Book of the Month! A great classroom and bedtime read-aloud, *Mae Among the Stars* is the perfect book for young readers who have big dreams and even bigger hearts. When Little Mae was a child, she dreamed of dancing in space. She imagined herself surrounded by billions of stars, floating, gliding, and discovering. She wanted to be an astronaut. Her mom told her, "If you believe it, and work hard for it, anything is possible." Little Mae's curiosity, intelligence, and determination, matched with her parents' encouraging words, paved the way for her incredible success at NASA as the first African American woman to travel in space. This book will inspire other young girls to reach for the stars, to aspire for the impossible, and to persist with childlike

imagination.

Old Age Is Always 15 Years Older Than I Am Berkley Trade

A witty, thought-provoking collection of quotes about the ups and downs of aging. What does it mean to be old? Now you can find some of the best things ever said about the subject in Old Age is Always 15 Years Older Than I Am. This quotation collection is wise and warm,

witty and wild. It includes everything from a Supreme Court Justice's quip about exercising to Muhammad Ali's musings on wasted time to actress Ingrid Bergman's comparison of aging to climbing a mountain: "The higher you get, the more tired and breathless you become, but your views become more extensive." Everyone from has something to say about the topic—and this book delivers the wisdom of the ages.

There Was an Old Lady Who Swallowed Some Books! Simon and Schuster

The award-winning cartoonist offers "a witty history of the planet" for young readers—covering everything from the Big Bang to climate change (Publishers Weekly). Almost 14.5 billion years ago, it all started with a Big Bang. What began

as a cloud of gas, dust, and rock eventually took shape and bloomed into a molten sphere. Battered by asteroid collisions, ice ages, and shifting tectonic plates, our fledgling planet finally pushed forth continents. But if you think the earth has calmed down since then—think again! In this illustrated history of earth, the Sibert Honor medalist Don Brown teams up with geologist Michael Perfit to tell the strange-but-true saga of our planetary home. A knowledgeable groundhog and his earthworm sidekick take young readers through a wide range of topics—from solar energy and liquid magma to the ozone layer and the formation of mountains. Plus mini-biographies of scientists are included throughout. “A guaranteed hit with

science lovers and a best bet for convincing skeptics that science is indeed a grand and exciting adventure.”

Rare Earth Chelsea Green Publishing
The story of three generations in twentieth-century China that blends the intimacy of memoir and the panoramic sweep of eyewitness history—a bestselling classic in thirty languages with more than ten million copies sold around the world, now with a new introduction from the author. An engrossing record of Mao’s impact on China, an unusual window on the female experience in the modern world, and an inspiring tale of courage and love, Jung Chang describes the extraordinary lives and experiences of her family members: her grandmother, a warlord’s concubine;

her mother's struggles as a young idealistic Communist; and her parents' experience as members of the Communist elite and their ordeal during the Cultural Revolution. Chang was a Red Guard briefly at the age of fourteen, then worked as a peasant, a "barefoot doctor," a steelworker, and an electrician. As the story of each generation unfolds, Chang captures in gripping, moving—and ultimately uplifting—detail the cycles of violent drama visited on her own family and millions of others caught in the whirlwind of history.

One part personal quest to discover running greatness after age 50, one part investigation into what the women's

running boom can teach athletes about becoming fitter, stronger, and faster as we age, *Older, Faster, Stronger* is an engrossing narrative sure to inspire women of all ages. A former overweight smoker turned marathoner, Margaret Webb runs with elite older women, follows a high-performance training plan devised by experts, and examines research that shows how endurance training can stall aging. She then tests herself against the world's best older runners at the world masters games in Torino, Italy. Millions of women have taken up running in recent decades—the first generation of women to train in great numbers. Women are qualifying for the Olympic marathon in their 50s, running 100-mile ultra marathons in their 60s, completing Ironmans in their

80s, competing for world masters records in their 90s. What are the secrets of these ageless wonders? How do they get stronger and faster long after their "athletic prime"? Is there an evolutionary reason women can maintain endurance into advanced years? Webb immerses herself in these questions as she as she trains to see just how fast she can get after 50.

Number the Stars Houghton Mifflin Harcourt

Why has the life span of the average American increased from 48 to 75 years in this century alone? . . . If the body is a machine that simply wears out, why do some cells seem immortal? . . . Is there an aging gene? And can we control it? . . . Can antioxidants and hormone therapy actually slow the aging process and extend life? Steven Austad's compelling book investigates the history, the theories, and the personalities behind the quest to understand the nature of aging. Here is hard evidence from the front lines of research that science is

finally closing in on the fundamental processes of human biology and life. "Austad's book can be read with pleasure and profit by any intelligent person with a smattering of biological knowledge." Science "In this clear, engrossing overview, Austad takes the sting out of a subject that will ultimately capture us all." Publishers Weekly "Why We Age is remarkably rigorous in its analysis and thorough scope. . . . A comprehensive examination of its topic." Science Editors, Amazon.com "The problem with long life is that one keeps getting older; here's an able and clearly written summary of the latest theories on why we age and what might be done to ameliorate the process."
