With one flash of a camera, Demi's private life becomes public news. She doesn't know it yet, but her healing has just begun. Christian college professor Demetria Costanas had vowed to end her affair with a colleague. But she gives into temptation one last time . . . and a lurking photographer captures her weakness for all to see. Quite literally, she's the woman caught in adultery. And almost everyone—herself included—has a stone to throw. Enter Sullivan Crisp, a decidedly unorthodox psychologist with his own baggage. He's well-known for his quirky sense of humor and incorporation of "game show" theology into his counseling sessions. And yet there's something more he offers: hope for a fresh start. Reluctantly the two of them begin an uplifting, uneven journey filled with healing and grace. By turns funny and touching, this story explores the ways humans hurt each other and deceive themselves. And it shows the endlessly creative means God uses to turn stones of accusation and shame into works of beauty that lead us onto the path of healing. An auspicious debut for a candid yet tender series about pain, healing, and God's invitation for second chances. "A story of refining one's faith in a world of sin and temptation. It just might change your life. It has certainly changed mine." —Angela Hunt, author of *Daughter of Cana* Inspirational contemporary read The first book in the Sullivan Crisp series, but can be enjoyed as a standalone Book one: Healing Stones Book two: Healing Waters Book three: Healing Sands Includes discussion questions for reading groups

Uses new research about the brain to explore how we can transcend our current physical and cultural limitations • Reveals that transcendence of current modes of existence requires the dynamic interaction of our fourth and fifth brains (intellect and intelligence) • Explores the idea that Jesus, Lao-tzu, and other great beings in history are models of nature's possibility and our ability to achieve transcendence • 17,000 sold in hardcover since April 2002 Why do we seem stuck in a culture of violence and injustice? How is it that we can recognize the transcendent ideal represented by figures such as Jesus, Lao-tzu, and many others who have walked among us and yet not seem to reach the same state? In *The Biology of Transcendence* Joseph Chilton Pearce examines the current biological understanding of our neural organization to address how we can go beyond the limitations and constraints of our current capacities of body and mind--how we can transcend. Recent research in the neurosciences and neurocardiology identifies the four neural centers of our brain and indicates that a fifth such center is located in the heart. This research reveals that the evolutionary structure of our brain and its dynamic interactions with our heart are designed by nature to reach

beyond our current evolutionary capacities. We are quite literally, made to transcend. Pearce explores how this "biological imperative" drives our life into ever-greater realms of being--even as the "cultural imperative" of social conformity and behavior counters this genetic heritage, blocks our transcendent capacities, and breeds violence in all its forms. The conflict between religion and spirit is an important part of this struggle. But each of us may overthrow these cultural imperatives to reach "unconflicted behavior," wherein heart and mind-brain resonate in synchronicity, opening us to levels of possibility beyond the ordinary.

The Pocket Book of Stones, Revised Edition Houghton Mifflin Harcourt

Details the powerful effects of gems as an alternative therapy for physical, psychological, and spiritual healing • Reveals the physical, healing, and astrological properties of over 70 minerals, along with instructions for maintaining and recharging their powers • Examines the "life" energy of stones, their basic vibratory patterns, and how this energy is used therapeutically to treat various disorders • Shows how to use gems in color therapy and to harmonize the chakras Gemstones have been used for both therapeutic and spiritual purposes since the beginning of time and in all traditions. Used properly, they can contribute to and accelerate healing through the practice of lithotherapy, which uses gems and minerals to restore enzymatic functions, and they can energize spiritual development. Alternative medicines such as homeopathy have given prominence to the therapeutic character of certain minerals, but the use of gemstones in expanding awareness or establishing a holistic, energetic connection with the stone itself have scarcely been brought forward. In this reclaiming of ancient wisdom, Florence Mégemont explores the many potent and beneficial dimensions of the mineral world. Over 70 precious and semiprecious stones are inventoried as to their principal deposits, therapeutic applications, and zodiac correspondences. Readers will discover which physical and emotional disorders can be relieved by using which minerals and--with the application of chakra therapy--which gemstones are indispensable to their spiritual health. While not proposing that lithotherapy is a substitute for traditional allopathic treatment, Mégemont shows that it can be a powerful complement to it. Additionally, stones can act preventively, energizing both our health and spiritual resources to a state of balance and attunement.

Top 10 Book about a blind French girl and a German boy whose paths collide in occupied France as both try to survive the devastation of World War II. Marie-Laure lives with her father in Paris near the Museum of Natural History where he works as the master of its thousands of locks. When she is six, Marie-Laure goes blind and her father builds a perfect miniature of their neighborhood so she can memorize it by touch and navigate her way home. When she is twelve, the Nazis occupy Paris, and father and daughter flee to the walled citadel of Saint-Malo, where Marie-Laure's reclusive great uncle lives in a tall house by the sea. With them they carry what might be the museum's most valuable and dangerous jewel. In a mining town in Germany, the orphan Werner grows up with his younger sister, enchanted by a crude radio they find. Werner becomes an expert at building and fixing these crucial new instruments, a talent that wins him a place at a brutal academy for Hitler Youth, then a special assignment to track the Resistance. More and more aware of the human cost of his intelligence, Werner travels through the heart of the war and, finally, into Saint-Malo, where his story and Marie-Laure's converge. Doerr's "stunning sense of physical detail and gorgeous metaphors" (*San Francisco Chronicle*) are dazzling. Deftly interweaving the lives of Marie-Laure and Werner, he illuminates the ways, against all odds, people try to be good to one another. Ten years in the writing, *All the Light We Cannot See* is a magnificent, deeply moving novel from a writer "whose sentences never fail to thrill" (*Los Angeles Times*).
