The main purpose of this book is to act as a how-to reference manual for outfitting your RV or mobile home with the tools to support your working and life style and is written from the perspective of traveling full-time on the road. A secondary purpose is to supply information for persons to boondock where they wish and still have the electrical conveniences without having shore power. You will find topics on electrical systems, computers, solar energy and communications. Most all of the components referred to in the book are easily found at any computer retail store, hardware store and of course, on-line. You can save hundreds of dollars by installing your RV systems and have the pleasure and satisfaction of doing it yourself. The examples illustrated are a starting point to give you ideas on how to make changes to your RV. You will find detailed pictures, schematics and illustrations throughout the book to guide you along the way. There is also a reference section for finding the components you need and to further explore a topic. Included is a glossary of technical definitions for terms and abbreviations. For the more technically inclined, there are sections interspersed all throughout the chapters that provide ancillary information on the topic being discussed. Go to these Sidebars to learn more about the technology or feature. For those that work on the road, replicating your home or work office into a mobile office in the past has been difficult and frustrating to achieve because you could not accomplish all the same features and functions that are required to perform your job. As time has progressed, technology and people's inventiveness have continued to progress and seems to be progressing in an increasing geometric fashion. Obviously, this is good news for the mobile worker or mobile entrepreneur. Today, as of the writing of this book, the technology is available to match the performance and functionally of a brick and mortar establishment.

[Marketing Information Guide](#) Apa Publications (UK) Limited
In American popular imagination, the mobile home evokes images of cramped interiors, cheap materials, and occupants too poor or unsavory to live anywhere else. Since the 1940s and '50s, however, mobile home manufacturers have improved standards of construction and now present them as an affordable alternative to conventional site-built homes. Today one of every fourteen Americans lives in a mobile home. In The Unknown World of the

Mobile Home authors John Fraser Hart, Michelle J. Rhodes, and John T. Morgan illuminate the history and culture of these often misunderstood domiciles. They describe early mobile homes, which were trailers designed to be pulled behind automobiles and which were more often than not poorly constructed and unequal to the needs of those who used them. During the 1970s, however, Congress enacted federal standards for the quality and safety of mobile homes, which led to innovation in design and the production of much more attractive and durable models. These models now comply with local building codes and many are designed to look like conventional houses. As a result, one out every five new single-family housing units purchased in the United States is a mobile home, sited everywhere from the conventional trailer park to custom-designed "estates" aimed at young couples and retirees. Despite all these changes in manufacture and design, even the most immobile mobile homes are still sold, financed, regulated, and taxed as vehicles. With a wealth of detail and illustrations, *The Unknown World of the Mobile Home* provides readers with an in-depth look into this variation on the American dream. -- Karl Raitz, University of Kentucky, author of *The National Road Manufactured Home Installation Training Manual* Apa Publications (UK) Limited

Crise oblige, le camping est devenu tendance. Mais à côté de la toile de tente traditionnelle, on voit se développer une nouvelle forme d'habitat : le "mobile home", mieux connu en français sous la dénomination de "résidence mobile de loisirs". Devenu produit incontournable dans les campings, on estime qu'il y a en France aujourd'hui près de 400 000 mobile homes et qu'il s'en vend environ 25 000 par an. Moins cher qu'une résidence secondaire classique, on estime également que près de 220 000 de ces mobile homes appartiennent à des particuliers. Professionnels ou particuliers, si tentant qu'il puisse être, le choix d'investir dans l'achat d'un mobile home ne doit pas se faire à la légère. Législation, budget, achat, équipements, installation, charges et fiscalité, contrat d'emplacement, conditions de sous-location, vente, destruction... Autant de critères à étudier de près ! Sans oublier pour les particuliers qu'il faut également s'inquiéter du choix du camping où sera installé le mobile home. Quel est son classement au vu de la nouvelle réglementation, ses labels, son accessibilité aux handicapés, ses animations... Questions

cruciales si vous désirez sous-louer votre mobile home par la suite ! Voici des réponses claires et précises à toutes ces questions !
