increase in interest among

collectors recently. The enthusiast approaching this sector of militaria collecting for the first time has very few tools available that can at least point him in the right direction. So, taking stock of the knowledge I have acquired and with the help of various collector friends, I thought it might be useful to publish this guide on MKII helmets in the second world war and their use during the Italian Campaign. There is certainly a lot more to discover but this is a starting point. A tip, before making a purchase, always ask the opinion of other collectors because a trained eye can definitely help you in this jungle of post war use, fakes, tampering... and beautiful helmets that still know how to tell their story. A big thank you goes to Francesco Braneschi, it is also thanks to him that this "research" came about, to his passion and to our constant exchanges of opinion on this sector of the militaria. In an attempt to understand something more I cannot fail to thank Marco Visani, super adviser with his infinite bibles. A thankyou also to those who contributed with their time, photographs, information, and much

Thank you. And finally, thank you to Fabio Roncella for his essay on the battle of Montegabbione, our roots are in history. Buona lettura! Daniele Piselli

Denying History Schiffer Military History Book

"In the opening months of World War II the Heer, the army of Nazi Germany, established a formidable reputation on battlefields across Europe, and the astonishing victories won by Hitler's troops in the Soviet Union in 1941 confirmed their combat prowess. The Heer's effectiveness was built on the reforms of weaponry, uniforms, personal kit and other equipment in the years before 1939, with innovation and evolution continuing throughout the ensuing conflict. In this fully illustrated book noted authority Dr Stephen Bull examines the German Army's wide range of uniforms, personal equipment, weapons, medals and awards, and offers a comprehensive guide to the transformation that the German soldier underwent in the period from the opening of hostilities in September 1939 to Germany's unconditional surrender in May 1945."--Back cover.

This four volume set by Thomas M. Johnson, a leading collector and authoritative researcher, has been compiled to serve as a useful and authoritative reference on the daggers of Nazi Germany, and have been designed to aid not only the beginning collector, but also the seasoned advanced collector and specialist. Also, the series is a study of a culture and the crafts that actually

produced the blades, as well as being a manual in the art of collecting them. The embracing scope is both educational and recreational and it adds a whole new dimension to this popular collecting subject as a whole. German Helmets of the Second World War Wiley

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any

form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a

fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

Includes 112 photos/illustrations and 21 maps. The German Afrika Korps blazed a trail across the deserts of North Africa under their dashing leader Erwin Rommel, the Desert Fox, although finally defeated by far superior Allied Forces they set the gold standard for desert operations. This book is of great historical value and even in the present day it is still considered of great value by the American military who still seek for improvements in their ways of desert doctrine... "Analysts continue to assess

the data from Operations Desert Shield and Desert Storm as a means of improving the military's ability to function efficiently in desert terrain...The information gleaned from this effort will enhance the already considerable body of knowledge on the subject derived from the historical record...When contributions in the latter category are located or rediscovered, they should be given the dissemination they merit... "Such is the purpose of publishing Desert Warfare: German Experiences in World War II...Organized by Major General Alfred Toppe and written with the assistance of nine German commanders who served in North Africa, the manuscript...represents a collaborative attempt to determine "as many factors as possible which exerted a determining influence on desert warfare," Issues addressed include planning, intelligence, logistics, and operations. Described and analyzed are the German order of battle, the major military engagements in North Africa, and the particular problems of terrain and climate in desert operations. Not unlike many of the U.S. units engaged in the war with Iraq, the Germans in North Africa learned about combat operations in the desert only after they arrived on the scene and confronted the desert on its own terms. For this reason alone, as well as for the insights it offers, Desert Warfare requires the serious consideration of those responsible for preparing the U.S. military for any future conflict in desert terrain."
