With about 10-20% of the adult population in Europe being tattooed, there is a strong demand for publications discussing the various issues related to tattooed skin and health. Until now, only a few scientific studies on tattooing have been published. This book discusses different aspects of the various medical risks associated with tattoos, such as allergic reactions from red tattoos, papulo-nodular reactions from black tattoos as well as technical and psycho-social complications, in addition to bacterial and viral infections. Further sections are dedicated to the

composition of tattoo inks, and a case is made for the urgent introduction of national and international regulations. Distinguished authors, all specialists in their particular fields, have contributed to this publication which provides a comprehensive view of the health implications associated with tattooing. The book covers a broad range of topics that will be of interest to clinicians and nursing staff, toxicologists and regulators as well as laser surgeons who often face the challenge of having to remove tattoos, professional tattooists and producers of tattoo ink.

The emergence of crypto assets has required taxation authorities worldwide to develop unprecedented policies and compelled tax lawyers to apply existing laws in new ways. This book – the only one to focus solely on the taxation of crypto assets – provides a detailed country-by-country analysis of how the tax law of thirty-nine countries may apply to this rapidly developing area, including different use cases and compliance and documentation requirements. Following an overview of the technology and key characteristics of

crypto assets, as well as the key tax concepts and types of taxes that could apply to them, leading practitioners in each particular jurisdiction summarize the relevant tax law in that country. Fully explained are such aspects of crypto assets as the following and how they are interrelated: sales; exchanges; receipt as remuneration; forks; airdrops; mining; staking; initial coin offerings; security token offerings; and initial exchange offerings. Contributors describe how each jurisdiction applies income and capital gains taxation, value-added tax and sales tax, withholding taxes, transfer taxes, and gift, inheritance, estate and wealth taxes in the context of crypto assets. Reporting requirements and enforcement are also covered. Tax law, as it applies to crypto assets, is new and continues to evolve. This book will be welcomed as the premier resource for tax practitioners, government officials, advisors, investors, issuers, users of crypto assets, and taxation academics who are seeking informed awareness of the policy choices countries make in dealing with the taxation of this new technology. Tax lawyers dealing with crypto assets will have comprehensive practical guidance on how to comply with the tax laws of multiple jurisdictions.

The story of modernist architects in East Central Europe The first half of the twentieth century witnessed the rise of modernist architects. *Brokers of Modernity* reveals how East Central Europe turned into one of the pre-eminent testing grounds of the new belief system of modernism. By combining the internationalism of the CIAM organization and the modernising aspirations of the new states built after 1918, the reach of modernist architects extended far beyond their established fields. Yet, these architects paid a price when Europe's age of extremes intensified. Mainly drawing on Polish, but also wider Central and Eastern European cases, this book delivers a pioneering study of the dynamics of modernist architects as a group, including how they became qualified, how they organized, communicated and attempted to live the modernist lifestyle themselves. In doing so, *Brokers of Modernity* raises questions concerning collective work in general and also invites us to examine the social role of architects today. Ebook available

in Open Access. This publication is GPRC-labeled (Guaranteed Peer-Reviewed Content).

Thin-layer chromatography (TLC) is a powerful, fast and inexpensive analytical method. It has proven its usefulness in pharmaceutical, food and environmental analysis. This new edition of the practical TLC guide features a completely revised chapter on documentation, now including the use of digital cameras. Selected new sorbents and instruments are also introduced. Why has the prior edition been successful? All steps of the analytical procedure are clearly explained, starting with the choice of a suitable TLC technique and ending with data evaluation and documentation. Special emphasis is put on the proper choice of materials for TLC. Properties and functions of various materials and the TLC equipment are described, covering e. g. precoated layers, solvents and developing chambers, including information on suppliers. Many practical hints for trouble shooting are given. All this is illustrated with numerous coloured figures. How to use TLC in compliance with GLP/GMP regulations is described in detail, including the required documentation. Therefore the reader can very easily compile his own standard operating procedures.

Willkommen Mark W. Schaefer

Modern science communication has emerged in the twentieth century as a field of study, a body of practice and a profession—and it is a practice with deep historical roots. We have seen the birth of interactive science centres, the first university actions in teaching and conducting research, and a sharp growth in employment of science communicators. This collection charts the emergence of modern science communication across the world. This is the first volume to map investment around the globe in science centres, university courses and research, publications and conferences as well as tell the national stories of science communication. How did it all begin? How has development varied from one country to another? What motivated governments, institutions and people to see science communication as an answer to questions of the social place of science? *Communicating Science* describes the pathways followed by 39 different countries. All continents and many cultures are represented. For some countries, this is the first time that their science communication story has been told.
