The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

In September of 1893, Norwegian zoologist Fridtjof Nansen and a crew manned the schooner Fram, intending to drift, frozen in the Arctic pack-ice, to the North Pole. When it became clear that they would miss the pole, Nansen and his companion Hjalmar Johansen struck off by themselves. Racing the shrinking pack-ice, they attempted, by dog-sled, to go "farthest north." They survived a winter in a moss hut eating walruses and polar bears, and the public assumed they were dead. In the spring of 1896, after three years of trekking, and having made it to within four degrees of the pole, they returned to safety. Nansen's narrative stands with the best writing on polar exploration.

Die behoue huis verteenwoordig De Vries se "ernstige" verhale en die kern van sy werk. Hy het self die keuse van verhale uit sy werk gedoen, en Wium van Zyl het 'n kort inleiding daarvoor geskryf: "Geen kortverhaalskrywer in Afrikaans ewenaar De Vries se volgehoue uitdaging aan sy leser nie: die intens gekonsentreerde intriges, die kriptiese weergawe van hele lewensgeskiedenis in volle verwickeldheid en daaragter tergende oerbeelde uit die kollektiewe onbewuste (die towenaar, die idioot, die jokkie, die clown) met beheer oor dood en lewe, oor verval en opbou ... Die Verlore Eiland en Ander Stories

Set in nineteenth-century rural Africa, Fiela's Child tells the gripping story of Fiela Komoetie and a white, three-year old child, Benjamin, whom she finds crying on her doorstep. For nine years Fiela raises Benjamin as one of her own children. But when census takers discover Benjamin, they send him to an illiterate white family of woodcutters who claim him as their son. What follows is Benjamin's search for his identity and the fundamental changes affecting the white and black families who claim him. "Everything a novel can be: convincing, thought-provoking, upsetting, unforgettable, and timeless."—Grace Ingoldby, *New Statesman* "Fiela's Child is a parade that broadens and humanizes our understanding of the conflicts still affecting South Africa today."—Francis Levy, *New York Times Book Review* "A powerful creation of time and place with dark threads of destiny and oppression and its roots in the almost Biblical soil of a storyteller's art."—Christopher Wordsworth, *The Guardian* "The characters in the novel live and breathe; and the landscape is so brightly painted that the trees, birds, elephants, and rivers of old South Africa are characters themselves. A book not to miss."—Kirkus Reviews
