How much do we know

about why we buy?
What truly influences

our decisions in today’s
message-cluttered

world? In *Buyology*,
Martin Lindstrom

presents the
astonishing findings

from his
groundbreaking three-

year, seven-million-

dollar neuromarketing
study—a cutting-edge

experiment that

peered inside the
brains of 2,000

volunteers from all

around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores:

- Does sex actually sell?
- Does subliminal advertising still surround us?
- Can “cool” brands trigger our mating instincts?
- Can our other senses—smell, touch, and sound—be aroused when we see a product?

Buyology is a fascinating and shocking journey into the mind of today’s consumer that will captivate anyone who’s been seduced—or turned off—by marketers’ relentless attempts to win our

loyalty, our money,
and our minds.

Twelve Years a Slave is
Northup's moving
memoir, revealing
unimaginable details of

the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War. The naive plans of our youth often escalate to a point beyond our understanding or control. This is the story of a young man that at every turn believed the resolution for every problem was just around the next

bend in the road of life. Instead with every turn came only more problems and hopelessness until finally one man came into his life showing him that during his life he was walking on the graves of his predecessors and that final the grave was an empty tomb.

Space expert Mike Bara looks at the secret space program of the American military that has been going on for over 60 years. Bara looks the Army Ballistic Missile Agency (TM)s proposed Project Horizon which was a study to determine the feasibility of constructing a scientific / military base on the Moon. On

June 8, 1959, a group at the Army Ballistic Missile Agency (ABMA) produced for the U.S. Department of the Army a report entitled Project Horizon, A U.S. Army Study for the Establishment of a Lunar Military Outpost. The permanent outpost was predicted to cost \$6 billion and was to become operational in December 1966 with twelve soldiers stationed at the Moon base. Wernher von Braun, head of ABMA, appointed Heinz-Hermann Koelle to head the project team at Redstone Arsenal. Their plans called for 147 early Saturn A-class rocket launches to loft spacecraft components for assembly in low Earth orbit at a spent-tank space station. A lunar landing-and-return

vehicle would have shuttled up to 16 astronauts at a time to the base and back. While officially Project Horizon was scrapped by the military, or was it? Bara looks into the secret space program, the possibility of secret bases on the Moon and many rumors surrounding the military (TM)s secret projects in space. The book will ask and answer many questions. Was Wernher von Braun involved in the Roswell crash investigation? Why did he suddenly become fascinated with highly advanced theoretical physics propulsion systems during the Apollo years, and why did all of this public research suddenly oego black in the early 1960s? Did NASA and the

Pentagon know and expect to find evidence of alien bases on the Moon? Did the Apollo 12 astronauts deliberately damage the TV cameras in order to hide their explorations of one of these bases? What was the top secret operation? Chapel Bell experiment on Apollo 16? Has teleportation been developed from captured alien technology and used to transport humans to secret NASA/DOD bases on Mars? Do space shuttle videos taken in the 1990s show proof of a highly advanced secret US space fleet? Does hacker Gary Mackinnon (TM)'s discovery of defense department documents identifying alien non-terrestrial officers serving in space mean that the

US has secret space platforms designed to fight a war with an alien race? And, have these secret military space platforms been photographed by civilian observers here on Earth?
