This resource guide (November 2000) is organized into four main sections: Chapter 1: Introduction Chapter 2: An introduction to the nature of the problem of racial profiling. Chapter 3: A general description of data collection and its limitations. Chapter 4: Study-site descriptions and analysis. Chapter 5: Recommendations and future goals. Chapter 6: Conclusions and Recommendations The "selected site" approach of this resource guide is intended to encourage and guide police

All About Traffic AuthorHouse Proactive policing, as a strategic approach used by police agencies to prevent crime, is a relatively new phenomenon in the United States. It developed from a crisis in confidence in policing that began to emerge in the 1960s because of social unrest, rising crime rates, and growing skepticism regarding the effectiveness of standard approaches to policing. In response, beginning in the 1980s and 1990s, innovative police practices and policies that took a more proactive approach began to develop. This report uses the term "proactive policing" to refer to all policing strategies that have as one of their goals the prevention or reduction of crime and disorder and that are not reactive in terms of focusing primarily on uncovering ongoing crime or on investigating or responding to crimes once they have occurred. Proactive policing is distinguished from the everyday decisions of police officers to be proactive in specific situations and instead refers to a strategic decision by police agencies to use proactive police responses in a programmatic way to reduce crime. Today, proactive policing strategies are used widely in the United States. They are not isolated programs used by a select group of agencies but rather a set of ideas that have spread across the landscape of policing. Proactive Policing reviews the evidence and discusses the data and methodological gaps on: (1) the effects of different forms of proactive policing on crime; (2) whether they are applied in a

discriminatory manner; (3) whether they are being used in a legal fashion; and (4) community reaction. This report offers a comprehensive evaluation of proactive policing that includes not only its crime prevention impacts but also its broader implications for justice and U.S. communities.

Although laws governing moving-traffic violations are fairly uniform throughout the United States, the effective levels of enforcement of these laws vary dramatically from city to city. Basing this study on statistics from nearly seven hundred police departments, census data, personal interviews, on-the-spot observation, and detailed case studies of four Massachusetts cities--Lynn, Waltham, Malden, and Cambridge--Mr. Gardiner identifies and discusses the factors that determine police decisionmaking in relation to traffic violations. After a brief description of the role of various state and local agencies in settling traffic-enforcement policy, the author analyzes in depth the traffic activities of the four Massachusetts cities. He examines in particular the extent of public pressure in seeking modification of enforcement standards, intradepartmental practices, or "norms," and the role of traffic enforcement in the total spectrum of police activities. Following the case studies, the author discusses the variations among the traffic policies of municipal police departments, and questions the "public pressure" interpretation of police policies. Mr. Gardiner finds that, although citizens and city officials frequently seek to influence individual decisions, they seldom know how strict or lenient their department's general policies are, and seldom care. In addition, the author finds no significant connection between the severity of ticketing policies and such factors as income, race, or education, but does find some correlation with the geographical stability of a city's population. Finally, the author concludes that the chief source of

departmental traffic policy is an internally established set of norms concerning the importance of traffic work and the frequency with which officers should write tickets. Evidence from cities that change their traffic policies indicates that individual preferences on the part of chiefs or ranking officers are the primary source of these norms. This book is an important contribution to the growing area in social sciences that deals with law enforcement and, more broadly, local political systems.

As I try to finish it up, I will say this: try to do your best work no matter who says differently. Try. Nobody is perfect in any way, shape, or form. I will say this: I did try to write this all up the best way I can; considering my stroke and seizure, it was really very hard to write. If you want this job, try to do it the best way you can and be really careful doing it. Watch what goes on all around you because you are the ears and eyes all around.
