Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and

survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

British Books in Print Penguin

The Complete Reference for Choosing, Installing, and Understanding Boat Propellers—a first of its kind reference—fully revised and updated Propeller Handbook, Second Edition demystifies the operation, behavior and selection of propellers and provides practical and detailed advice in readable, easy-to-understand language. The book will enable readers to size and select the correct propeller for their boat or for boats they may be working on. Solutions to propeller problems, installation considerations, propeller shafting, number of blades and blade area, boat speed and powering calculations and considerations, and much more are discussed in detail. In the twenty-seven years since the publication of the first edition, Propeller Handbook, has become a cornerstone resource that marine-industry professionals rely on. All material from the previous edition is completely rewritten to reflect the author's additional 27-years of experience in boat design and propeller selection since the first edition was introduced. Significant changes in the emphasis placed on factors such as blade area and propeller and engine matching, underlie the revised propeller-selection approach. Plus, the entire book has been updated to fully include metric and English units.

"Precalculus is intended for college-level precalculus students. Since precalculus courses vary from one institution to the next,

we have attempted to meet the needs of as broad an audience as possible, including all of the content that might be covered in any particular course. The result is a comprehensive book that covers more ground than an instructor could likely cover in a typical one- or two-semester course; but instructors should find, almost without fail, that the topics they wish to include in their syllabus are covered in the text. Many chapters of OpenStax College Precalculus are suitable for other freshman and sophomore math courses such as College Algebra and Trigonometry; however, instructors of those courses might need to supplement or adjust the material. OpenStax will also be releasing College Algebra and Algebra and trigonometry titles tailored to the particular scope, sequence, and pedagogy of those courses."--Preface.

An Outdoor Book for Girls Sigma Press

"Extraordinary.... A feast of history, an expert tour through thousands of years of war and conquest." —Jennifer Carson, New York Times Book Review In this far-reaching foray into the millennia-long relationship between science and military power, acclaimed astrophysicist Neil deGrasse Tyson and co-author Avis Lang examine how the methods and tools of astrophysics have been enlisted in the service of war. Spanning early celestial navigation to satellite-enabled warfare, *Accessory to War* is a richly researched and provocative examination of the intersection of science, technology, industry, and power that will introduce Tyson's millions of fans to yet another dimension of how the universe has shaped our lives and our world.

Mercury/Mariner Outboard Shop Manual

Army leaders are the competitive advantage the Army possesses that technology cannot replace nor be substituted by advanced weaponry and platforms. Today's Army demands trained and ready units with agile, proficient leaders. Developing our leaders is integral to our institutional success today and tomorrow. It is an important investment to make for the future of the Army because it builds trust in relationships and units, prepares leaders for future uncertainty, and is critical to readiness and our Army's success. Leader development programs must recognize, produce, and reward leaders who are inquisitive, creative, adaptable, and capable of exercising mission command. Leaders exhibit commitment to developing subordinates through execution of

their professional responsibility to teach, counsel, coach, and mentor subordinates. Successful, robust leader development programs incorporate accountability, engagement, and commitment; create agile and competent leaders; produce stronger organizations and teams...

The passing of time reveals much expert opinion to be nonsense.

How can we evaluate expert opinion and learn to think for ourselves?

"In the midst of an information explosion, we face a wisdom deficit," notes author J. Steve Miller. This book, in a

remarkably accessible and entertaining way, equips readers to think more clearly, innovate more creatively, see through the

deceptions of clever advertisers and salesmen, simplify complex and convoluted arguments, manage life's decisions with more

confidence, and express convictions more powerfully. This book is

designed to be read by all individuals interested in learning critical and creative thinking skills. It can also be used as a text

targeting high school seniors and college freshmen. An accompanying website offers free lesson plans and teaching tips.

Propeller Handbook, Second Edition: The Complete Reference for Choosing, Installing, and Understanding Boat Propellers Wisdom Creek Academic

A shocking insider's look at how global giants conspire to obscure the truth and manipulate our minds. Marketing visionary Martin Lindstrom has been on the front lines of the branding wars for

over twenty years. Here, he turns the spotlight on his own industry, drawing on all he has witnessed behind closed doors, exposing for the first time the full extent of the psychological tricks and traps that companies devise to win our hard-earned dollars. Picking up from where Vance Packard's bestselling classic, *The Hidden Persuaders*, left off more than half-a-century ago, Lindstrom reveals: New findings that reveal how advertisers and marketers intentionally target children at an alarmingly young age - starting when they are still in the womb! Shocking results of an fMRI study which uncovered what heterosexual men really think about when they see sexually provocative advertising (hint: it isn't their girlfriends). How marketers and retailers stoke the flames of public panic and capitalize on paranoia over global contagions, extreme weather events, and food contamination scares. The first ever neuroscientific evidence proving how addicted we all are to our iPhones and our Blackberry's (and the shocking reality of cell phone addiction - it can be harder to shake than addictions to drugs and alcohol). How companies of all stripes are secretly mining our digital footprints to uncover some of the most intimate details of our private lives, then using that information to target us with ads and offers 'perfectly tailored' to our psychological profiles. How certain companies, like the maker of one popular lip balm, purposely adjust their formulas in order to make their products chemically addictive. What a 3-month long guerrilla marketing experiment, conducted specifically for this book, tells us about the most powerful hidden persuader of them all. And much, much more. This searing expose introduces a new class of tricks, techniques, and seductions - the *Hidden Persuaders* of the 21st century- and

shows why they are more insidious and pervasive than ever.
