LOCKHART, #1 New York Times bestselling author of <i>We Were Liars</i> and <i>Again Again</i> A poignant and uplifting novel about the power of community, from the #1 New York Times bestselling author of <i>If I Stay</i> . Aaron Stein used to think books were miracles. But not anymore. Even though he spends his days working in his family’s secondhand bookstore, the only book Aaron can bear to read is one about the demise of the dinosaurs. It’s a predicament he understands all too well, now that his brother and mom are gone and his friends have deserted him, leaving Aaron and his shambolic father alone in a moldering bookstore in a crusty mountain town where no one seems to read anymore. So when Aaron sees the opportunity to sell the store, he jumps at it, thinking this is the only way out. But he doesn’t account for Chad, a “best life” bro with a wheelchair and way too much optimism, or the town’s out-of-work lumberjacks taking on the failing shop as their pet project. And he certainly doesn’t anticipate meeting Hannah, a beautiful, brave musician who might possibly be the kind of inevitable he’s been waiting for. All of them will help Aaron to come to terms with what he’s lost, what he’s found, who he is, and who he wants to be, and show him that destruction doesn’t inevitably lead to extinction; sometimes it leads to the creation of something entirely new. <i>Pirate Latitudes</i> Random House Books for Young Readers From the bestselling author of <i>Jurassic Park</i> , <i>Timeline</i> , and <i>Sphere</i> comes a deeply personal memoir full of fascinating adventures as he travels everywhere from the Mayan pyramids to Kilimanjaro. Michael Crichton’s <i>Jurassic World</i> Open Road Media Sixty-five million years ago, a comet or asteroid larger than Mount Everest slammed into the Earth, inducing an explosion equivalent to the detonation of a hundred million hydrogen bombs. Vaporized detritus blasted through the atmosphere upon impact, falling back to Earth around the globe. Disastrous environmental consequences ensued: a giant tsunami, continent-scale wildfires, darkness, and cold, followed by sweltering greenhouse heat. When conditions returned to normal, half the plant and animal genera on Earth had perished. This horrific chain of events is now widely accepted as the solution to a great scientific mystery: what caused the extinction of the dinosaurs? Walter Alvarez, one of the Berkeley scientists who discovered evidence of the impact, tells the story behind the development of the initially controversial theory. It is a saga of high adventure in remote locations, of arduous data collection and intellectual struggle, of long periods of frustration ended by sudden breakthroughs, of friendships made and lost, and of the exhilaration of discovery that forever altered our understanding of Earth’s geological history. The complete collection of "nimble and often hilarious" short stories exploring the cosmos by the acclaimed author of *Invisible Cities* (Colin Dwyer, NPR). Italo Calvino's beloved cosmicomics cross planets and traverse galaxies, speed up time or slow it down to the particles of an instant. Through the eyes of a "cosmic know-it-all" with the unpronounceable name of Qfwfq, Calvino explores natural phenomena and tells the story of the origins of the universe. Relating complex scientific

and mathematical concepts to our everyday world, they are an indelible and delightful literary achievement. Originally published in Italian in three separate volumes—including the Asti d'Appello Prize-winning first volume, *Cosmicomics*—these thirty-four dazzling stories are collected here in one definitive English-language anthology. "Trying to describe such a diverse and entertaining mix, I have to admit, just as Calvino does so often, that my words fail here, too. There's no way I—or anyone, really—can muster enough of them to quite capture the magic of these stories . . . Read this book, please." —Colin Dwyer, NPR
