During the past decade and a half, the National Research Council, through its Committee on National Statistics, has carried out a number of studies on the application of statistical methods to improve the testing and development of defense systems. These studies were intended to provide advice to the Department of Defense (DOD), which sponsored these studies. The previous studies have been concerned with the role of statistical methods in testing and evaluation, reliability practices, software methods, combining information, and evolutionary acquisition. Industrial Methods for the Effective Testing and Development of Defense Systems is the latest in a series of studies, and unlike earlier studies, this report identifies current engineering practices that have proved successful in industrial applications for system

development and testing. This report explores how developmental and operational testing, modeling and simulation, and related techniques can improve the development and performance of defense systems, particularly techniques that have been shown to be effective in industrial applications and are likely to be useful in defense system development. In addition to the broad issues, the report identifies three specific topics for its focus: finding failure modes earlier, technology maturity, and use of all relevant information for operational assessments.

This booklet offers suggestions to students on how to improve their study skills, with a focus on making more efficient and effective use of their study time. Chapter 1 presents tips for identifying one's optimal study conditions and getting organized. Chapter 2 focuses on time-management strategies, such as finding and using time to study. Ways to make study time more effective are described in the third chapter. Chapter 4 outlines the SQ3R method, which is comprised of the following stages-- survey, question, read, restate, and review. Suggestions for taking good notes and ways in which parents can help their children study at home are also offered. Tips for preparing for and taking a test are offered in chapter 5, which describes how to match study techniques to one's learning style. For example, visual learners are encouraged to write lists of words and post them, make tables and timelines, and create flash cards. The use of performance portfolios as a multifaceted assessment tool is briefly discussed. In conclusion, students are encouraged to improve their study skills so that not only will they do well in school, they will continue to benefit from good habits throughout life. (LMI)

Year Book of the State of Indiana for the Year ... Penguin
The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many

parents, remains unaware. But The Knowledge Gap isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.
