Warped: Gay Normality and Queer Anti-Capitalism shows how the successive 'same-sex formations' of the past century and a half have led to both gay 'normality' and queer resistance. It sees sexual rebellions and queer social justice struggles as harbingers of a queer anti-capitalism.

From the moment Captain America punched Hitler in the jaw, comic books have always been political, and whether it is Marvel's chairman Ike Perlmutter making a campaign contribution to Donald Trump in 2016 or Marvel's character Howard the Duck running for president during America's bicentennial in 1976, the politics of comics have overlapped with the politics of campaigns and governance. Pop culture opens avenues for people

to declare their participation in a collective project and helps them to shape their understandings of civic responsibility, leadership, communal history, and present concerns. Politics in the Gutters: American Politicians and Elections in Comic Book Media opens with an examination of campaign comic books used by the likes of Herbert Hoover and Harry S. Truman, follows the rise of political counterculture comix of the 1960s, and continues on to the graphic novel version of the 9/11 Report and the cottage industry of Sarah Palin comics. It ends with a consideration of comparisons to Donald Trump as a supervillain and a look at comics

connections to the pandemic and protests that marked the 2020 election year. More than just escapist entertainment, comics offer a popular yet complicated vision of the American political tableau. Politics in the Gutters considers the political myths, moments, and mimeses, in comic books—from nonfiction to science fiction, superhero to supernatural, serious to satirical, golden age to present day—to consider how they represent, represent, underpin, and/or undermine ideas and ideals about American electoral politics.

Westerns Simon and Schuster
For nearly two centuries, Americans have embraced the Western like no other artistic genre. Creators and consumers alike have utilized this story form in literature, painting, film, radio and television to explore questions of

national identity and purpose. *Westerns: The Essential Collection* comprises the *Journal of Popular Film and Television's* rich and longstanding legacy of scholarship on Westerns with a new special issue devoted exclusively to the genre. This collection examines and analyzes the evolution and significance of the screen Western from its earliest beginnings to its current global reach and relevance in the 21st century. *Westerns: The Essential Collection* addresses the rise, fall and durability of the genre, and examines its preoccupation with multicultural matters in its organizational structure. Containing eighteen essays published between 1972 and 2011, this seminal work is divided into six sections covering Silent Westerns, Classic Westerns, Race and Westerns, Gender and Westerns, Revisionist Westerns and Westerns in Global Context. A wide range of international contributors offer original critical perspectives on the intricate relationship between American culture and Western films and television series. *Westerns: The Essential Collection* places the

genre squarely within the broader aesthetic, socio-historical, cultural and political dimensions of life in the United States as well as internationally, where the Western has been reinvigorated and reinvented many times. This groundbreaking anthology illustrates how Western films and television series have been used to define the present and discover the future by looking backwards at America's imagined past.

Simple cuts many long

encapsulates a long-standing tradition in

modern and

contemporary linguistics.

The theoretical scope of the book encompasses a lengthy review of relevant studies in the area of critical discourse analysis (CDA), and, more broadly, in the areas of power, control, ideology and politics as realized and enacted in discourse. The

book also brings together a detailed theoretical background on the main tenets and assumptions, tools and recipes, trends and extensions and critiques and applications of critical and political discourse analysis (PDA). Its analytical focus is predominantly on how ideology and power are linguistically and meta-linguistically realized, specifically through transitivity, modality, metadiscourse and presupposition in some discourse genres in English.

The Triumph of William McKinley BRILL

The essence of life in an oligarchy like George Orwell presents in '1984' is that freedom of choice is virtually non-existent. But what happens when so many trivial and meaningless choices inundate a culture such as our own and freedom itself becomes devalued? In 'A Do-It-Yourself Dystopia', through a variety of essays, Steven Carter addresses this and other issues in a wide-ranging search for hidden oligarchies of the American self.

As cartoonist, author,

public speaker, blogger, and periscoper, Scott Adams has had best-sellers in several different fields: his Dilbert cartoons, his meditations on the philosophy of Dilbert, his works on how to achieve success in business and all other areas of life, his two remarkable books on religion, and now his controversial work on political persuasion. Adams's two most recent best-sellers are *How to Fail at Almost Everything and Still Win Big: Kind of the Story of My Life* (2014) and *Win Bigly: Persuasion in a World Where Facts Don't Matter* (2017). Adams predicted Donald Trump's election victory (on August 13th 2016) and has explained then and more recently how Trump operates as a Master Persuader, using "weapons-grade" persuasive techniques to defeat his opponents and often to stay several moves ahead of them. Adams has provocative ideas in many areas, for example his outrageous claim that 30 percent of the population have absolutely no sense of humor, and take their cue from conventional opinion in deciding whether something is a joke, since they have no way of

deciding this for themselves. In *Scott Adams and Philosophy*, an elite cadre of people who think for a living put Scott Adams's ideas under scrutiny. Every aspect of Adams's fascinating and infuriating system of ideas is explained and tested. Among the key topics: Does humor inform us about reality? Do religious extremists know something the rest of us don't? What are facts and how can they not matter? What happens when confirmation bias meets cognitive dissonance? How can we tell whether President Trump is a genius or just dumb-lucky? Does the Dilbert philosophy discourage the struggle for better workplace conditions? How sound is Adams's claim that "systems" thinking beats goal-directed thinking? Does Dilbert exhibit a Nietzschean or a Kierkegaardian sense of life? Or is it Sisyphian in Camus's sense? Can truth be over-rated? "The political side that is out of power is the side that hallucinates the most." If there's a serious chance we're living in a Matrix-type simulation, how should we change our behavior? Are most public policy issues just too

complex and technical for most people to have an opinion about? In politics, says Adams, it's as if different people watch the same movie at the same time, some thinking it's a romantic comedy and others thinking it's a horror picture. How is that possible? Does logic play any part in persuasion?

"Should be in the hands of every history teacher in the country."— Howard Zinn
James Loewen has revised *Teaching What Really Happened*, the bestselling, go-to resource for social studies and history teachers wishing to break away from standard textbook retellings of the past. In addition to updating the scholarship and anecdotes throughout, the second edition features a timely new chapter entitled "Truth" that addresses how traditional and social media can distort current events and the historical record.
