MARIANA MYA

Chomp Troll
Communications
In this hysterical #1

New York Times
bestseller, one kid has
to wrangle gators,
snakes, bats that bite,
and a reality show host
gone rogue! This is
Carl Hiaasen's
Florida—where the

creatures are wild and the people are wilder! When Wahoo Cray's dad—a professional animal wrangler—takes a job with a reality TV show called Expedition Survival!, Wahoo figures he'll have to do a bit of wrangling himself to keep his father from killing Derek Badger, the show's inept and egotistical star. But the job keeps getting more complicated: Derek Badger insists on using wild animals for his stunts; and Wahoo's acquired a shadow named Tuna—a girl who's sporting a shiner courtesy of her father and needs a place to hide out. They've only been on location in the Everglades for a day before Derek gets bitten by a bat and goes missing in a storm. Search parties

head out and promptly get lost themselves. And then Tuna's dad shows up with a gun . . . It's anyone's guess who will actually survive Expedition Survival. . . “Only in Florida—and in the fiction of its native son Carl Hiaasen—does a dead iguana fall from a palm tree and kill somebody.” —New York Post “Chomp is a delightful laugh-out-loud sendup of the surreality of TV that will be enjoyed by readers of all ages.” —Los Angeles Times

 It's amazing how easy it is for the tiger to pass himself off as a rug - he enjoys a life of luxury with the rajah's family, snacking on midnight feasts and playing with his

children. He goes entirely undetected, until one night, when he risks expulsion from his comfortable abode as burglars break into the palace and he has to decide whether to stay in disguise as a rug - or save the rajah from a horrible beating. However, tigers who live in houses can have happy endings, as seen in this utterly brilliant picture book.

This book is unique. It gathers texts which give the best presentation of the principles and key concepts of the Theory of Didactical Situations that Guy Brousseau developed in the period from 1970 to 1990. These texts provide a comprehensive

presentation of the Theory. In order to facilitate the reading of certain points footnotes have been added, as well as preludes and interludes to place in context the chosen texts and clarify the construction of the book.

A long time ago a mouse learned to fly . . . and crossed the

Atlantic. But what happened next? Torben Kuhlmann's stunning new book transports readers to the moon and beyond! On the heels of Lindbergh: The Tale of a Flying Mouse comes Armstrong: The Adventurous Journey of a Mouse to the Moon—where dreams are determined only by the size of your imagination and the biggest innovators are the smallest of all. The book ends with a brief non-fiction history of human space travel—from Galileo's observations concerning the nature of the universe to man's first steps on the moon.

An offbeat penguin shows his peers the power of individuality

in this humorous tale from the author of *Pookins Gets Her Way*. Tacky is an odd bird. He likes to do splashy cannonballs and greet his companions with a loud "What's happening?" In fact, he's something of an eccentric, which wouldn't be a problem if all the other penguins weren't such...conformists. When intimidating visitors invade their peaceful, nice, icy land, it'll take a lot more than a bunch of perfect penguins to save the day. Thank goodness Tacky's such an odd bird! "This book is must reading for any kid—or grown-up—who refuses to follow the pack."—Publishers Weekly

Another gripping Sally Jones adventure - the gorgeously illustrated, graphic novel prequel to *The Murderer's Ape*. This is the story of a gorilla like no other. This is the story of a fantastic voyage across the world, from the Congolese rainforest to the grand bazaar of Istanbul, from Borneo

to London, Singapore and beyond. The story of a mysterious jewel thief and a sad sailor with a heart of gold. A story of friendship and adventure on the high seas. This is the story of Sally Jones.

Puss in Boots

More than seventy years ago, the world changed forever when American forces exploded the first atomic bomb over the Japanese city of Hiroshima on August 6, 1945, starting a massive firestorm that would kill some 80,000 enemy civilians. Three days later, the US exploded a second bomb over Nagasaki, killing another 40,000. Though the bombs did not end the war, they contributed urgently to the Japanese decision to surrender and demonstrated to the

world the vast destructive power of a revolutionary new weapon. "Little Boy" and "Fat Man" originated in March 1943 when a group of young scientists, sequestered on a mesa near Santa Fe, attended a crash course in the new weapons technology. The lecturer was physicist Robert Serber, J. Robert Oppenheimer's protégé, and they learned that their job was to design and build the world's first atomic bombs. Notes on Serber's lecture, nicknamed the "Los Alamos Primer," were mimeographed and passed from hand to hand. They remained classified for decades after the war. Published for the first time in 1992, the

Primer offers contemporary readers a better understanding of the origins of nuclear weapons. Serber's preface, an informal memoir, vividly conveys the mingled excitement, uncertainty, and intensity felt by the Manhattan Project scientists. Now, 75 years since the bombs shocked the world, an updated foreword by Pulitzer Prize-winning historian Richard Rhodes offers a brief history of the development of nuclear physics up to the day when Serber stood before his blackboard at Los Alamos. A seminal publication on a turning point in human history, The Los Alamos Primer reveals just how much was known and how

terrifyingly much was
unknown midway
through the Manhattan

Project. No other
seminar anywhere has
had greater historical
consequences.
