An illuminating reassessment of the architect whose innovative drawings of ruins shaped the enduring image of ancient Rome Giuliano da Sangallo (1443–1516) was one of the first architects to draw the ruins and artifacts of ancient Rome in a systematic way. Cammy Brothers shows how Giuliano played a crucial role in the Renaissance recovery of antiquity, and how his work transformed the broken fragments of Rome's past into the image of a city made whole. Drawing new insights from the Codex Barberini and the Taccuino Senese—two exquisite collections of Giuliano's drawings on parchment—Brothers reveals how the Florentine architect devoted enormous energy to the representation of ruins, and how his studies of Rome formed an integral part of his work as a designer. She argues that Giuliano's inventive approach, which has often been mischaracterized as fantastical or naive, infused the architect's craft with the sensibilities of a poet and painter. Brothers demonstrates how his drawings form the basis for a reevaluation of the meaning and method of the Renaissance study of ancient artifacts, and brings to life the transformative moment when artists and architects began to view the fragments of ancient Rome not as broken artifacts of little interest but as objects of aesthetic contemplation. Featuring a wealth of Giuliano's magnificent drawings, this compelling book provides an incomparable lens through which to explore essential questions about the aesthetic value, significance, and the uses of the past for today's architects.

La seconda edizione aggiornata del volume, realizzata in italiano e in inglese, ha la finalità di far conoscere l'incidenza e l'importanza delle differenti sedi dell'Università Federico II tanto nel contesto urbano dell'area metropolitana di Napoli quanto in quello regionale. Una pubblicazione in occasione degli 800 anni della Federico II, che cadranno il 5 giugno del 2024. Le sedi della Federico II, raccolte in questo volume e descritte dai colleghi appartenenti all'area di storia dell'architettura della nostra università, sono fortemente legate alla storia della città, dall'alto medioevo all'età moderna e contemporanea. Infatti, attraverso la loro descrizione, emergono eventi legati alla storia civile, politica e a quella dell'arte con l'evoluzione del gusto e delle diverse forme artistiche. L'obiettivo della pubblicazione è quello di far comprendere il ruolo significativo delle sedi della Federico II, dalla parte più antica del centro storico della città alle più recenti che si sono aggiunte al già vastissimo patrimonio federiciano - come le sedi di Scampia, di Bacoli, di Avellino, di Castel Volturno e di Torre Lama nel salernitano -, e come queste pregevoli architetture, ricche di artisticità diffusa, grazie all'Università vengono conservate, rifunzionalizzate, valorizzate e offerte alla fruizione di un grande pubblico.

These handy, take-along walking guides--filled with essential maps, inspirational photos, and insider tips--showcase the world's great cities in a practical, streamlined, itinerary-driven format. In Rome, to walk in places rich in history, savor the majestic atmosphere of St. Peter, and mingle with the crowd in the streets and squares, a good guide is needed. The city is built on a complex structure, with street names changing from one block to another and roads that curve, rise, and fall through the legendary seven hills on which the capital of the Roman Empire was founded. The Tiber contains much of the historic center on its left bank, while Trastevere and the Vatican are on the right. This comprehensive and beautifully illustrated guidebook offers 16 carefully planned itineraries, created by a National Geographic expert travel writer, that highlight the best attractions the city has to offer. Plus, you will find practical tips on what to see, eat, and do to experience the authentic culture of Rome beyond the Colosseum and ancient ruins. Useful information throughout ensures a rewarding, authentic, and memorable urban experience. Choose to walk or drive along one--or all--of these paths to explore Rome at its finest.

From biblical times to the onset of the Black Death in the fourteenth century, leprosy was considered the worst human affliction, both medically and socially. Only fifty years ago, leprosy, or Hansen's disease, was an incurable infectious illness, and it still remains a grave global concern. Recently, leprosy has generated attention in scholarly fields from medical science to the visual arts. This interdisciplinary art-historical survey on lepra and its visualization in sculpture, murals, stained glass, and other media provides new information on the history of art, medicine, religion, and European society. Christine M. Boeckl maintains that the various terrifying aspects of the disease dominated the visual narratives of historic and legendary figures stricken with leprosy. For rulers, beggars, saints, and sinners, the metaphor of leprosy becomes the background against which their captivating stories are projected.

The monograph is a first-ever attempt at reconstructing on paper the monastery of Tho.ling, the most important religious site of West Tibet. Part 1 assesses the history of Tho.ling from its foundation in 996 by the monk-king Ye shes'od and the translator Rin chen bzang po, up to the 19th century. Part 2 uses hitherto unknown documents belonging to Tho.ling to identify all its temples chapels, stupas and other buildings composing the monastic complex.

Repositories for low use books have long existed for the larger cultural institutions across the globe. Libraries have long been strong developers of off-site storage. This need has evolved for libraries because of their continuous collection of print materials as a record of the intellectual and cultural output of different cultures. Libraries have had this role described neatly and executed as a clear professional role. This new book will primarily examine two aspects of this role: Firstly, the organisational and technological responses to this evolving role will be explored and secondly, the wide breadth of strategic responses to challenges of 'digital' will be detailed. In this authors to this edited volume will describe their work for libraries but increasingly for Galleries, Archives and Museums. The papers are drawn from Europe, United Kingdom, the United States and Australasia. The organisational models discussed in the book provide clear illustration of imaginative responses to the plight of the individual institutional library. New organisational models are shaping the way in which business can be done in times of change. The pressures today on all cultural institutions are similar and so there is a new convergence of similar need and similar solutions. This book is an acknowledgment that there are a wide variety of strategic, organisational and technological responses to the retention of cultural objects whether they be books, art, records or other cultural objects. It is illustrative of the power of good lateral thinking and planning by professionals, of the power of international networks and of convergence in response to need. The book will be an edited with a future perspective by Pentti Vattulainen and Steve O'Connor who have had significant experience in this area internationally.

