Guidelines
Feb 28, 2023
· The end-of-
life period
—when body

systems shut down and death is imminent—typically lasts from a matter of days to a couple of weeks. Some patients die gently and tranquilly, while others seem to fight the inevitable. Reassuring your loved one it is okay to die can help both of you through this process.

End-of-Life Care: Clinical Practice Guidelines - amazon.com

What's the Difference? End-of-life care generally refers to

patient care before death, either while undergoing curative treatment or after. With some serious illnesses, prognosis is uncertain and it is unclear if the care provided is end-of-life or life. When patients have a prognosis of six months, End of Life Care Clinical Pathway — Emergency Department | Children's Hospital of Philadelphia Emergency Department Clinical Pathway for End of Life
