The aim of this work is to make available to English-language readers a translation of Jean-Baptiste Say's main texts on money and banking which were not at present accessible in English. The work includes chapters from his books taking into account the variants between the different editions, articles and hitherto unpublished manuscripts. Comprehension of these different texts is facilitated by an introduction designed to place them in their

context and by a chronological table giving the main events of Say's life and editorial activity in parallel with the main political, economic and monetary events of the time.

What life was like for ordinary French and English people, embroiled in a devastating century-long conflict that changed their world The Hundred Years War (1337-1453) dominated life in England and France for well over a century. It became the defining feature of existence for generations. This sweeping book is the first to tell the human story of the longest military conflict in history. Historian David Green focuses on the ways the war affected different groups, among them knights, clerics, women, peasants, soldiers, peacemakers, and kings. He also explores how the long war altered governance in England and France and reshaped peoples' perceptions of themselves and of their national character. Using the events of the war as a narrative thread, Green illuminates the realities of battle and the conditions of those compelled to live in occupied territory; the roles played by clergy and their shifting loyalties to king and pope; and the

influence of the war on developing notions of government, literacy, and education. Peopled with vivid and well-known characters--Henry V, Joan of Arc, Philippe the Good of Burgundy, Edward the Black Prince, John the Blind of Bohemia, and many others--as well as a host of ordinary individuals who were drawn into the struggle, this absorbing book reveals for the first time not only the Hundred Years War's impact on warfare, institutions, and nations, but also its true human cost.

The core of this book is the life story of a manuscript codex, British Library Royal MS 13 E IV: the Latin Chronicle (from the Creation to 1300) of Guillaume de Nangis, copied in the abbey library of St-Denis-en-France. The authors shed new light on the production process, identifying the illuminator of the Royal MS and naming the scribe. Detailed evidence links the codex to important events in history, such as the Council of Constance, and famous actors like Jean de France, duc de Berry, Sigismund of Luxembourg, Thomas Howard, duke of Norfolk, and Henry VIII, to name a few. The authors show how it traveled from one capital to the other, narrating the entire life and interesting times of this codex. Another dimension of this study accounts for all twenty-two copies of the Chronicle, now scattered in nine cities from London to Vienna, placing each one in a scrupulously drawn stemma codicum and sketching its history.

When we think of France, we tend think of fine food and wine, the elegant boulevards of Paris or the chic beaches of St Tropez. Yet, as the largest country in Europe, France is home to extraordinary diversity. The idea of 'Frenchness' emerged through 2,000 years

of history and it is this riveting story, from the Roman conquest of Gaul to the present day, that Cecil Jenkins tells: of the forging of this great nation through its significant people and events and and its fascinating culture. As he unfolds this narrative, Jenkins shows why the French began to see themselves as so different from the rest of Europe, but also why, today, the French face the same problems with regard to identity as so many other European nations.

This book investigates Jan Van Eyck's patronage by the Crown of Portugal and his role as diplomat-painter for the Duchy of Burgundy following his first voyage to Lisbon in 1428-1429, when he painted two portraits of Infanta Isabella, who became the third wife of Philip the Good in 1430. New portrait identifications are provided for the Ghent Altarpiece (1432) and its iconographical prototype, the lost Fountain of Life. These altarpieces are analysed with regard to King Joao I's conquest of Ceuta, achieved by his sons, who were hailed as an "illustrious generation." Strong family ties between the dynastic houses of Avis and Lancaster explain Lusitania's sustained fascination with Arthurian lore and the Grail quest. Several chapters of this book are overlaid with a chivalric veneer. A second "secret mission" to Portugal in 1437 by Jan van Eyck is postulated and this diplomatic visit is related to Prince Henry the Navigator's expedition to Tangier and King Duarte's attempts to forge an alliance with Alfonso V of Aragon. Late Eyckian commissions are reviewed in the light of this ill-fated crusade and additional new portraits are identified. The most significant artist of Renaissance Flanders appears to have been patronized as much by the House of Avis

as by the Duchy of Burgundy. Barbara von Barghahn is Professor of Art History at George Washington University and a specialist in the art history of Portugal, Spain, and their colonial dominions, as well as Flanders. In 1993, she was conferred O Grao Comendador in the Portuguese Order of Prince Henry the Navigator. She has spent nearly a decade completing research about Jan van Eyck's diplomatic visits to the Iberian Peninsula.