What do we talk about when we talk about antiquity? For the majority of the population, the term immediately transports us to the notion of an ancient age or ancient world (the Parthenon, Athens, and the Coliseum of Rome), which condenses in itself the Greco-Roman world. This reduces antiquity to antiquity that was structurally essential for the construction and emergence of the civilization called occidental. For others, because of their religious backgrounds, antiquity goes back in time and enlarges, in part, its space of action, allowing the emergence of Palestine as a primordial territory. But these two visions (old and supported by a scientific ignorance of the ancient geographies and chronologies) enclose the history in a limited time and space. As if there would never have been a world before that time. As if the civilization that we comfortably call ourselves as inheritors, the so-called "Occidental Civilization" was the first step in the history of man on earth.

Antiquity and Its Reception Oxford University Press

The ancient ruins of Southeast Asia have long sparked curiosity and romance in the world's imagination. They appear in accounts of nineteenth-century French explorers, as props for Indiana Jones' adventures, and more recently as the scene of Lady Lara Croft's fantastical battle with the forces of evil. They have been featured in National Geographic magazine and serve as backdrops for popular television travel and reality shows. Now William Chapman's expansive new study explores the varied roles these monumental remains have played in the histories of Southeast Asia's modern nations. Based on more than fifteen years of travel, research, and visits to hundreds of ancient sites, *A Heritage of Ruins* shows the close connection between "ruins conservation" and both colonialism and nation building. It also demonstrates the profound impact of European-derived ideas of historic and aesthetic significance on ancient ruins and how these continue to color the management and presentation of sites in Southeast Asia today. Angkor, Pagan (Bagan), Borobudur, and Ayutthaya lie at the center of this cultural and architectural tour, but less visited sites, including Laos's stunning Vat Phu, the small temple platforms of Malaysia's Lembah Bujang Valley, the candi of the Dieng Plateau in Java, and the ruins of Mingun in Burma and Wiang Kum Kam near Chiang Mai in northern Thailand, are also discussed. All share a relative isolation from modern urban centers of population, sitting in park-like settings, serving as objects of tourism and as lynchpins for local and even national economies. Chapman argues that these sites also remain important to surrounding residents, both as a means of income and as continuing sources of spiritual meaning. He examines the complexities of heritage efforts in the context of present-day expectations by focusing on the roles of both outside and indigenous experts in conservation and management and on attempts by local populations to reclaim their patrimony and play a larger role in protection and interpretation. Tracing the history of interventions aimed at halting time's decay, Chapman provides a chronicle of conservation efforts over a century and a half, highlighting the significant part foreign expertise has played in the region and the ways that national programs have, in recent years, begun to break from earlier models. The book ends with suggestions for how Southeast Asian managers and officials might best protect their incomparable heritage of art and architecture and how this legacy might be preserved for future generations.

Walking Rome. The Best of the City Routledge

Understanding Art is a two-volume, fully illustrated work that strives to explain and discuss four important periods in the history of western art--the Romanesque, Gothic, Renaissance, and Baroque. It aims to create a sense of understanding, recognition, and appreciation of art by analysing, within the four periods, three distinct artistic genres: painting; sculpture; and architecture. Besides the excellence of the illustrations, one of the great virtues of this book is its clear and concise explanations. It is truly an excellent first stop for anyone embarking on a serious study of art--or anyone wishing to refresh his or her memory of the facts about the art history of the western world.

The complex of Ss. Quattro Coronati in Rome is situated on the Caelian Hill between the Basilica of San Giovanni in Laterano and the valley of the Colosseum. Its diverse archaeological background together with the artistic and architectonic quality of its various components and the spirituality that permeates it to this day make it one of the most fascinating monumental sites in the city. This guide provides a brief account of the entire history of the complex from its obscure Paleochristian origins up until today, and examines its most significant attributes, devoting particular attention to the recent discoveries that have further underlined its importance.

Encounters, Excavations and Argosies Routledge

This book examines the influence of architectural design in the conservation of historic buildings by discussing in detail an important building complex in Rome: the Temple of Venus and Rome, the

monastery of Santa Maria Nova and the church of Santa Francesca Romana. As the most complete site in the Roman Forum that has reached our times with a rich architectural stratification almost intact, it is a clear product of continuous preservation and transformation and it has not been studied in its complexity until now. The Temple of Venus and Rome and Santa Francesca Romana at the Roman Forum unravels the original designs and the subsequent interventions, including Giacomo Boni's pioneering conservation of the monastery, carried out while excavating the Roman Forum in the early twentieth century. The projects are discussed in context to show their significance and the relationships between architects and patrons. Through its interdisciplinary focus on architectural design, conservation, archaeology, history and construction, this study is an ideal example for scholars, students and architects of how to carry out research in architectural conservation.

This book explores the insights that Cultural Astronomy provides into the classical Roman world by unveiling the ways in which the Romans made use of their knowledge concerning the heavens, and by shedding new light on the interactions between astronomy and heritage in ancient Roman culture. Leading experts in the field present fascinating information on how and why the Romans referred to the sky when deciding upon the orientation of particular monuments, temples, tombs and even urban layouts. Attention is also devoted to questions of broader interest, such as the contribution that religious interpretation of the sky made in the assimilation of conquered peoples. When one considers astronomy in the Roman world it is customary to think of the work and models of Ptolemy, and perhaps the Julian calendar or even the sighting of the Star of Bethlehem. However, like many other peoples in antiquity, the Romans interacted with the heavens in deeper ways that exerted a profound influence on their culture. This book highlights the need to take this complexity into account in various areas of research and will appeal to all those who wish to learn more about the application of astronomy in the lives and architecture of the Romans.
