Long-positioned and long-respected as a bestseller for the U.S. history survey course that focuses on political history as its framework, this textbook's most significant strength is its rich and distinctive prose. For this Eleventh Edition, co-authors Mark Carnes of Barnard College at Columbia University and John Garraty have collaborated to retell the story of Americas past. For the Eleventh Edition, the authors have written a new prologue on pre-Columbian America and the continents earliest human inhabitants, revised each chapter to incorporate recent research and scholarship, integrated more social and cultural history, selected many new illustrations and written informative new captions to engage students visually, introduced two new features, and updated the final chapter (33) to carry the story through the election of 2000, the beginnings of the Bush administration, and the events and aftermath of September 11, 2001, which have profoundly changed the American nation and its people.

Using the political history of the nation as the framework on which social, economic, and cultural developments depend, co-authors Carnes and Garraty describe how the voices and actions of many peoples have produced a particular political structure the United States, a single nation and how that nation has in turn influenced the lives of everyone. Long-renowned for its elegant narrative style, *The American Nation* in this Twelfth Edition retains its most significant strengths its rich and memorable prose. In this revision, the authors have revised each chapter to incorporate recent research and scholarship, refined the prose style, greatly expanded the number of maps, selected many new illustrations to engage students visually, and written informative, new captions to encourage students to reflect on the information conveyed in the illustration. In each chapter, a new feature, "Debating the Past" presents the varying views of historians on a question related to the chapter content. The final chapter (33) carries the story of the American nation to the present with coverage of the war in Iraq and the election of 2004.

In all ages, nations and powers have striven to attain to the dominion of the world, but hitherto not one of them has erected its power on so broad a foundation [as industry, commerce, and navigation]. How vain do the efforts of those appear to us who have striven to found their universal dominion on military power... -from "Chapter 33: The Insular Supremacy and the Continental Powers- North America and France" One of the most prominent economic philosophers of the 19th century,

on a par with-but espousing quite different thinking than-Karl Marx and Adam Smith explores, in the three-volume National System of Political Economy, a reasoned doctrine of national and pan-national management of trade, a global collaboration between government and business. Volume 3 explores the economic and political systems that nurture ascendant nations in their global sovereignty. A close reading of this 1841 classic is an absolute necessity for anyone who hopes to understand world economic history of the last 150 years. German economist and journalist FRIEDRICH LIST (1789-1846) served as professor of administration and politics at the University of Tbingen, but was later jailed and later exiled to America for his political views. His is also the author of Outlines of American Political Economy (1827).

Long respected for its lush narrative and balanced coverage, A Short History of The American Nation uses political history as the framework for an engaging discussion of social, economic, and cultural developments in this country. Numerous anecdotes, new biographical portraits (new American Lives essays), and extensive quotations help give students a closer view of the major figures and events on the American historical stage. Mark Carnes joins John Garraty in preparing the Eighth Edition of A Short History of The American Nation. Selected by Garraty, Mark Carnes' scholarly specialization in cultural and social issues, especially gender, complements Garraty's specialty in politics and the economy. In the new edition of this bestseller, every chapter has been reviewed and updated with a substantially rewritten Chapter 1, a new, final Chapter 33, "Crimes and Misdemeanors," and reorganized Chapters 29 - 32. New material on women has been added throughout the book. The new, four-color format of the Eighth Edition enhances the value of the map program. Many more photographs have been added, making the book more visually compelling and accessible. New captions emphasize how illustrations interpret the past.

Long positioned and respected as a bestseller for the market segment that focuses on political history as its framework, this textbook's most significant strength is its rich and distinctive prose. For this Tenth Edition, Garraty selected a distinguished co-author, Mark Carnes of Barnard College at Columbia University, to join him in revising The American Nation. The two have collaborated on and co-edited the prestigious American National Biography Series by Oxford, as well as Mapping America's Past, a well-known trade atlas for Henry Holt. Throughout the new Tenth Edition, the authors updated the scholarship, integrated more social and cultural history, revised the final chapters, and added a new chapter (33) to better address issues of the 1990s that culminated in the Clinton impeachment scandal.
