Henry for President Hunter Publishing, Inc

On 14th July 1865, two competing rope teams made their way to the summit of the Matterhorn. The mountain was considered invincible until Italians and Britons had the iron will to climb the colossus in the middle of the 19th century. The team around the British alpinist Edward Whymper won the race. It was sensational that for the first time people boarded the Matterhorn for good. But his rough aura was to take revenge: when the men de-scended the mountain, four of the seven climbers fell into the abyss, which is why the first ascent heralded the end of the Golden Age of Alpinism. What exactly happened in the crash? This commemorative volume keeps the memory alive.

From the Wetterhorn in 1854 to the Matterhorn in 1865 - from triumph to tragedy - the Alps were conquered in a decade. It was what Reverend W.A.B. Coolidge called the 'golden age of alpinism,' the era of the first great guides (Christian Almer, Melchoir Anderegg, Michel Croz) and gentlemen climbers (Leslie Stephen, John Tyndall, Edward Whymper). Almost all European Alpine clubs were founded during this period, crowned by the successful ascents of the Aiguille Verte, the Matterhorn, and the Brenva face of Mont Blanc. Summits were no longer scaled in the name of science, but for the beauty and difficulty of ascents that embodied the pleasure of the 'noble sport' of mountaineering, as invented during this golden decade. 1865: the Golden Age of Mountaineering, by Gilles Modica, documents this great time in the history of alpinism. Illustrated with 350 photographs and illustrations and lavishly produced, it is co-published in English and French by Vertebrate Publishing and Éditions Paulsen.

Zermatt is a municipality in the district of Visp in the German-speaking section of the canton of Valais in Switzerland. It has a population of about 5,800 inhabitants and is classified as a town by the Swiss Federal Statistical Office (FSO).It lies at the upper end of Mattertal at an elevation of 1,620 m (5,310 ft), at the foot of Switzerland's highest peaks. It lies about 10 km (6.2 mi) from the over 10,800 ft (3,291.84 m) high Theodul Pass bordering Italy.Zermatt is famed as a mountaineering and ski resort of the Swiss Alps. Until the mid-19th century, it was predominantly an agricultural community; the first and tragic ascent of the Matterhorn in 1865 was followed by a rush on the mountains surrounding the village, leading to the construction of many tourist facilities. The year-round population (as of December 2017) is 5,643, though there may be several times as many tourists in Zermatt at any one time. Much of the local economy is based on tourism, with about half of the jobs in town in hotels or restaurants and just under half of all apartments are vacation apartments. Just over one-third of the permanent population was born in the town, while another third moved to Zermatt from outside Switzerland.The name of Zermatt, as well as that of the Matterhorn itself, derives from the alpine meadows, or matten (in German), in the valley. The town of Zermatt lies at the southern end of the Matter Valley (German: Mattertal), which is one of the lateral branches of the grand Valley of the Rhône. Zermatt is almost completely surrounded by the high mountains of the Pennine Alps including Monte Rosa (specifically its tallest peak, named Dufourspitze), Switzerland's highest peak at 4,634 metres (15,203 ft) above sea level.Zermatt is traversed by the main river of the valley: the Matter Vispa, which rises at the glaciers at the feet of the highest peaks: the Gorner Glacier on the east side near Monte Rosa and the Zmutt Glacier on the west side between Dent d'Hérens and Dent Blanche.To prevent air pollution, which could obscure the town's view of the Matterhorn, the entire town is a combustion-engine car-free zone. Almost all vehicles in Zermatt are battery driven and almost completely silent. Electric vehicles are allowed for local commerces. The Cantonal police can issue a permit which allows residents to drive and park at the northern outskirts and for the permission to be bring combustion engine vehicles in to the town such as construction vehicles. Emergency and municipal vehicles, (fire trucks, ambulances, police etc.) generally use combustion engines, although even some of these are non-combustion, (garbage trucks, etc.).