This study of Medieval military leadership offers a critical comparison of two great rivals of the Hundred Year War. Known to history as The Black Prince, Edward of Woodstock led the English army to victory at the Battle of Poitiers against the French King Jean II. With an illuminating analysis of these fourteenth century commanders, historian Peter Hoskins examines the importance of leadership, strategic vision, and tactical skill in medieval warfare. Paying close attention to their strengths and weaknesses as soldiers, both on campaign and on the battlefield, Hoskins also considers their contrasting characters and backgrounds as well as the military traditions of their time. The Black Prince was one of the most admired generals of his generation: a charismatic leader, decisive commander, and shrewd tactician and strategist. In contrast King Jean was impulsive, driven more by pride than by strategic priorities. When he was put to the ultimate test at Poitiers, Jean lost control of his army. Meanwhile, the Black Prince took the initiative personally to secure victory against the odds. Peter Hoskins analyses the leadership qualities of the prince and the king according to the principles of war enunciated by Sun Tzu and Vegetius as well as the modern principles of war of the United Kingdom armed

forces. He gives readers a fascinating insight into the nature of command and the conduct of war in the Middle Ages.

Philippe VI, roi en 1328, est le père de la nouvelle dynastie française des Valois, qui s'éteignit avec Henri III. En réalité, ce nouveau roi continua la dynastie des Capétiens, puisqu'il était le petit-fils de Philippe III le Hardi. Plus que dynastique, son importance dans l'histoire nationale vint de ce que son règne inaugura la guerre de Cent Ans. Car ce souverain, plus confiant dans la diplomatie que dans les armes, préféra ne pas combattre l'envahisseur anglais et lui laissa la prise de Calais. Ainsi naquit le germe des hostilités qui ensanglantèrent les règnes de ses successeurs. La réussite de sa politique permit cependant la réunion du Dauphiné à la France, sous la forme d'un apanage perpétuel accordé au fils aîné du roi.

This book offers a new perspective on French architecture, describing the impact of political history on the architectural development of Paris. Through various stages in history from the Roman to the Medieval, Renaissance and Early Modern and Modern, Paris: The Shaping of the French Capital shows how the immense political power of monarchs, the aristocracy and church determined the pace and volume of building in Paris and the extent of town planning. Whereas many other great cities owe their historic importance to trade, and to local government (the City of London being a supreme example), these attributes were largely absent in Paris (throughout most of its history it didn't even have a mayor). Arguably, because of this, gradually over the centuries the French capital emerged as one of the world's most beautiful cities, and now is a metropolis with a population in excess of 2 million.

Money and Banking in Jean-Baptiste Say's Economic Thought Cambridge University Press

Jean II, surnommé le Bon en raison de sa bravoure, succéda en 1350 à son père Philippe VI, premier roi Valois après l'extinction des Capétiens directs. Héritant d'un royaume affaibli et d'une autorité contestée après la défaite de Crécy, il s'efforça de redresser la situation en réorganisant l'armée et en assainissant les finances. Trahi par les grands qui changeaient de parti au gré de leurs intérêts, il fut malheureusement vaincu par le Prince Noir à la bataille de Poitiers. Roi méconnu, il réunit à la couronne la Bourgogne et le Dauphiné. Ce portrait dressé à partir d'une

contre-enquête minutieuse aide à comprendre sa personnalité, vivante incarnation des vertus et des faiblesses du tragique XIV^e siècle. Il fut le créateur du Franc.