From Edward Whymper's ascent of the Matterhorn in the 1860s to Jon Krakauer's vivid profiles of modern mountaineers, this collection offers indelible impressions from writers who experienced the mystery and the grandeur of the mountains — and who lived to tell about it. Highlights include John Muir's "A Perilous Night on Mount Shasta" and Belmore Browne's heart-stopping "Conquest of Mt. McKinley."

Climbing the Matterhorn - A Collection of Historical Mountaineering Articles on the Brave Attempts to Scale One of the Highest Peaks in the Alps Da Capo Press

When he first saw the Alps in 1860, Edward Whymper was a 20-year-old English wood engraver whose dream was to become an arctic explorer. Ambitious and hungry for adventure, he fell in love with the challenge the Alps presented and set out to conquer them peak by peak. Whymper made quick work of the challenge, racking up dozens of first ascents and acquiring a reputation as one of the best in the nascent field of mountaineering. But on the Matterhorn, considered to be mountaineering's Holy Grail at the time, Whymper met with failure again and again. On his eighth attempted ascent he finally succeeded, becoming the first man to reach its magnificent peak. The victory came at a heavy cost, however, as Whymper watched four of his companions fall to their deaths on the descent. It was a tragedy that would cast a shadow over the remainder of his life. Published in 1871, *Scrambles Amongst the Alps* is Whymper's own story of his nine years spent climbing in the Alps. One of the first books devoted to the sheer thrill of mountaineering, it is a breathtaking account of the triumph of man over mountain in a time before thermal clothing, nylon ropes, global positioning systems, and air rescues. It also offers Whymper's controversial story of the tragedy on the Matterhorn. One of the best adventure books of all time, *Scrambles Amongst the Alps* is an essential classic of climbing literature by one of mountaineering's most legendary figures.

This is the black and white interior version of *The Aspirant* which is also available as a full color paperback. At age 15 Roger Beaudoin's fascination with the Matterhorn was seeded. On a family trip to Disneyland, he stood in awe before a 300 foot high replica of the Alps' most famous mountain peak. Later in 1988, as graduate student on holiday, he saw the real Matterhorn for the first time on a train to Zermatt, seated among a throng of mountain climbers. If they can do it, he thought, he could too, and he determined he would summit it someday. His dream became a 10 year obsession that led a naïve young hiker back to Europe. He was ill prepared, even ill dressed for his first long hike along a dangerous trail that led from Zermatt. Hours later, only good luck spared him from his lack of experience, and he soon understood the depth of preparation needed to develop safe climbing skills. His growing respect for the task led to the ever-increasing knowledge needed to undertake the climb. After all, since Edward Whymper's first Matterhorn ascent, the climb led too many others to their death. "I was set on attempting to summit the Matterhorn," Beaudoin said. "but I was intimidated, fearful, and put obstacles in my own path. I learned that with basic fitness, instruction and an expert guide, I could challenge even a world-class peak. From the Tetons of Wyoming to the Alps of Europe, there are endless challenges and beauty to be discovered in the mountains. My hope is that *The Aspirant* will inspire other hikers and outdoor enthusiasts to climb." For those who hope to, *The Aspirant* is filled with technical tips, terms and explanations, practical advice, travel suggestions, and hard-won, inside knowledge. While *The Aspirant* is about a mountain and a climb, Beaudoin's journey is a metaphor for his readers. It is the story of single-minded determination to summit the Matterhorn which the author did, twice. It is about staying with a goal. "Everyone has their own 'Matterhorn' in life," says Beaudoin, "whether yours is a mountain or an ambition. Pursue it as long as it takes, no matter how difficult. Taking on the unknown teaches you about yourself, and your life is fuller for it."

The Citadel It stands unconquered, the last great summit of the Alps. Only one man has ever dared to approach the top, and that man died in his pursuit. He was Josef Matt, Rudi Matt's father. At sixteen, Rudi is determined to pay tribute to the man he never knew, and complete the quest that claimed his father's life. And so, taking his father's red shirt as a flag, he heads off to face the earth's most challenging peak. But before Rudi can reach the top, he must pass through the forbidden Fortress, the gaping chasm in the high reaches of teh Citadel where his father met his end. Rudi has followed Josef's footsteps as far as they will take him. Now he must search deep within himself to find the strength for the final ascent to the summit -- to plant his banner in the sky. His father died while trying to climb Switzerland's greatest mountain -- the Citadel -- and young Rudi knows he must make the assault himself.

Matterhorn Mountains Around the World

In 1985 before AIDS was a word, 10 year old Henry Nicols, a hemophiliac, was infected with the deadly virus from a blood transfusion. For years his family kept the secret about AIDS from everyone. In 1991, a senior in high school and deathly ill, 17 year old Nicols boldly announced to the world "I have AIDS." Protected by his community of Cooperstown, NY (the Home of Baseball) Nicols quickly became a celebrity and a poster child for AIDS understanding. He then became an international AIDS advocate and educator, travelling around the U.S. and the world spreading a message of compassion and love. Nicols died of complications of AIDS in 2000. This memoir, written by his father, is the legacy of a brave child suffering from a chronic illness and then infected with the scourge of our time. As a tear-jerking page turner, *Henry for President* is a must read for anyone who wants to better understand challenge, compassion and human nature.

Matterhorn : Portrait eines Berges Mountaineers Books

Following the author's struggles on the mountain of Matterhorn, this book offers an account of the mountain's history, including the legendary first ascent in 1865, as well as a factual description of the symptoms and mechanisms of altitude sickness. No other mountain in the world is as fascinating as the Matterhorn. Since the dramatic first ascent in 1865, the drama and the myths have created a unique interest in this mountain, which has probably caused the deaths of more mountaineers than any other. Each year, thousands of climbers attempt to reach the summit, but only one in five succeeds. And every season, the mountain claims the lives of ten to twenty climbers.

Triumph and Tragedy: the Life of Edward Whymper is an engrossing account of the extraordinary life of Edward Whymper (1840-1911), the best known but perhaps least understood mountain climber of the 19th century. Acclaimed as the first to scale the Matterhorn, Whymper personifies the spirited amateurism of the Golden Age of Mountaineering (1854-1865). Triumph and Tragedy accompanies a young but supremely confident Whymper on exhilarating ascents and narrow escapes amid beautiful, often dangerous Alpine peaks. The book lays bare the trauma of his companions' deaths on the Matterhorn, and empathizes with him during the intense pressures of the accident's aftermath. Emil Henry's thoroughly researched biography then moves on to Whymper's post-Matterhorn years. Following the publication of his classic Scrambles Amongst the Alps, Whymper travels first to Greenland's unexplored interior and then to the high Andes mountains of South America where he becomes the first westerner to reach a 20,000 foot summit. In later life he is recognized as a noted explorer and the author of two best-selling books illustrated with drawings from a sketch-pad kept always in his shirt pocket. Triumph and Tragedy: the Life of Edward Whymper offers new and refreshing insights into the life of this notable Victorian personality. Spread throughout the book are examples of Whymper's accomplishments as an author, artist, natural

scientist, pioneering photographer, lecturer, and raconteur.

Traversing a century of climbing that begins with Victorian enthusiasts and ends with the conquerors of the Himalayan peaks, Mountain Men tells the stories of the extraordinary men who were the first to climb the world's best-known mountains: the Matterhorn, McKinley, Everest, and K2. Edward Whymper's relentless siege of the Matterhorn ended in controversy when four of his companions plunged to their deaths an hour after leaving the summit. In Alaska there have been many disputed claims to the first conquest of Mt. McKinley, and locals still insist that the honor belongs to three miners who climbed on a bet, armed with homemade climbing irons and bags of donuts. For a hundred years mountaineers have fallen victim to the fatal attraction of K2. An Italian aristocrat, an American millionaire, and an English Satanist were among the first to reach its slopes. They found a place of disappointment and madness; one of them never returned. Accompanied by unique archival materials, detailed maps, and photographs, Mountain Men invites us to follow in the footsteps of these fearless explorers, and tells us their stories with all the romance and audacity, bravado and suffering, courage and miscalculation intact.
